MONDAY, MARCH 19, 1906. SALT LAKE CITY, UTAH.

FIFTY-SIXTH YEAR.

SIX HUNDRED MINERS CUT OFF.

Snowslides in Colorado Have Separated Them From the Outside World.

MANY THOUGHT TO BE LOST.

In Some Places the Storm Continues and it is Impossible to Obtain News.

Great Loss of Property Around Ouray, With Further Damage Threatened at Telluride, Rico and Elsewhere.

Ouray, Colo., March 19.—Six hundred miners employed in the various mines within a radius of 20 miles from Ouray, have been cut off from all communication with the outside and it is known some lives have been lost. As many as 25 mines are completely isolated. At the Camp Bird mine, which is four miles from the Camp Bird mine, a snow slide late this evening, completely isolated 50 or more miners employed and as the provision house was carried away, it is certain they are in urgent need of food.

A rescue party of 200 miners started to their rescue this morning. The body of William J. Cressey, the Englishman who lost his life in the slide at the Camp Bird mine, has been recovered. It is feared as many as 20 miners have lost their lives in the slide, but the exact number will not be known for days.

The damage may reach \$1,000,000. It is said there is a foot of snow at the high tower of the tramway of the Camp Bird, and the snow is very deep along the route of the tramway. In the Incline basin, the snow is from 150 to 300 feet deep. This will prevent work on the reconstruction of the tramway for several weeks, as nothing can be done in the deep snow. Machinery for re-building the mill and materials for the buildings can not be taken up during the present condition of the road, which will also delay the work of reconstruction. The first move at the Camp Bird mine probably will be to repair the power lines, which are all out. This will require several days and there will be no output from the mines until the line is rebuilt and in running order.

AROUND TELLURIDE.

Telluride, Colo., March 19.—A snow-slide which came down yesterday at the Liberty Bell mine, damaged the upper terminal of the tramway and considerable timber-work. It ran in the path of the noted slide of Feb. 28, 1902, which killed 15 men. The miners, remembering the terrible slide of four years ago, have been leaving the mine and coming to town today. It will be only a question of a day or two until the Liberty Bell mill will completely close down.

Another huge slide came down yesterday near the Bullion tunnel of the Liberty Bell mine, damaging the blacksmith shop and other outbuildings.

On account of the severity of the storm, which still continues, no effort was made today to remove the bodies of August Heltene, who was killed Saturday night by the slide in Bear Creek, and the telephone line to Ophir station is cut off, and the mine is in a state of danger. The mine is in a state of danger. The mine is in a state of danger.

Slides are down all along the road to Red Mountain, and the storm continues so that it is impossible to get through. A small slide came down at the Joliet tunnel last night and tore out the snow at the mouth of the tunnel and destroyed the table and blacksmith shop.

The Revenue tunnel, mine, mill and all buildings are considered to be in danger, since the snow is so deep. Potatoes come down near the dump of the mine, and an increase of snow piled up over the buildings. The Alex. Bakken Consolidated and San Pedro are all considered to be in imminent danger.

TROUBLE NEAR ALAMOSA.

Alamosa, Colo., March 19.—Not since the terrible snow slide and blockade of the winter of 1854, when the Denver & Rio Grande branch road between Alamosa and Durango was impassable for four weeks, has there been such trouble experienced in this region as at present.

No trains have arrived from Durango for seven days and every available train is being taken to the large snowdrifts on Cambridge hill. Six dead engines are stranded in the terrible snow. A snowdrift, also one of the big rotary snowplows, a rotary snowplow was sent from Salida today, pushed by three engines.

It has been snowing continuously for seven days in the mountains west and south of Alamosa and the canyons are full of snow and in many places the tops of tall trees are just visible. Coal and supplies have been sent from here to the working crews, and goods are being taken to the snow-drifts in trains on Cambridge hill, to keep the people there from starving.

STORM WIDESPREAD.

