

MINING, BUSINESS AND STOCKS

REDUCTION PLANT TO COST \$100,000.

Will be Built Near Rambler, Wyo. And Will Treat ore from the Grand Encampment Mines.

NECESSARY GROUND SECURED.

Together With Valuable Water Rights—The Doane Rambler Copper Mine Will be a Contributor.

Special Correspondence.

Grand Encampment, Wyo., March 12.—It is now an assured fact that a reduction plant, costing at least \$100,000, will be built at Rambler in the near future. A local company has secured the necessary ground and valuable water power rights. The plant will be located one mile west of Rambler on Battle creek, and the water power from Battle lake and Battle creek and tributaries will be used to drive the plant and furnish power and light to the town and all the mines and prospects in the Battle lake basin.

Among the mines that will furnish ore for the plant is the Doane Rambler, it being one of the richest copper properties in the country. A large amount of development work has been done and this mine alone should be able to furnish 150 tons of ore per day.

The Doane Rambler holds the world's record for high grade shipments, having shipped several carloads averaging from 40 to 60 per cent copper.

The town of Rambler is located 14 miles west of Grand Encampment, and is surrounded by acres of first class copper prospects.

THE MINING EXCHANGE.

Week Opened With Stock Market Dull and Inactive.

The week opened with mining stocks as inactive as usual. During the regular call only two stocks participated in the trading. Ajax and Eagle and Blue Bell. Several lots of Daily-West were brought out on the open board, which swelled the totals to 7,500 shares sold, for which was checked out \$2,844.75. Daily-Judge was strong in the bidding, but there was no inclination on the part of the buyers and sellers to get together. Century opened strong during regular call and transferred up to 76 on the open. Yankee Consolidated also appeared in better tone and was marked up with a sale at 50 cents.

The closing quotations and sales were posted as follows:

MORE MAJESTIC SUITS FILED

White Eastern Interests Are Trying to Adjust the Finances.

According to the Milford Times, several more suits have been filed by local creditors against the Majestic company and more attachments and liens have been placed upon the properties.

Dr. W. W. Cook, through his attorney, George B. Greenwood, has filed a suit for \$215, for services as mine surgeon and on assigned accounts, and an attachment was levied on the smelter.

Judge Howat also appears as attorney for the Majestic company in a demurrer filed at 12 o'clock in the case of I. V. Sawyer. The demurrer merely denies the ninety-five causes of action.

The Cunningham company has secured a judgment against the Majestic at Salt Lake for \$200 and the Harrington-Hickory mine will be sold on March 30 to satisfy this judgment. This sale will be subject to the mechanic's lien filed on the same property some time ago.

Working a Large Force.

Special Correspondence.
Cedar City, March 12.—The Colorado Fuel & Iron company still keeps up its interest in developing the numerous iron claims contracted for that corporation. A force of from 50 to 60 men is engaged at the present time.

BOARDING HOUSE BURNED.

Was the Property of the Lincoln Mining Company at Pearl, Idaho.

A message from Pearl, Ida., received this morning bore the intelligence to John T. Hodson, manager of the Lincoln mines in that camp, who is now in the city, that the boardinghouse belonging to the property had been destroyed by fire. The building furnished accommodations for 75 men and was not insured. The conflagration took place yesterday.

The house was an expensive one, and had many of the conveniences had at many first class hotels.

TAKES OVER THE J. I. C.

Cause of Recent Shut Down Explained—West Quincy Company Formed.

The West Quincy Mining company of this city, filed its articles of incorporation in the county clerk's office today. Its capital stock is \$1,500,000, divided into shares of the par value of \$5 each. G. D. B. Turner is president of the company; W. H. Dodge, vice president; R. E. Miller, secretary and treasurer. The company owns the Bunker lode and four other claims located in the Snake Creek district, Wasatch county.

The new company takes over the property of the J. I. C. mine, in which an extension of the famous Quincy mine has been opened.

When the J. I. C. was closed down recently it was generally supposed that it was because of financial difficulties. But such was not the case at all. It was for the purpose of completing the organization of the West Quincy, which starts off with very strong backing. That the West Quincy will develop into a large producer, is the belief expressed by some of Park City's most experienced mining men.

UTAH COPPER PLANT.

Bingham Mill Begun on Ore Yesterday and Works Satisfactorily.

