DESERET EVENING NEWS SATURDAY FEBRUARY 13 1909

In Memory of C. R. Savage By ALFRED LAMBOURNE.

HE first man to whom the writer . upon the streets of Salt Lake

City was the late C. H. Savage, The last person to whom Mr. Savago snoke upon these streets was the writer. natween these two greetings lay what one might call an almost lifelong priendship, A friendship which grew and was cemented in this our home, and through travels together from coast to coast of this broad land.

coast to coast of this broad land. As on fast Sathath day, I sat in the Assembly hall and looked on the many fowors that surrounded the casket of my departed friend, and latened to the resolution music, vocal and instrumen-ial, and the words of praise that were given for a life now ended, yet though I followed every thought of those who addressed the large number of mourn-ers who were gathered there, my own thoughts could not help but wander at times.

I was again with the living man and and many scenes. Once more I lived over what had been to me, some of the happiest and richest moments of my

happiest and richest moments of my life. Yes, C. R. Savage was a kindly man, but I do not need to speak of that, it is a fact that is known to thousands, it was told above his bier. Yet, though 1 shall not dwell upon the kindliness or his heart, I have not forgotten how the wolf once scratched at my door nor whose hand it was that stayed it. In my mind was the memory of Sah-hath days we had passed, my friend and 1. In each others company, and in what strange and varied places? Otten we had listened together to the sacred music and the divine service-tim service of the dead. We had lis-tenet together to words of exhortation that were mingled with the passionato singing of wild birds, the rustle of pains, the signified of places or the memmur of ocean waves. Once more there seemed to come, to me, the frag-rence of semi-tropical blossers, the totay scent of the sea, the incense of rainging censers. Again my friend and I were unong the workings on the totay scent of the sea, the incense of reliaging censers. Again my friend and I were among the worklipers in the strange and lonely cathedral of San Xavier del Eac, in the little chapel solid the lemon and orange groves at Canulus, in Father Serra's mission church at Monterey, in the ruimod chancel of San Carlos Carmel, or at Santa Barbara, or again we were away from the Pacific and on Atlantic churcs. We were under the dome of Philip Brock's church at Boston, or in the marble alsles of St. Patrick's in New York.

In the margie also of St. Parton's in New York. But more than this. It seemed to me that my dead friend was living again, and once more we stood and worshiped in the majestic cathedrais not made by

hands. C. R. Savage was a lover of nature. He loved nature more than art. Next to mankind, he loved the solkude, the prairie, the forest, the mountains and the son. How often it happened that we passed a Subbath day together, that upon that day we looked at the beau-

ME first man to whom the writer ties of untouched nature. Sabbaths of these few lines ever spoke that left an indelible imprint upon hear

thes of untouched nature. Sublaths thus left an indelible impirit upon heart and brain. It was not exactly that my rriend looked upon nature with the artists worship, or lust of the eye, or with the eduration and dreaming of the post. There was something in his love of un-ture which was practical, robust and yet affectionate. Then it was that one learned to know the man, to know all that was best and deepest in his friend-ship, to see beneath the surface to know what guided the main currents of his life. Then one learned of his atmost child-like simplicity and his love for that which was good and true. Often in these later years has C. R. Savage recalled to me those Stabbath days. When we net and talked to-gether that hast time upon the streats, i believe those days were in his mind. Ob, haw past describing was the sacred calm, the poses of that Sab-bath meruing when we stood by the wa-ters of Lake Tahoe: The stim was lift-ing above the peaks of the Sterm No-vada mountains, and it made a pathway of gold across the liquid and stainless blas. How spitched were the anow-covered mountains, how musical the sound of the torrents falling waters.

of gold across the liquid and statistics blue. How splendld were the mow-coverial mountarine, how musical the sound of the torrent's tailing waters, and overy sight and votee of nature seemed filled with infinite promise.
 That was in the mouning of my life, in the morning of my friendship with the main we have lost. Since that henry of beauty and peace, we have both drunk from the cup of sorrow. Though C. E. Savage was smong the monit cheerful of mea. Yet perhaps, when I last taiked with him, life had taken on a more selema hue. It was like the Alpha glow that ranked on the Sierra snows at the end of that day by the shores of the beautiful lake.
 But other Sabbaths we passed to streng waters of Shoshone, by the Calumbia river, booking on the snow-covered cones of Mt. Hood and Mt. Shasta, upon the expanse of cactus and sand of the Gila desert, amild the wonders of the Vorgin and by those which, in its deep sunk bed, now the Colorade.
 Yes, as the violin thrilled, the organ gave forth soleran day those which, in its deep sunk bed, now, by the Biores of the signal point cacture of praise, T though of these.
 But what all this, now, to my friend C. R. Savage? No study, now, for him of the problems of human existence. We shall take no more of the unater of the set of the study, now, for him of the problems of human existence. We shall take no more of the mysteries of life and death, as we dud in the years gone by.

he years gone by. Hall to th ALFRED LAMBOURNE.

Hoarse coughs and stuffy colds that may devolop into pneumonia over night are quickly cured by Foley's Honey and Tar, and it soothes in-flamed membranes, heals the lungs, and expels the cold from the system. -F. J. Hill Drug Co., ("The Never Substitutors"). Substitutors").

IS YOUR ANCESTRY WORTH MENTIONING?

