## NERVOUS DYSPEPSIA. SURVEY OF S. P.

A CURE FOR IT.

Not a Patent Cure-all, nor a Modero Miracle, But Simply a Rational Cure for Dyspepsia.

In these days of humbuggery and deception, the manufacturers of patent medicines, as a rule, seem to think their medicines will not sell unless they claim that it will cure every disease under the sun. And they never think of leaving out dyspepsia and stomach troubles. They are sure to claim that that their nostrum is absolutely certain to cure every dyspeptic and he need

look no further.

In the face of these absurd claims it is refreshing to note that the proprietors of Stuart's Dyspepsia Tablets have carefully refrained from making any un due claims or false representations re-garding the merits of this most excellent remedy for dyspepsia and stomach troubles. They make but one claim for it, and that is, that for indigetion and various stomach troubles Stuart's Dys-pepsia Tablets is a radical cure. They go no farther than this and any man or woman suffering from indigestion, chronic or nervous dyspepsia, who will give the remedy a trial will find that nothing is claimed for it, that the facts will not fully sustain. It is a modern discovery, composed

of harmless vegetable ingredients acceptable to the weakest or most delicate stomach. Its great success in curing stomach troubles is due to the fact that the medical properties are such that it will digest whatever wholesome food s taken into the stomach, no matter whether the stomach is in good working order or not. It rests the overworked organ and replenishes the body, the blood, the nerves, creating a healthy appetite, gives refreshing sleep and the plessings which always accompany a good digestion and proper assimilation

In using Stuart's Dyspepsia Tablets no dieting is required. Simply eat plenty of wholesome food and take these Tablets at each meal, thus as-sisting and resting the stomach which rapildy regains its proper digestive power, when the Tablets will be no inger required.

Nervous Dyspepsia is simply a conlition in which some portion or portions of the nervous system are not properly courished. Good digestion invigorates he nervous system and every organ in

According to appointment a special meeting of the city council was held last evening to discuss the advisability of purchasing fire apparatus for the Lehi volunteer fire department. There were also present quite a representation of the prominent citizens of this place a number of whom joined in the dis-cussion and almost all of them together with the entire city council were ly in favor of buying an apparatus. Mayor Austin stated that a fire ap-paratus suitable for Lehi could be purchased without incurring any addi-tional taxation. A committee of three consisting of Mayor Austin, Council-man Samuel Taylor and City Attorney Prime Evans, were elected to investi-gate the question and next Saturday they will visit Eureka to see the fire apparatus lately installed there and later will visit other fire departments; they will thoroughly investigate the matter before purchasing.

# CUT-OFF BECUN.

Corps of Engineers Leaves Ogden for Point West of Terrace.

OGDEN VERSION OF MOVE.

Junction City Residents Look Upon the Dispatching of 30 Men on the Work as a "Bluff"

A corps of Southern Pacific surveyors consisting of some thirty men, left Ogden yesterday afternoon for a point west of Terrace. The men were well supplied with provisions and incidental impedimenta and, judging from the supplies they took along with them, they intend to be in the field for a num-

er of weeks. is the first tangible move made by the Southern Pacific in the direction of building the cut-off round the south shores of the lake into Salt Lake City. The Ogden people are thoroughly The Ogden people are thoroughly arroused over the matter, at the same time they regard it as a move on the part of the Southern Pacific-Union Paific Interests against the Clark road in order to head off any concessions that may be given to the Los Angeles road by the citizens of Salt Lake.

The Ogden Standard in commenting

upon the move says:

'The corps are employed by the Southern Pacific company and their presence at Terrace now is taken to nean another move in the great game Lake people in order to knock out the Clark road. When the agitation was first gtarted the Salt Lake papers claimed that the cut-off around the southern end of the lake would be run Railroad men, cattle menand others who have been over that ection, laughed at the absurdity of his proposition as in the first 40 miles east of Elko the company would enounter as heavy grades and as expensive work as they do now at Prom-ontory. Besides this there would be he necessity of the tunneling through he hills west and south of the lake nd the lack of water for engine use yould be encountered.

"Now, however, the surveyors have commenced work at Terrace and the encircling of the lake, making the proposed cut-off nearly 150 miles longer than the lake cut-off and 100 miles longer than the present route, while nearly a much trestle-work will be needed as in the lake cut-off or in event this is avoided the route will encounter as heavy grades as the Proteontory route and an immens amount of tunneling. The utter ridic-ulousness of the new move is plain-ly apparent but can probably be used in the game of gulling Salt Lake people. "As a general thing the Southern Pacific and Union Pacific, when about extend their trackage and make ther improvements preserve a discrete slience and all their movements are secret. But in this instance the crival of the surveying corps has and furnish the incentive for the renew-al of the agitation, but either the latter have shown a lack of newsgathering or have become suspicious."

A gentleman who is well acquainted A gentleman who is well acquainted with the topography of the country through which the proposed cut-off is expected to pass this morning said: "It is all rot to talk about there being heavy grades and tunnel work across the desert and round the south shore of the lake. When that cut-off is built will be possible to run trains at a fifty-mile gait over the entire distance."