The big concentrating plant of the Utah Copper company at Bingham went into commission yesterday. General Manager D. C. Jackson was present. About half the machinery was in operation and everything moved off satisfactorily in a mechanical way.

The Copper Belt had delivered about 400 tons of ore all told up to last night. Until the line can deliver no less than 500 tons daily the plant will not be run at its full capacity.

The Newhouse Contracts.

Tomorrow is the date set for the opening of the bids for the construction of the big Newhouse concentrator in Beaver county. The bids now being filed are for the concentrator building proper, and all its contents. In the matter of providing a power plant it has been learned that no decision has been reached, as yet, as to whether it will be operated by steam or electricity.

We Paid \$100,000

For the American rights to Liquezone—the highest price ever paid for similar rights on any scientific discovery. We did this after testing the product for two years, through physicians and hospitals, in this country and others.

That price was paid because Liquezone does in germ troubles what all the drugs, all the skill in the world, cannot accomplish without it. It carries into the blood a powerful yet harmless germicide, to destroy at once and forever the cause of any germ disease. And no man knows another way to do it. Liquezone is so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it cannot kill.

Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquezone kills the germs, wherever they are, and the results are inevitable. By destroying the cause of the trouble, it invariably ends the disease, and forever.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquezone kills the germs, wherever they are, and the results are inevitable. By destroying the cause of the trouble, it invariably ends the disease, and forever.

Acts Like Oxygen.

Liquezone is the result of a process which, for more than 20 years, has been the constant subject of scientific and chemical research. Its virtues are derived solely from gas, made in large part from the best oxygen producers. By a process requiring immense apparatus and 14 days' time, these gases are made part of the liquid product.

The result is a product that does what oxygen does. Oxygen gas, as you know, is the very source of vitality. Liquezone is a vitafizer with which no other known product can compare. But germs are vegetables; and Liquezone—like an excess of oxygen—is deadly to vegetable matter. Yet this wonderful product which no germ can resist, is to the human body, the most essential element of life.

COLUMBIA AND HIGHLAND BOY CON.

Shareholders in These Corporations Are to Receive Payments Aggregating \$60,000.

OHIO TO CHECK OUT \$50,000.

This Will be Due Tomorrow—The Utah Apex Makes Third Payment On Bingham Mine.

Within the next 24 hours \$50,000 will be expended for Bingham mining properties. The stockholders of the old Columbia Copper company will participate in a \$50,000 distribution from the Ohio Copper company, which is to represent the third payment on the purchase price of that property. This will leave one more to be made, but which does not come until June 15 next.

Since the taking over of the Columbia by the Ohio syndicate now in control of the proposition, developments have progressed in a most gratifying manner. Competent mining engineers, who examined the property before the deal was consummated and recently, declare that it is worth now twice as much as it cost the Ohioans.

The Ohio company, with its mill in operation and turning out a good concentrate, in addition to the regular shipments of high grade ore, will be able to earn back the money paid out in its purchase within a very short time.

It was learned this morning that \$10,000 would be deposited to the credit of the stockholders of the Highland Boy Consolidated, which sold its property several months ago to the Utah Apex Mining company of which Walter C. Orem of this city is manager. This makes the third payment on the purchase price of this ground.

CONCENTRATES.

J. H. Thompson returned from Tonopah and Goldfield last Saturday.

A small force of men is employed at the old Cave mine near Milford.

T. P. Rigney, the mining expert, has gone to Mexico on professional business.

The first shipment of concentrates from the Honoring mill is being sampled today.

Henry Newell, the well known mining man, and wife departed today for California.

President Bayley of the Copper Belt railroad is expected to arrive in the city on Wednesday next.

The mill at the Midas mine in the Deep Creek country is scheduled to start up during the present week.

John A. Hunt returned last Saturday from a trip, along the line of the San Pedro railway in southern Nevada.

Dr. Franklin has gone east in response to a telegram summoning him to the eastern offices of the Gold Development company.

Robert J. Corey, general western manager of the Allis-Chalmers company, has arrived from Denver and will probably remain for a few days.

It is being rumored that the Overland mine at Sunshine is to be purchased by Senator Clark. If the rumor be true we may hear of remarkable developments at our neighboring town in the near future—Mercur Miner.

