These seem to be a certain reiteration at Stockholm, politics at present. They seem to be a feeling even among the higher classes that important changes are apt to take place in economy and that the time has come for a revolution as soon as there are signs of moving. One of the most conspicuous manifestations of this feeling is perhaps the organization of societies, the very essence of which proclaim that it is time for a revolution. I am inclined to mention three of these societies, "The Future of Sweden," "The Rights of Sweden" and "The Swedish National Union." They are not necessarily progressive, but they are very antagonistic to what may look upon as a revolution that is also an unusual sort of a political nature.