## SOUTHWESTERN DEAL.

Outline of Coup Being Engineered by Standard Oil Interests.

New York, April 17 .- The Herald says: It can be definitely stated that further progress has been made in the South-western railroad "deal" which is being engineered by the Standard Oil-Gould-Harriman interests.

"Just what properties are to be included in this new consolidation of railroads cannot be accurately stated, but the prospective purchaser of the Mexican Central is, or is to be, the St. Louis and San Francisco Railroad com-pany and shrewd railway men say that Frisco has bought the Mexican entral then some one has bought the Frisco. The strength and activity of Mexican Central issues clearly indicate a purchase for some private interest.

From one of the very highest banking authorities the information is obtained that eventually the St. Louis & San

Francisco will turn up as owner of the property. When asked recently if the St. Louis & San Francisco was not planning an extension toward Mexico, President B. F. Yeakum, of the road, "Yes, we are to build an extension

toward Mexico." Mr. Yoakum said that the Frisco road had not bought the Mexican Central, but when asked if it was not the intention of the 'Frisco interests to take over that property, he said that he could not tell what might happen in the share's. The consensus of opinion is that any such purchase would logically be the Gould interest which, despite its inactivity until recently, is still the dominant railroad power in the south-

The J. J. Hill Burlington Deal is Aimed at Southern Business.

Chicago, April 17.-Speaking of the Burlington, Great Northern and North-ern Pacific deal, the Record-Herald

what J. J. Hill, president of the Great Northern wants of the Burlington sys-tem is not an outlet to Chicago as a link in an eastern line for the Great Northern and Northern Pacific, but chiefly a connection with St. Louis and Kansas City. He wants to reach the cotton of the South for transportation over the great northern and Northern Pacific and his steamships now building to Oriental markets. It is no part of his purpose, it is declared, Mr. Hill his purpose, it is declared, Mr. Hill said, to use the Burtington as an exhaustive outlet for the two Pacific rends to Chicago. On the contrary all the six Chicago roads which bring business to the Great Northern and Northern Pacific will have their fair share of the traffic as now. It is understood that St. Paul is to be the central headquarters of the organization.

JUDGE KELLY ARRIVES. Union Pacific Attorney May Take a

Hand in Grade Contest. From Inquiry at the Oregon Short Line and the Clark road headquarters this morning it was learned that the situation down on the grade is practi-cally unchanged. The laying of steel was resumed yesterday and the track-layers are gradually approaching the first tunnel where the vanguard of the known in Ogden for several days that the party would commence operations. It is evidently intended that the news should go to the Salt Lake papers track right through while the forces say they are going to hold the tunnels come what may, and there the

matter rests at present.

In anticipation of legal difficulties,
Judge Kelly of the Union Pacific arrived from Omaha this morning and was closeted with Parley L. Williams the attorney for the Oregon Short Line for a couple of hours. It is expected that interesting developments will be materialized in the battle of the grade within the next few days.

## Agents to Inspect System.

Chicago, April 17 .- The Chronicle General agents of the Santa Fe sys-

tem in all parts of the country have been invited by the management of that road to make a trip to California, for the purpose of inspecting the new lines of the company in that State, and familiarizing themselves with the Pacific coast and steamship and rall connec-tions. All of the agents have accepted the invitation.

The idea of entertaining the agents

in this way is being adopted by many of the larger systems. Last month the Burlington management held a meeting of all division and general superintendents of the system in Chicago.

### Hill Makes \$4,000,000 St. Paul, Minn., April 16.-It was re-

ported in what are usually well in-formed railroad circles today that James J. Hill of the Great Northern has disposed of his Baltimore & Ohio and Erie stocks and that the operation has netted him \$4,000,000. The stocks, it is said, were bought by Mr. Hill simply as a speculation, and it was never contemplated to make either of the roads a factor in a transcontinental system, as has been repeatedly reported. The fact that Mr. Hill had purchased stocks of these roads had the

ations were being formed, in which one or the other of these roads was to be component part. It is pointed out that Mr. Hill has always persistently denied these rumors and has stated that his purchases of the stocks were simply for investment. The investment now hav-ing shown what he considers a sufficient margin of profit, he has disposed of his entire holdings.

by the tracklayers and bridge builders, the Oregon Short Line fully intends to push through to California. It has been decided to extend the Ta-luca line of the Burlington to Cody City, instead of to Meteetse, as has been re-ported. Contracts have been let for the grading of the uncompleted eight miles of the line between Eagle's Nest and

Cody.

All the roads coming into Salt Lake this morning did a heavy business in passenger traffic on the occasion of the funeral services of the late President George Q. Cannon. The Rio Grande Western brought in 100 passengers from Ogden on the special and 375 from the south. The Oregon Short Line reports about the same number.

Colonel Dodge has told the Denver reporters that he will retire from the Rio Grande Western when the consolidation takes place next month. This is in the face of the fact that when the consolidation is consummated the Grande Western will to all intents and merged into the Denver & Rio Grande under another name for the joint corporation. As the colonel says nothing in regard to the position he will hold under the new order of things, his stateas being one of his little jokes.
