on the Exchange.

TESORA ALSO MUCH WEAKER

Business closed on the mining exchange this morning with the sale of 18,300 shares for \$30,719.75. The market absence of several months. Mr. Mcwas generally weaker. This tendency was very pronounced in the case of Uncle sam, Tesora and South Swansea. Uncle Sam released about 5,000 shares at prices ranging from \$2.02 at the opening to \$1.97 at the close, Tesora declined to 91%, while South Swansea fell away to 43%. Ajax was very active between \$1.50 and \$1.47%, while Dexter sold at 87. May Day opened at \$1.63 and weakened to \$1.58, while Daly-West let go 200 at \$39.75 and \$39.50, Richmond Anacanda was traded in at 25, while Tetro was handed out at 22, Martha Wmhington sold at 2, and West Morning Glory hung around 61/2.

Rumbug-South American

Supt. McKenzle of the Dexter-Tuscarora Gold mines at Tuscarora, Nev., arrived in the city yesterday after an Kenzie suys there is more ore in sight in the mines now than has ever been recorded before. The latest development at the mine is the tapping of the Tuscatora vein on the 250 level. This. was done a few days before Mr. Mc-Kenzle left The ore body had been entered a distance of 11 feet from the foot wall and a nice body of \$12 gold ore is said to be in sight. The management is cross-cutting to the hanging wall, where the highest values have heretofore been mined. Connection was made some time ago with the 150-foot level of the Tuscarora and it is said that the ore found there sweetened up the grade handled during July. Fron. the Tuscarcia vein the ore is conveyed about 1,400 feet to the Dexter shaft, where it is holsted to the surface. No special changes are reported in

No special changes are reported in the Dexter property further than the discovery of a cross fissure about 580 feet southwesterly from the shaft. The vein is said to be large and to carry

good values. At the nill good work is being done. The company is operating only one of its electric plants, that on Jack Creek, eleven miles away. This has hereto-fore given all the "juice" needed. It the mitention to start up the one on Niagana Creek owing to the shrink-again the water supply. The excessive Some of the Railroads Made Gains heat causes a very heavy evaporation. For some time past the thermometer has registered 104 in the shade. About 100 (cas of ore is being dally handled in the mill. In addition, Mr. McKenzie says the company is being very successful in its treatment of the slimes, about 25,000 tons of which are general steadiness at the outset and an on hand. It is estimated that 35 improving tendency was noted for the cent of the value of the ore is tied up in these slimes, which carry values of leading stocks. Fluctuations, however, from \$3 to \$12 per ton. In the tests last month a saving of about \$4.25 was made were narrow and business quiet. Tre steel stocks were dull but showed gains on these slimes. This month, Mr. Mc-Kenzie says, the company will handle of % and % respectively for the com-

is about \$1.10 per ton, which leaves about \$3 per ton profit. The company will shortly market a car of rich sul-phurets, which are believed to run about \$500 per ton in gold and silver. Taken as a whole, Mr. McKenzie says the mine looks better than it has for two years past and he hopes dividends are now in sight.

Dividend Day Tomorrow.

The Sliver King of Park City will distribute its regular monthly dividend of \$100,000 tomorrow. This will be followed on the 15th by the Daly-West contribution of \$52,500. The Mammoth of Tinute is also expected to fall into line later in the month with a dividend of \$20,000.

Interested in Utah Mines.

H. E. Lefevre, a mining engineer with several years' experience in South America, has reached the city from Colorado for the purpose of posting him-self on conditions in Utah's great camps. He is especially interested in the Golden Gate mill with its capacity of 1.200 tons per day, and will after ex-amining: It take in the camps of Bingham, Tintic and Park City, Mr, Lefevre is interested in a big tract of mineral land in Honduras located about T miles from the coast, which he intends short. ly to develop.

Sale of the Buckeye.

The report of James Sharp, receiver of the property of the Buckeye Mining company, was filed this morning. In the report it is stated that the notice of sale was advertised according to the court's order; that only one bid was re-ceived, that of J. A. Cunningham, of \$4,500. The receiver refused the bid believing that a better offer can be obtalne

Receiver Sharp also had the mine examined by Expert Rohlfing. The referee concludes his report by stating that the property will be sold immediately unless McCornick & Co., agrees to postpone their trustee sale He adds that in case the sale cannot be postponed or a satisfactory price obtained that he be authorized to make a loan on the property with which to redeem it so far as possible and that he also have the right to sell it at public or private sale

Visits Uncle Sam Con.

S. N. King has returned from a visit to the Humbug and Uncle Sam pro-perty with which he was much im-pressed. In the Humbug, which be-longs to the Uncle Sam Con., the mangament is upraising on a fine body f silver ore assaying anywhere from 100 to 500 ounces per ton. The ore body is said to be about 4 feet wide. The upraise is several sets above the tunnel level. A fine showing is also reported in a winze from the tunnel level.

Uncle Sam Decline.

It is stated that the decline in Un-Sam is partly due to the fact that veral investors are realizing on their Uncle Sam stock to take up Carisa, which is selling around \$1.60 as compared with \$2 or thereabouts for Uncle Sam. At least two or three of the investors in Uncle Sam are known to have done this, considering that when it comes to paying dividends the Carla will not take second place. The supplementary report to be made on the second class ores of the Spy is not completed. However, there is said a be no doubt that they can be treated profitably at the Bingham smelter. Ore Mined and Milled for 58 cents

The world's record for cheap milling of gold ore is held by the Spanish mine, near Washington, Nevada county Cal, eays the American Mining News, Dur-ing one month of the year 1829 it milled

1,442 tons of ore at a cost for labor, 1,342 tons of ore at a cost for labor, 1,33 cents: supplies, 10.6 cents; total, 17.9 cents; per ton. At the same place adalog costs 34.6 cents per ton. Total ining and milling costs 58.5 cents. This is less than one-half the mining and milling costs at the Alaska-Tread-

was given to the rise in the market by a setback in Sugar and United States Steel. Large buying orders then appeared on southwestern stocks and they advanced strongly, led by Missouri Pacific and Texas Pacific, which made gains of 1% @2% respectively. The rise in the Gould group was based on ru-mors of control of Mexican railroads. Other railroad stocks were soon benefitted by this movement and St. Paul. Atchison, Union Pacific and less proment stocks developed marked strength The United States Steel stocks continued quiet and were not very well supported, the common losing all of its opening advance, and the preferred about half. The entire market was off from the highest at 11 o'clock. Prices of the active stocks declined slowly, the losses reaching a point in Brooklyn Transit, St. Paul and some of the southwesterns and Pacifics. The steel stocks were sustained a trifle above yesterday's close. The junior Vanderbilt stocks were strengthened by a large de-

mand for the New York, Chicago & St. Louis common and second preferred, which rose 21/2 and 31/2 respectively. Bonds were quiet and firmer. Specialties were virtually at a standstill and but few stocks varied more

than a point. Buyers were reluctant at the offerings at prevailing prices and concessions were made. Union Pacific, Atchison, St. Paul and Missouri Pacific lost their earlier advances. The United States Steel stocks were neglected but fairly steady.