Denver, Colo., March 19.—Fair weather, with rising temperature today followed the severe storm which has prevailed over Colorado for a full week with brief intermissions. Last night here, the temperature dropped to a degree below zero, at Cheyenne, Wyo., it was 12 below.

Snow slides have already occurred in the mountains, but up to this time there has been no heavy loss of life reported. The losses from destruction of property in the vicinity of Ouray may amount to \$1,000,000, and further damage is threatened at Ouray, Telluride, Rico, Silverton, and other towns in the San Juan region in southwestern Colorado. The cut-off of the Denver & Rio Grande railroad is making life in that part of the state, which is blocked off by heavy snow on the Cummins line, very difficult. The main transcontinental train service has not been much delayed during the storm. The heavy snow fall

In the mountains assures an abundance of water for irrigation.

HEAVIEST SNOW KNOWN.

Holyoke, Colo., March 19.—The heaviest snow fall ever known in northeastern Colorado fell during March. The range covered with snow to a depth of several days and no attempt will be made to open the line until the storm ceases.

RAILROAD TRAFFIC IS VERY IRREGULAR AND HAS BEEN TOTALLY ABANDONED DURING THE WORST OF THE STORM. THE BURLINGTON LINE FROM CURTIS TO CHEYENNE HAS BEEN COVERED WITH DRIFTS FROM TWO TO SIX FEET DEEP FOR SEVERAL DAYS AND NO ATTEMPT WILL BE MADE TO OPEN THE LINE UNTIL THE STORM CEASES.

SNOW IN KANSAS.

Topoka, Kan., March 19.—The section of the country is covered with about six and one-half inches of snow on a level, which began falling Saturday afternoon and lasted for into the night. The sun is shining brightly today with the temperature about 20 degrees above.

A LITTLE WARMER.

Kansas City, March 19.—The weather today in the southwest was clear and warmer, with no snow falling.

Street car traffic at various points in Missouri and Kansas was still interrupted more or less, and many trains were late. The ground is covered with about six inches of snow on the level, which began falling Saturday afternoon and lasted for into the night. The sun is shining brightly today with the temperature about 20 degrees above.

SNOW IN ST. LOUIS.

St. Louis, March 19.—A heavy snow storm, which began last night, seriously inconvenienced traffic of all kinds today. More snow is predicted.

BIG SNOW IN ILLINOIS.

Decatur, Ill., March 19.—Twelve inches of snow fell last night. The storm was the worst here in 30 years. Street car service was interrupted, and the roads are all blocked. The snow drifted badly.

AN UNPRECEDENTED FALL.

Columbus, O., March 19.—An unprecedented fall of snow in a short time has interrupted the schedules of the street car service. Six inches of snow fell in four hours, and a drizzling rain set in, and made the street simply impassable for a time.

HEAVIEST OF THE WINTER.

Chicago, March 19.—The heaviest snow storm of the winter has been in progress here since last night. In 12 hours four inches of snow fell, and rain driven by a high wind from the northwest, it drifted badly, and made operation of street cars, particularly in the suburbs, difficult. It was only by the constant operation of snow plows that the streets in the downtown sections could be kept open for the passage of cars. Train service generally was in bad condition. Many trains were reported anywhere from 2 to 10 hours late.

AUSTRIA AND SERBIA.

Dispute Over Tariff Matters Has Finally Collapsed.

Belgrade, Serbia, March 19.—The Austro-Serbian dispute has collapsed. Orders have been issued to admit from today all Austrian merchandise into Serbia on the same conditions which prevailed before the tariff war.

Relations between Austria and Serbia have been strained for a long time past owing to the former's objections to a customs union formed between Austria and Serbia. Austria regarded as being not only adverse to her commercial interests, but as likely to lead to a league of the Balkan states which would be contrary to the political interests of Austria.

TAMMANY HALL'S PLATFORM.

