

## MINING, BUSINESS AND STOCKS

ACTIVITY OF  
FLOTATION MARKED

Reports Show That Shipping on  
Large Scale Will Soon  
Be General.

## WORK IS PROGRESSING FAST

What Many Principal Properties Are  
Doing Preparatory to  
Actual Output.

According to the latest reports from Pioche, concerning mining operations in progress there, the Nevada-Utah mine is cleaning out the various workings before stopping out the ore for shipment, and it is believed that in a very few weeks this property will be shipping silver-lead ores at the rate of 250 tons daily, netting the company about \$1,800 every 24 hours.

The mine sunk from shaft No. 1 in the Lucky Star, has revealed a substantial ore body in the footwall at a depth of 35 feet, and other workings of the mine are proving daily the correctness of the faith and judgment of the management.

The Pioche Pacific has completed its new hoisting plant, and the shaft, now at a depth of 300 feet, will be dropped some distance further before drifting is commenced.

The Chicago Nevada property has been equipped with a complete prospecting outfit, consisting of a horse and wagon, and the necessary small buildings, such as bunk house, blacksmith shop and boarding house, and the Lost Treasury is busy sinking a two compartment shaft, from which many encouraging results have already been obtained.

The hoisting plant of the Mendha Nevada is to be increased in the near future, as the output for the regular daily shipment is crowding the capacity of the machinery in use to such an extent that the increase is a necessity.

The Prince Con. No. 1 vein, which has been drifted on for 300 feet, shows a varying width of from a foot and a half to five feet, with high values in lead, silver and gold.

## UNLISTED STOCK HAS DULL DAY.

Only Two Sales Mark Open Session of  
Stock Exchange, Bidding Brisk.

Although there was a spirited attempt to make business on the unlisted stocks, at the open session of the stock exchange this morning after a particularly dull regular session there was very little doing. But two stocks recorded transfers. East Crown Point sold at 2 1/2 and Elva Witch at 2 1/2. Ohio Copper was offered at 1 1/2, but the best bid was \$5.10. Unita Treasury Hill received a bid of 25 but was held at 25. Thirty-one was bid for Bingham Central Standard and 35 asked. Sixteen was the bid for Fluorine, but it failed to bring any closer offering than 18. Thirty-five was the bid for Western Nevada Copper, but there was no offering, and a bid of \$1.05 for Seven Troughs Colliery also failed to draw an offer. Demolition was offered at 15 but went without a bid, while Mineral Flat at 15 and Ohio Kentucky met the same treatment. An offer was made to sell Old American at 20, but it was not wanted, and the same is true of Con. Flag at 12 1/2 and Utah Mines at \$1.50.

## STOCK MARKET DULL.

This morning's trading on the exchange was a reflection of the general inactivity of business the day following a holiday. Transfers were very few, the demand for stock being apparently very light, and while prices held their firmness, the market was very dull.

## WILL SHOW FALLING OFF.

State Mine Inspector Robert N. Bell of Idaho is in the city today on a brief business trip. He stated that the metal production of the Coeur d'Alene belt about 40 per cent under that of last year which can be accounted for by the shutting down of a great many mines in the early part of the year.

SEVIER GYPSUM  
DEPOSITS SOLD

Mill to be Erected at Once by Pur-  
chasing Company of  
Salt Lake.

## BODY OF MATERIAL IS LARGE

Extensive Output of Plaster and Ce-  
ment Contemplated by  
New Owner.

Sevier county is about to become the scene of active mining operations of a character not much considered in the light of mining. This is the working of the great gypsum beds by a newly formed company, organized for the purpose of mining the gypsum and reducing it to the commercial form by means of milling and other refining processes.

The deposits to be operated by the new company have been known since their discovery as the National Gypsum company ground, and were sold within the past few days to a company at the head of which is J. W. Taylor of this city.

The principal uses to which this material are put are in the manufacture of cement and plaster, and the chief treatment for which is crushing. The newly organized company having purchased the ground will erect a large mill and at once commence the manufacture of cement and plaster.

There are many deposits of this material throughout this part of the country, but so far the mill for reduction of water carry the heat away. Numerous. Apparently the attraction contained in metal mining and the great wealth of the country in that direction, have resulted in the overlooking of rich returns from the more commercial product.

## LIMIT OF DEPTH.

Below 50 feet the temperature rises in the proportion of one degree for every 65 feet of depth, except where currents of water carry the heat away. The result is that at a depth of about 4,000 feet we reach a temperature of 98 degrees, or blood heat. This renders it exceedingly difficult to work coal pits below that depth. This is the reason that Great Britain's coal commission has decided that mines are not workable below 4,000 feet.

The thickness of the earth's rocks building up the crust of the earth is at least 30 or 40 miles. At that depth the heat is such as would reduce everything on the surface of the earth to liquid. But the pressure of the overlying rocks is so great that until the relation of the heat to the pressure is known, it cannot be said whether the earth at that depth is fluid or solid. —Chicago Tribune.

## SILVER AT 48 1/2.

Silver moved off another notch today and the metal is quoted at 48 1/2 cents, which figure is the lowest in about five or six years. The low price of silver is having its effect on some of the low grade silver-lead mines and for this reason shipments are being withheld. This condition is being felt at the Murray plant of the American Smelting & Refining company and just before leaving for the east recently, General Manager Whitley is reported with having made the statement that unless silver moves up again soon it will be necessary to shut down some of the furnaces because of the scarcity of ore.

## CHARGED WITH BURGLARY.

Fred Walker Accused of Stealing from  
Murray Saloons.

