### MAY DAY OUT IN BIG BUNCHES.

This Tintic Stock Proved to be The Star Attraction During Today's Early Calls.

#### NEW YORK BONANZA HIGHER.

Other Park City Favorites Slightly Weaker-Wabash Comes Out -Closing Quetations.

It looked a little bit like old times for a little while during the early calls of the Sat Lake Stock & Mining Exchange. There was a big demand for May Day and notwithstanding several brokers had a big list of selling orders on hand and were handed out in large bunches the buying crowd seemed ready to take about everything that came along. Altogether 12,500 shares transfered, and on the curb some active bidding was on the curb some active bidding was findulged in at 25½ cents. There was no signs of weakness at the close. A single block of Grand Central came out at \$3.10. New York Bonanza opened in good order and was driven up to 54 cents, when there was a slight relaxation. Tetro, to the extent of 1,000 shares, was bought at 19½ cents, while 400 shares of Wabash was induced to come out at \$1.55. Other Park City stocks, Daly, Daly-Judge, and Daly-West displayed some weakness; particularly the latter. ularly the latter.

An Unusual Trip of a Party of Colora-

do and Idaho Capitalists. Special Correspondence.

Special Correspondence.

Pinedale, Wyo., March 27.—The unusual trip of a party of Colorade and Idaho capitalists through the Teton and Gros Ventre ranges of mountains in the dead of winter to this section has aroused considerable excitement here.

A Mr. McIntosh of Denver, J. Lindsey of Idaho Falis, and McShane of Pocatallo were in the party. They were six tello were in the party. They were six weeks coming from Idaho Falls and suffered many hardships, when they could have come in from the south in less than a week.

It is reported here that the capitalists

It is reported here that the capitalists have located a big ledge of very valuable gold-bearing rock, and wished to come in and file their claims before the rush set in in the spring.

A prospector came from the upper country last fall with specimens of fabulously rich rock, and it is presumed that the capitalists have learned of the whereabouts of the mother deposit. It is said the rock ran as high as \$20,000 in gold to the ton. People here are in gold to the ton. People here are watching the capitalists and anxiously awaiting some reliable information as to the objects of their visit.

NEVADA ORE SHIPMENTS. Tonopah Reffrond Handled 1791 Tons Last Week.

The ore shipments over the Tonopah railroad this week aggregated 1791 tons, of which 113 tons came from Goldfield. The shipments are divided as follows: From Tonopah—Tonopah Company, 989 tons; Tonopah Extension, 216 tons; Montana Tonopah, 306 tons; Midway, 44 tons. From Goldfield—Combination 32 tons; Goldfield Sampling Works, 81 tons. From Reveille district—Southern Nevada Mines company, 29 tons. General Manager Calvin of the Southern Pacific company and his party visited Tonopah last week to take a personal view of the traffic situation. As a result of his investigations the blockade has been raised, and freight is now being received at San Francisco for Tonopah and Goldfield.—Miner. The ore shipments over the Tonopah

LATE BULLFROG STRIKE. The Best Yet Made in the Great Bull-

frog Mine. The news from the Bullfrog district be of a most encouraging, nsational character. An-rike on the Bullfrog Mincontinues

r company's property occurred on lesday, when an entirely new ledge was incovered at a point high up on the mountain, fully 500 feet above the working shaft, says the Tonopah Miner. The foreman telephoned yester-day to General Manager Clark, who is now in Tonopah, that it is the greatest strike ever made on the property, and this statement is corroborated by sev-eral persons who have just returned from Bullfrog. The Bullfrog National bank, which adjoins the Bullfrog

bank, which adjoins the Bullirog ground, has uncovered the new ledge immediately across the line.

Another rich strike is also reported on the Montgomery-Edwards property on Montgomery mountain, but the particulars cannot be obtained at this writing. It was reported vesterday writing. It was reported yesterday that Edwards had sold his half interest to Montgomery for \$100,000. The de-tails of the transaction have not yet come to hand.

THE EMPIRE CON.

D. F. Walker Jr. Has Been Chosen Vice President of Company.

At a meeting of the directors of the Empire Consolidated Mining & Smelting company, with properties at Freiberg, Nevada, yesterday afternoon the resignation of George H. Horne, as a director was accepted, and D. F. Walker, Jr., of this city, was chosen to succeed him. Mr. Walker was also made vice president of the company.

Secretary Beveridge's said during the

Secretary Beveridge's said during the day that excellent reports are being received from camp. In the Reward shaft, a 30-inch streak of grey carbonate ore has been cut into, which assays 25 per cent lead and 20 ounces silver.