New York, March 19.—Tammany hall's platform for the coming state campaign will be outlined in full by W. Bourke Cockran at tonight's meeting of the Tammany general committee. The meeting promises to be the most important held by the committee in several years, and Mr. Cockran's speech, it is declared, will be his masterpiece of political oratory. He will preface it by reading a 1,500-word resolution, defining the move to the Democratic organization will take on all public questions which have engrossed the attention of state and municipal officials.

The resolution will, it is said, report for adoption tonight the old rules of the organization with the additional provision creating a legislative committee. This is the first time in many years that the proposed legislative committee will be made up of 12 members and will maintain a permanent office. It will have a representative at Albany to analyze bills and make public reports on pending measures, with advice and comment.

WILLIS HALL TURNER DEAD.

Grand Rapids, Mich., March 19.—Willis Hall Turner, general manager of the Grand Rapids Herald, died today from paralysis with which he was stricken several days ago. He was born in 1855 in South Bend, Ind., became editor of the Jackson, Mich. Patriot, and in 1897 became manager of the Grand Rapids Evening Press. In 1897 Mr. Turner assumed the management of the Chicago Journal and became the president of the Chicago City Publishers' association. Later he published the St. Joseph Press and the Memphis Scimitar. About a year ago he returned to Grand Rapids. A widow and one son survive him.

GOV. THAYER BARELY ALIVE.

Lincoln, Neb., March 19.—John M. Thayer, ex-United States senator and ex-governor of Nebraska, was barely alive this morning and the attending physicians expressed the belief that he would not live through the day. His serious condition is attributed solely to extreme old age.

FRANCIS TO SUCCEED STORER.

Washington, March 19.—The name of Charles S. Francis of Troy, N. Y., former American minister to Austria-Hungary, to succeed William Storer, Mr. Francis was formerly ambassador to Austria.

The president today sent to the senate the nomination of Mr. Francis.

PACKERS' CASE ARGUMENTS.

Chicago, March 19.—Att. W. J. Hynes, representing Swift & Co., resumed his argument in the packers case today. He was expected to consume the greater part of the day's session.

EXPELLED FROM ODESSA.

Odessa, March 19.—A newspaper of the late Interior Minister Sialitskine and a leading candidate of the Constitutional Democrats for election to the National assembly has been expelled from Odessa.

WILL CONFIRM HOGGATT.

Washington, March 19.—The senate committee on territories authorized a favorable report on the nomination of Wilfred H. Hoggatt to be governor of Alaska.

AGITATION FOR CONCENTRATION.

Dr. Vincent Expresses Hope That Higher Education Shall be Unified in the West.

SITUATION IN THIS STATE.

Convinced That Utah Has a Chance to Avoid Inevitable Complications and Deploable Consequences.

In response to an inquiry concerning the present agitation for a concentration of the higher professional educational work by Utah under the direction of the state university, Prof. Vincent said:

"As a stranger I hesitated to seem to give unsolicited advice, but from what I know of the situation in certain states of the middle west, I am greatly interested in the proposed concentration of higher educational agencies in this state, and I sincerely hope that the proposal will carry. I am convinced that the present situation is a most unfortunate one, and that the proposed concentration of the higher professional educational work by Utah under the direction of the state university, Prof. Vincent said:

"To maintain an agricultural or engineering school in isolation from the other schools of a state university is in itself a waste of money. Each professional school, each department of the university, and each other specialized school. The very fact that it is practically impossible to define and limit the scope of separate institutions is significant. Duplication of plant and instruction is inevitable. Impairing of educational efficiency is the unavoidable consequence. Again the existence of rival schools appealing for state aid is much to be deplored. Each institution has its own friends; the legislature is divided into factions on the question; compromises, log-rolling, and the like, are sure to follow. The result is a waste of money and a degradation of the state university there is constant bickering and rivalry between two or more artificially separated, and mutually suspicious educational centers.