MERICANS who thins they have any ancestry worth mentioning aloud and are prepared to prove it will soon have opportunity to it will be devoted to a pedigree of two may be devoted to a pedigree of two same individual on this life it and ditional fee and the incorporation of this bit in the record. If the mater-nal grandpurents furnish such op-portunity, they, too, will be welcome with all in their ancestrai line. Here is where the society started out to put down its feet hard, but after-and examined the field with an expert eye. teil the public all about their forbears and delight their posterity in a publi-cation which will be issued and en-dorsed by the New York Genealogical and Biographical society, the New York Herald says. It is likely to be named "American Fedigrees," but its plan, outlined by officers of the society, seems to propose the functions of a transatiantic "Burke's Peerage." It will not be possible to trace many lines of succession to troyal or noble titles through the American Pedigrees, but they will not be barren of value in establishing rights to family privilege which even in our more or less demo-cratic country depend wholly upon lineal descent from ancestors identi-fied with notable periods or events in tell the public all about their forbears

ntic Burke's Peerage. It will easible to trace many lines of n to royal or noble fittes the American Pedigrees, but I not be barren of value in ng rights to family privilege en in our more or less demo-intry depend wholly upon scent from ancestors identi-notable periods or events in history.

THE FYTHON HAIR HOLLS, soft, fuffy and light.

Tailored suit models for spring emphasize the new hipless and empire styles.

This season's suit showing more than ever marks our leadership as authoritative style exponents. Correct ness characterizes each individual model-styles, material and workmanship possess that typical air of exclusiveness which blends with the wearer's personality and sets her apart as fashionably dressed.

Spring's tailored hipless suits-\$35.00

At \$35.00 we feature one of the season's latest tailored modes. Designed with the long 36 inch coat in the Empire and elite hipless styles-gored skirts plain tailored or trimmed with folds. The colors are the new shades of Pearl gray, receeda, taupe, navy, old rose, Copenhagen, shepard plaids and elegant black. The fabrics are serges panamas and satin striped cloths.

Tailored styles at \$25.00 and \$27.50

At these popular prices we are showing many new models in tailored suits-garments of the same style and character as the more expensive-though not so fetch ingly trimmed.

Linen tailored waists-\$4.50

The new linen models in strictly tailored waists are quite modish-mannish styles. Some with plain tucked fronts, others are handsomely embroidered-all the sea son's latest waist creations for Spring wear-Display and sale Monday-\$4.50.

Net waists—spring models—\$7.50

At \$7.50 we show two charming and effective new leis in net waists. One is a plain tricked mode finished with messaline collar and trimmings-the other is exquisitely tucked and trimmed with delicate shades of Persiau braids and buttons. Long sleeve, high collar styles-open front or back-Display and sale Monday -87.50.

s early history. After a long consideration the society

After a long consideration the society decided recently to father this under-taking, and its committee is already at eark soliciting subscriptions. Circulars will be sent to all the patrons of its li-brary, which has been gathered to ald the search for family histories in the United States, and to all members of United States, and to all members of the Society of the Cincinnalt, the Sons of the Revolution, the Daughters of the society of the Cincinnalt, the Sons of the Revolution, the Daughters of the some, the Colonial Dames and of the same, the Colonial Dames and of the some of patricits, military and command, of the early years of Am-entaning a notable pedigree, but of hav-ing any pedigree which one can trace of make public. The subscribers will be particular to enlarge mon their family history to an atmost unlimited extent. They will be expected first to give their lineal descent; that is, from father, grandfather, great grand-father ar on on the some of the other well and on the great grand-father extents in the preceding to the so on fit the mothers line offers. cided recently to father this under

struggle Ail will have a chance in American pedigrees. It will not be a quesifon of baving a notable pedigree, but of hav-ing any pedigree which one can trace and make public. The subscribers will be parnitted to enlarge upon their tamily history to an almost unlimited extent. They will be expected first to sive their lineal descent; that is, from father, grandfather, great grand-fath-er and so on. If the mother's line offers

President Hadley Says Graduates Have Opportunity

Hadley of Yale. The place, his office in Woodbridge Hall, in New Haven. "Yes, I believe this is the case," he added, "in spite of the fact that there

The momenty reporter ploked up the fol-lowing gern at Malam Brewster's not twenty-faur houts ago. One of her mil-lonaite customers struggling into a new from asked the famous conturner has been kept hor figure in such superh-charas. Your halitually cut and drink inarcity and even throughtlessly, not to The second secon riotonaly at times, erans 1 five like mhe enterplate

THE college graduate of today has a greater advantage over the non-college man than the college graduate of fifty years "" The speaker was President Arthur T alley of Yale. The place, his office in "odbridge Hall, in New Haves. "Yes, I believe this is the case," he led, "In spite of the fact that there a more college men proportionate the today?" asked the writer. "As to that I can't say, but I believe the college man group of the today of the future than they are today?" asked the writer. "As to that I can't say, but I believe to college man group of the today of the college graduate and his opportunities today are be-coming greater every year."

ture (for the inference is obvious) will have great weight in many ways. There has been a growing impression that as college graduates were becoming more numerous their individual opportunities would be proportionately ionsened and that their advantages over all others would not be as great as in the post. But, according to President Hadley that impression is erronous.

that impression is erroneous. "The college graduals" is improving every year. Standards are being cuised, not lowered. At the prosent time we are demanding that our students have a hetter knowledge of English than was formerly required. In fact, we are col-admitting students who show a general deficiency in English in their examina-tion papers. This policy has already heen put into effect, and even now we are able to sue the effects of it. A student who uses had English or who upagedig several words in one eramintrappella acceral words in one erain mation paper is not necessarily affected but if his several papers show that he is unable to write good English and spell correctly, he is not admitted into the

university. "This policy will have a tendency to keep out a number of man who are do-ficient in English, and nuturally II will have an effect upon the standard of our graduates. Perhaps not nore than ten a year will be ritled out because of it, but it will raise our standard in English appreciably." "Have any students been graduated to the part who were deficient to Eps-

in the past who were deficient in Eng-lish-in the ability to write and spett