GETTING SOME ORE. Pace of South Columbus Tunnel Is Look ing Good

Conditions are making good at the South Columbus property at Alta and if the present management does not make a mine out of it during the present year, it will be because the geological construction of the country cannot be relied on. But there is no indication that the usual rules will not apply.

apply, Manager Jacobson, who has returned manager Jacobson, who has returned from a trip to camp says several small seams of high grade ore have been cut during the past week and everything points that the face of the tunnel is pretty close to the main ore body. The ground is breaking well and good progress is being made.

### The Boston Consolidated.

The Boston Consolidated.

"General Manager Duncan McVichle of the Bingham Consolidated Mining & Smelting company is now in Boston to attend a meeting of the directors, to be held today says a Boston publication. The business to be transacted will be largely of a routine character, although it is quite possible that the dividend question may receive informal conideration. It can be said, however, upon excellent authority, that nothing in the way of a distribution will be made at present, although a dividend is practically assured before the end of the current year—possibly in the summer or early fall, The company has sold its copper well up to date, at a price above 15 cents, and the contracts therefor, which have been made through the United Metals Selling company, amount to approximately \$800,000. pany, amount to approximately \$800,000. Financially, the company was never in

Financially, the company was never in better shape than it is at present, and it could easily make a dividend payment if the same was deemed advisable. It is quite possible that a statement of some sort will be issued to the shareholders at an early date.

"Since Mr. McVichie's arrival in Boston advices have been received that the ore body in the tunnel under the Lark mine has been encountered and is opening up very rich. Mr. McVichie further says that the Dalton & Lark mines are showing improvement with depth, and that if the same continues the Bingham properties are sure to nining a value fully equal to that of the Centennial-Eureka property, which at Centennial-Eureka property, which at present is said to easily show a value of between \$5,000,000 and \$6,000,000.

TEA

The modestest thing in the world is tea. It is only tea!

# CAVE IS SERIOUS.

Famous Old Silver Mine at Park City Rapidly Filling With Water.

### THE BALY-WEST IN DANCER.

Alse the Silver King-Heroic Efforts Being Made to Open Great Adit Again.

The cave in the Ontario drain tunnel at Park City has assumed a serious aspect and there is no telling what damage is likely to be done because of it. The Ontario mine and mill are closed and the mine is rapidly filling up with water-at the rate, it is said, of about 5,000 gallens per minute.

The "News" was in communication with Supt. Roood shortly after noon today and from him it was learned that there is no change in the situation from yesterday but heroic efforts are being made to open the closed channel, although it is realized the work is exremely dangerous; yet every precaution is being taken to prevent any loss of life. Just what levels the flooded, Mr. Rood was unable to say as no one had been down in the shaft, all energy being displayed in the opening of the

As soon as the cave in was discovered Foreman Connelly on last Sunday di-rected the bulkheading of the shaft. This was accomplished before the waters had backed up with the volume

o interfere. The purpose of the bulkhead was to relieve the pressure against the ob-struction down the tunnel and prevent a sudden breaking away of the im-prisoned waters, the consequence of which would be the devastation of many ranches and farms in the valley below.

The extent of the cave cannot be de-termined but that if is enormous there s not the slightest doubt, as the ground is of a character likely to cause a great deal of trouble.

In Park City today the situation is viewed with intense alarm, as it may cause the closing down of other mines in the camp, or, at least, a vast curtailing of production.

The lower levels of the Daly-West where the principal extraction is coming from at the present time are likely.

where the principal extraction is coming from at the present time, are likely to become flooded; but General Manager Ernest Bamberger has hopes of the avenue being cleared before any such disaster occurs. It will probably take several days for the water to raise to the point where it would drive out the miners; but the present outlook is anything but encouraging. The market for the stock was visibly effected today, both here and in the east. The Silver King is also in danger of flooding on the lower levels. As to the work going on in the Daly mine, it will not be interfered with, as it is being carried on in a part of the mine where the water is not likely to reach.

the water is not likely to reach.

The cave occurred at a point where much difficulty was encountered while the tunnel was under construction. The present pumping facilities of the Ontario are inadequate to handle volume of water coming into the so there is no way to prevent the flood-ing of the underground workings, ex-cept by removing the barrier in the

### DAILY GRAIN LETTER.

Messrs. Logan & Bryan of Chicago telegraph their local correspondents, James A. Pollock & Co., over their pri-vate wire, on the grain and provision situation, as follows:

Chicago, March 29.—Wheat-For a time the market held very firm in the face of the extreme weakness in the corn pit but finally gave way under an avalanche of selling pressure. The deferred futures have had a long continued break Each are selling at substanued break. Both are selling at substantial discounts under the Liverpool prices. The weather is still a dominating factor and aside from somewhat lower temperatures gives no evidence of lower temperatures gives no evidence of anything alarming in that direction. The rally from the low point seemed to suggest that the market was approaching the point of an oversold condition. Trade is still nervous and very much unsettled, but a covering movement on the part of leading bears desiring to take their profits, or caused by an unfavorable turn in the weather could easily bring about a sharp rally in this market.