VALUE OF CONCENTRATION.

"A state university is the center of the whole educational system of the commonwealth, and should be in the closest relations with every primary, secondary and tertiary school. The studies of the schools should gradually lead up to the higher pursuits of the university. It is to be hoped that the legislature is divided into factions on the question; compromises, log-rolling, and the like, are sure to follow. The result is a waste of money and a degradation of the state university there is constant bickering and rivalry between two or more artificially separated, and mutually suspicious educational centers.

THE FORMER TYPE.

"It is especially true that those who are preparing for scientific agriculture should come in contact with their fellow students in other departments. This has come to be farming a scientific basis and a professional standing. So long as the farmer is held up to urban standards as an uneducated, unrefined, rustic, it will be hard to draw the best ability into the important, fundamental service of agriculture. Nothing will do more to raise the popular conception of the farmer than to make the agriculture course a regularly recognized part of the central university. The state has taken this matter up none too soon. It is to be hoped that the legislature is divided into factions on the question; compromises, log-rolling, and the like, are sure to follow. The result is a waste of money and a degradation of the state university there is constant bickering and rivalry between two or more artificially separated, and mutually suspicious educational centers.

STILL AFTER COUNCILMEN.

Attorney J. D. Sken Files Accusation Against Robert B. Paine.

(Special to the "News.") Orem, March 19.—This morning, Atty. J. D. Sken filed an accusation in Judge Howell's court, against Councilman Robert B. Paine, charging the latter with misappropriating public funds, and asking that Paine be ousted from office. The accusation sets forth the same allegations as those made in the case against President Chambers. The accusation will not be filed in the court until Saturday next and then a citation will be issued, returnable on April 3.

Thomas King was arraigned before Judge Murphy this morning on the charge of forgery. No plea was entered and the man was placed under \$500 bonds which he was unable to give.

A man giving the name of J. E. Papkin, was arrested this morning on the charge of petit larceny. The fellow confessed to breaking open a Salvation Army collection box and stealing therefrom \$1.50 and several coupons.

W. H. Wright & Sons have purchased the Z. C. M. I. corner and this morning notified the manager of the store that the building will have to be vacated by the 1st of June as it is the intention of the owners to remodel the building.

This morning Sheriff Sebring appointed Seymour Clarke as deputy to fill the vacancy caused by the appointment of Mr. Sebring to the position of sheriff. The appointment of Wallace Washburn as probation officer was also made. Both were confirmed by the county commissioners.

At the meeting of the commissioners today, the board of health reported that there were only two cases of contagious diseases in the entire county, and that health conditions were exceptionally good.

County Treasurer Chambers reported that he had received \$21.58 for quit claim deeds and that the amount had been distributed to the various funds.

LION HOUSE JUBILEE CELEBRATION.

Anniversary of Susa Young Gates' Fiftieth Year Fittingly Observed.

NIGHT OF REMINISCENCES.

President Smith and Other Guests Revive Memories of Half a Century Ago.

A flood of tender memories to the old and middle aged, a wealth of absorbing experience to the young—such were the reminiscences aroused at the Lion House celebration on Saturday night.

The historical mansion (the home of President Brigham Young for so many years) and the first child born within its walls, Susa Young Gates, together reached their jubilee on March 18. Fifty years ago saw the house completed, and the same day saw a little stranger take up her abode under its roof. The date falling on Sunday this year, it was decided to celebrate it a day in advance. The house on Saturday night from far and near, came many of the surviving friends of the great "Mormon" leader, and the associates and relatives of his daughter, to do honor to the event. From 250 to 300 people thronged the rooms fitted up for the festivities. The large assembly room, the famous parlor of the old day, a large room, was crowded with guests of bygone days, most of them personal belongings of the Prophet Joseph, President Young or other leaders. The house on Saturday night from far and near, came many of the surviving friends of the great "Mormon" leader, and the associates and relatives of his daughter, to do honor to the event. From 250 to 300 people thronged the rooms fitted up for the festivities. From 250 to 300 people thronged the rooms fitted up for the festivities. The large assembly room, the famous parlor of the old day, a large room, was crowded with guests of bygone days, most of them personal belongings of the Prophet Joseph, President Young or other leaders.