F. W. Sherman, superintendent of the Daily-West mine at Park City, inspected the new plant of the Honoring Mining company at Buhl last Saturday. He characterizes it as being one of the best plants of the kind in the west.

Jasper McCaskel has been named as assistant superintendent of the Daily-West mine at Park City. Mr. McCaskel comes from Mexico, where he has been in the employ of the Guggenheim Exploration company.

Through the explosion of a lamp on the 1,100-foot level of the Silver King mine last Saturday a small blaze occurred. The miners became ignited, but soon after being discovered the flame was extinguished. No damage was done.

An Elly. Nev., paper says: Work in the mines of the White Pine Copper company and the Giroux Consolidated Mines company is progressing steadily.

Constitution

All diseases that begin with fever—all inflammation—all catarrhs—all contagious diseases—all the results of impure or poisonous blood. In nervous debility Liquezone acts as a vitalizer, accomplishing what no drug can do.

50c. Bottle Free.

If you need Liquezone, and have never tried it, please send us this coupon. We will then mail you an order on your local druggist for a full-size bottle, and we will pay your druggist ourselves for it. This is our free gift, made to convince you of the value of what Liquezone is, and what it can do. In justice to yourself, please accept it to-day, for it places you under no obligation whatever. Liquezone costs 50c. and \$1.

CUT OUT THIS COUPON

For this offer may not appear again. Fill out the blanks and mail to the Liquid Ozone Co., 428-430 Wabash Ave., Chicago.

My disease is.....
I have never tried Liquezone, but if you will supply me a 50c. bottle free I will take it.

and as new territory is being opened up the claim that here are the largest bodies of copper ore in the world is being verified. With the promise of a Chairman starting up in the spring, and the Sapho's financial affairs being arranged satisfactorily, and with the leasing plant of Ed Millard & Son successfully extracting gold values, the outlook for a prosperous season is most encouraging.

The mill of the Ohio Mining company, which was forced to close down on account of the wreck on the Copper Belt railway, has started up again. The road is making the necessary deliveries of ores again.

Harry Joseph, manager of the Carls, spent yesterday at that Tinian property. Where, he states, he found conditions looking very promising. Shipments of low grade ore is being made at the rate of about a car a day. Occasional lots of high grade ore are being marketed.

No advices have been received at the local offices of the Utah-Apex concerning the election of a new board of directors, scheduled to take place in December last Saturday.

LOCAL MARKETS.

In the local markets today, wild duck are conspicuous by their absence. There are a few changes in prices in green grocery articles, and the addition of coconuts, lettuce, chicory and spinach. Prices in flour and grain, fish and meats remain unchanged. Prices obtaining today in retail and wholesale markets are as follows:

RETAIL.

FARM PRODUCTS.

Wheat, per bushel.....	1.10

BUSINESS NOTES.

The following articles of incorporation were filed in the secretary of state's office today: The Green River Canal company of Green River, Emery county, capitalized at \$20,000, divided into shares of the par value of \$5 each. E. P. Johnson is president; J. T. Parker, vice president; Frank Cook, secretary and treasurer.

The Beebe Lumber company of Provo, capitalized at \$100,000, divided into shares of the par value of \$1 each. D. R. Beebe is president; H. E. Beebe, vice president; A. G. Beebe, secretary and treasurer.

DECISION AFFECTED STOCK MARKET.

Brought Out Heavy Offerings All Around but Rally Soon Followed.

NORTHERN SECURITIES STRONG.

Were Down a While and Then They Made a Very Strong Recovery.

New York, March 14.—Opening prices of stocks today compared with Saturday showed mixed results which were generally small and on light dealings. The local stocks weakened again, especially the Metropolitan. The general market eased off sympathetically but soon recovered to above last week's close. Third Avenue 6 1/2, Metropolitan Street Railway 2 1/2 and Sugar, Pressed Steel Car, Consolidated Gas and Pullman 1. Covering by the shorts, added some of the weak stocks 1 to 2, but the transactions became quiet on the rise. Metropolitan Securities rallied 1/2 and Metropolitan Railway 1/2 point. The market developed more appearance of animation and strength than for many days and reacted a point of interest. It declined 1/2 point, from noon sold off for the most part when news of the decision came out. On the part of Northern Securities was the center of interest. It declined 1/2 point, from 8 1/2 to 8 1/4 on news of the decision and rallied to 8 1/4 and later was quoted at 8
