FOUND DEAD IN BED.

Sudden Demise of Mrs. Hamilton on Sunday Night.

Mrs. Abigail Hamilton, mother of J. N. Hamilton, retired to her bed Sunday night in her usual good health and Acres on Mormon Plans

Apropos of the news that the Canadian Pacific authorities have under consideration an immense irrigation scheme to reclaim millions of acres of barren lands between Calgary and Med-Icine Hat, in Alberta, by building a dam at Bow River a mile east of Calgary, and the fact that the famous irrigation expert, James Anderson, who achieved world wide reputation through druggists his work in California and Egypt, has recently been over the tract and reported favorably thereon, the Family Herald and Weekly Star of Montreal says:

"The success already attending the irrigation of the Mormon colony lands at Lethbridge amply prove what can be done in this respect (reclaiming arid Alberta lands). From forty to seventy bushels to the acre has actually been harvested this year, and the average o root crops is still more surprising. This was the result of too much land and too This little return held by the Galt coal field beople. The work of irrigation was planned by Mr. Anderson, and carried out by the Canadian Northwest Irrigation company, who were fortunate in securing at the outset a number of Mormon settlers thoroughly with the work of irrigated lands in Utah. Here nearly every available acre has been irrigated. They li & and raise large families on holdings of a few acres and are rapidly making money and gradually extending their holdings from ten to hundreds of acres. The commissioner of agriculture for the territories, who was recently in Montreal, had an interview with the Canadian Pacific Railway officials, and

was in a position to give most encour aging reports as to the success of Lethbridge experiment, and which has been a great factor in determining the

company to take up the question. Should the scheme go through, the company will have all the necessary conditions in their favor. Calgary is over 3,000 feet above sea level, and Med-icine Hat 2,200 feet, the intervening ountry being high plateau watered on either side by the Bow and Red Rivers. There are no hills to interrupt the regular flow along the canals and the sol perfect. The first source of supply the Rocky Mountains, from whose foothills issue countless rivers and streams. One of the largest is the Bow, from whence it is intended to draw the

rincipal supply. Mr. L. A. Hamilton, of the land de artment, says that probably 200,000 cres will be included in the first atempt, the iden at first being to sell the ands benefited and so use the revenue thus obtained in opening up new terri-tory. The initial canal would be of less capacity than required to irrigate he whole area, and would be enlarged as required."

MISSING WOMAN CASE.

New Chapters in the Mystery Are Not Easily Understood.

A sequel has come to light in the Mrs. Waldoe insane case. The Morgan Miror publishes an article that Mrs. Walloe was found wandering in Hardscrabde canyon last Tuesday in a demented ondition. She was brought down it Morgan last Wednesday and placed in harge of Sheriff Anderson. She reained her right mind shortly after artiving here, however, and stated that the last she remembered was being near City Creek. Sheriff Anderson notified Sheriff Naylor of Salt Lake county, but he falled to come, and she was put on the train bound for Salt Lake. It was noticed by last night's "News" that the woman did not arrive in Sait Lake. and it is feared she has again taken to

the hills. day night in her usual good health and on going to her room the next morn-ing she was found dead in her bed. The shocking discovery came as an

verbial "needle to an anchor." This store is situated in a valley nine miles from the nearest rallway station and about twarty-live miles from the near-est town. Mr. Larson says: "I am fa-vored with the custom of farmers within a radius of thirty miles, to many of whom I have supplied Chamberlain's remedies. All testify to their value in household where a doctor's advice is almost out of question. Within one taile of my store the population is per-