Upon recommendation of Constable J. M. Wood of Murray precinct, the commissioners today appointed A. W. Brown as deputy constable in that precinct.

Unprecedented Activity at Factories and on Railroads.

Geo. T. Odell has returned from a brief visit to the east. He reports the snowfall between Chicago and Utah as something tremendous.

Regarding the business outlook in the east he says the year was going to be one of extreme activity and it would only be a question of getting the goods and the cur in which to transport them. In all his experience he never saw so many indications of a congested market at both factories and railroads, and the western merchants who had not put in their orders early, would be at a loss.

Mr. Odell states that Geo. A. Snow and his associates with his engineers would arrive in Salt Lake this afternoon. He met them in Chicago in route to the state to begin active operations on their great enterprise. The work would be prosecuted without delay.

OFFICIALLY NOTIFIED.

Gov. Cutler Sends Communication Accepting Col. Geoghegan's Resignation.

Gov. John C. Cutler today officially notified Col. Joseph Geoghegan of the acceptance of the latter's resignation as acting adjutant general of the National Guard of Utah. The communication expressed deep regret over Col. Geoghegan's retirement from the guard and assured him that he would have the highest respect of every officer and member of the organization.

HULANISKI A CANDIDATE.

Weber County Attorney Will Run for Supreme Judge.

In a communication to a personal friend in this city, E. T. Hulaniski, county attorney of Weber county, has announced his candidacy for the nomination for supreme judge before the next Republican state convention. Mr. Hulaniski contends that the north and of the state is entitled to a judge on the supreme bench, and his activity in behalf of the Republican party in the past should entitle him to recognition.

PROF. CARROLL COMING.

Will be Guest of the Utah Archaeological Association.

Prof. Mitchell Carroll, head of the department of archaeology of the George Washington university, at Washington, D. C., will be a visitor in Salt Lake during this week.

He comes here as the guest of the Utah Archaeological association, of which Frank Pierce is president, and will lecture Thursday evening at the Packard Free library building on "The Athenian Acropolis." The local association hopes that an interest will be stirred up in Utah archaeology by the visit, and that steps will follow looking to the preservation of the remains of southern Utah from the dissolving hands of museum collectors, who have already entered from southern Colorado and removed in caravans some of the most valuable relics of the cliff and cave dwellers.

Wednesday evening Prof. Byron Cummings of the University is arranging a reception for Prof. Carroll at the University club, at which the Utah association will be the hosts.

COMPANY INCORPORATED.

Involves the Transfer of Property Valued at \$28,000.

The Pharaoh's Glen company incorporated today, and this incorporation involves a transfer to the company from Dr. J. Milliron and others

MEETING OF THE COMMISSIONERS.

County Authorities Receive Communication With Reference To Sewer System.

ONE FOR BINGHAM CANYON.

Secretary Beatty Says it Will Have to Be Installed From the Highland Boy Mine.

The county commissioners today received notice from Secretary Beatty of the state board of health relative to the action of the board in regard to a sewer system for Bingham canyon. In order to improve the sanitary conditions of the town the board has demanded that a sewer system be installed which must be completed on or before June 1 of this year. The secretary has notified the commissioners that they will have to install the system from the Highland Boy mine to the limits of the town of Bingham and the town will have to supply the system within its limits. The resolution passed by the board last night October 10th, in order to improve the sanitary conditions of the town the board has demanded that a sewer system be installed which must be completed on or before June 1 of this year. The secretary has notified the commissioners that they will have to install the system from the Highland Boy mine to the limits of the town of Bingham and the town will have to supply the system within its limits.