In a complaint issued from the office of the county attorney today, Fred Walker is charged with burglary in the second degree. The specified accusation against Walker is that he broke into the Swedish saloon, at Murray, conducted by O. S. Nelson, on the 25th of November, 1908. The arrest of Walker was made by Marshal Al. Mauss, and the complaint was sworn to by that official.

A similar complaint charges Walker with a second offense similar to the first, namely the robbing of the Atlas saloon at Murray the same night. "Fingerprints" in the snow were responsible for Walker's apprehension, the officer tracking the man from the Swedish saloon to a point on Fourteenth South, where the arrest was made. On Walker were found \$5, believed to have been taken from one saloon, and seven Blue Point cigars, similar to cigars missed from the other place.

## UTAH COPPER FIGHTING SNOW.

First Time in History of Mine That  
Tracks Have Been Blocked.

In common with all outdoor work, the operations of the Utah Copper company at Bingham, were subject to much delay and dead work, by reason of the snowstorm, and yesterday was a day spent very largely in clearing the tracks for ore hauling.

There was anywhere from three to five feet of snow to be reckoned with, and while this did not in any way retard the work of the steam shovels, which easily removed the snow from the ore, the trackage of the mine was badly covered, and occasioned much delay.

As this is the first time in the history of the company in its Bingham operations that snow has interfered

with work, no track clearing apparatus has ever been provided, and when the heavy snow fall of the past few days came, practically the only means at hand for keeping the tracks clear, lay in running the engines back and forth over them during the time the snow was falling, which while it helped, left a great deal of shoveling to be done later. The tracks are all clear now, however, and work is progressing as usual.

STOCK PRICES  
HIGHER, STRONGER

New York, Nov. 27.—Prices of stocks started higher today than on Wednesday without regard to the irregular tone of the London stock market. Union Pacific, Southern Pacific and Northwestern advanced 1/2 and Denver & Rio Grande preferred, American Locomotive and American Cotton Oil Wisconsin Central preferred declined 1/4.

Prices recovered to the top level and held there in spite of dull dealings. Chicago & Alton and Rock Island extended their gains to 1/2. Western Maryland and Northern American 2 1/2. Louisville & Nashville & Southern Railway preferred 1/2 and Denver & Rio Grande preferred, American Locomotive and American Cotton Oil Wisconsin Central preferred declined 1/4.

A large part of the limited dealings centered in the industrial, especially in the gas group. The important railroad stocks were strong and higher, but there was little demand for them outside of Reading, Union Pacific and Southern Pacific, Nashville, Chattanooga and St. Louis.

The day's advances were unimportant, and the market was quieter than for weeks. American Car preferred improved 1/4. Amalgamated Copper 1/4. Union Pacific 1/4. Northern Pacific 1/4. Great Northern preferred and American Sugar 1/4. There was fractional reaction at 2 o'clock. United States Express declined 1/4.

The market closed strong and active. There were some spot deals, especially in place of a rather general reaction when profits were taken around the room. International Paper advanced 1/4. Paper preferred declined 1/4. Prices rose again in the final dealings when U. S. Steel gained 1/4.

## LIVESTOCK.

## CHICAGO.

Omaha, Nov. 27.—Cattle—Receipts, 1,300; market slow to the lower. Western steers, 3.25@3.50; Texas steers, 3.00@3.20; cows and heifers, 1.50@1.60; calves, 5.00@5.50.

Hogs—Receipts, 6,000; market lower. Heavy, 5.00@5.25; mixed, 4.50@4.75; lights, 5.25@5.50; pigs, 3.00@3.20; bulk of sales, 5.40@5.50.

Sheep—Receipts, 1,000; market steady. Yearlings, 4.30@4.50; wethers, 4.00@4.20; ewes, 3.25@3.40; lambs, 5.40@5.60.

## WOOL.

St. Louis, Nov. 27.—Wool, Am. Territory and western mediums, 17 1/2; fine mediums, 15 1/2; fine, 12 1/2.

## PRODUCE.

Chicago, Nov. 27.—Buying by shorts caused a mild rally in the local wheat market today following slight weakness at the opening when prices were shaded to 1/4 @ 1/2 below the previous close. The early weakness was due to lower cables and to a continued movement of wheat in this country. December, which opened at 1.00 1/2 to 1.00 1/4 advanced to 1.00 1/2 in the session. Corn was easy owing to moderate sales of the May delivery by cash houses. Weather was favorable for the movement and the arrivals today were fairly liberal. December opened at 1.00 1/2 to 1.00 1/4 and for a time held within that range.

Oats were dull and steady, although sentiment was a trifle bearish. December opened at 40 to 40 1/4. Later December sold at 40 1/4 @ 40 1/2. Provisions were steady on moderate demand by pit traders based on a strong market for live hogs. Prices at the opening were 1/4 lower at 5c higher.

Close—Wheat—Dec., 1.00 1/2; May, 1.00 1/2 @ 1.00 1/4; July, 1.00 1/2.  
Corn—Nov. and Dec., 62 1/2; May, 62 1/2 @ 62 1/4; July and Sept., 62 1/2.  
Oats—Dec., 45 1/2; May, 45 1/2; July, 45 1/2.  
Pork—Dec., 14 1/2; Jan., 15 1/2; May, 15 1/2 @ 15 1/4 @ 15 1/2.  
Lard—Nov., 9 1/2; Jan., 9 1/2; May, 9 1/2 @ 9 1/4 @ 9 1/2.  
Rice—Jan., 3 1/2; May, 3 1/2.