Corn-Big and little bulls let go their corn—Big and little bulls let go their lines today, and while the close showed quite a respectable rally from the low point, the market was very nervous and unsettied. The large receiptg and continued slow cash markets seem to be telling against the corn market. We feel the present slow cash demand must improve vastly to being about sustained. mprove vastly to bring about sustained

higher prices.
Oats-Liquidation continued in today's market, bringing new low prices. Trade was on an enormous scale. Undoubtedly the extreme weakness in comwas responsible in part, but cash markets showed no indication of doing better, with stock piling up. We feel the cash department must show better form before any sustained improvement can take place in the speculative market.
Provisions—This market in a measure took part in the general decline of

other pits, subsequently reacting and closing practically unchanged. Condi-tions as we view them are unchanged. Aside from a possible speculative rally we see no immediate prospect for improvement.

### WESTERN MARKET LETTER

Kansas City, Mo., March 27,—Cattle receipts and demand was very well matched last week, and market closed higher on cows and heifers. Not ver many western fed steers were received, one drove sold at \$5.50, against an ex-treme top of \$5.65 for natives. Fed western helfers sold up to \$4.50, and bulk of steers and cows and helfers sold within a dollar of these figures. Sev-eral trains of Mountain stockers and feeders came in during the week and sold strong as well bred mountain cattle stand par excellence among feeders in the corn belt. The colors are good generally, and just now cattle coming from these sections are in good flesh. These cattle sold last week from \$4.25 to \$4.50, from 780 to 1,050 pounds. The run of cattle this morning is 9,000 head, market steady to 10 cents higher, stockers and feeders showing least strength ers and feeders showing least strength.
For one thing, the proportion of stockers and feeders is very large today.
This is a surprise, as the near approach of grass naturally tends to hold them back. The only thing that draws out is the very attractive prices now ruling. The demand is such, however, that a heavy business will be done in stock and feeding cattle in the next few weeks, without any reduction in the present remunerative prices, to sellers.

Lambs and yearlings sold a quarter higher last week, ewes and wethers also some higher, but prices on the latter were not fairly tested during the week. Receipts were less than 15,000 all week, and buyers had to hurry to even partly satisfy their wants. Today the sitly satisfy their wants. Today the sit-uation is altogether changed, and 13,000 head are here, yearlings and lambs 10c. lower, sheep steady. Bulk of the stuff today is from the Arkansas valey, and the big run is only temporary. The the big run is only temporary sheep producing territory tributary to Kansas City just now is limited, and no heavy receipts are expected at any market, until the advent of grass sheep from the south, still more than a month away. Good rains in Texas this spring, and a relatively heavy marketing from there will, of course, put a different face on the market after a month or so. Lambs now sell at \$6.75 to \$7.40, top today \$7.35, yearlings \$6.00 to \$6.59, wethers \$5.40 to \$5.55, ewes \$4.85 to \$5.60.

### EVADA'S GOLD CAMP

Tonapah and Goldfield Richest in the World.

Tonopah and Goldfield, Nevada, are Tonopah and Goldfield, Nevada, are undoubtedly two of the richest mining camps in the world. Over \$7,300,000 worth of ore has been shipped from one mine alone within the last year or so, the ore going from \$100 to \$300 a ton with vast quantities in sight. The wonderful richness of ore in developed properties, and the assurance that the entire surrounding region is "full of the contraction of the surrounding region is "full of the contraction of the surrounding region is "full of the contraction of the properties, and the assurance that the entire surrounding region is "full of mineral," offers the greatest of inducements to miners and investors. Tonopah now has a population of over 5,000 and is growing rapidly, while the towns in the Goldfield district have nearly 8,000 people. All branches of business are represented in these towns, and prices are not exorbitant. The Tonopah railway now gives regular service to both camps, and travelis no longer a matter of extreme diffi. no longer a matter of extreme diffi-

ported late yesterday were reported as follows: Crude ore and concentrates \$55,000; base bullion, \$29,700; gold bullion, \$6,700.

Supt. Page of the Red Elephant mine of Hailey, Ida., is down from the north to confer with Manager W. V. Rice. The tunnel now being driven has reached the length of \$30 feet.

Managing Director A. F. Holden of the United States Mining company arrived in the city yesterday afternoon. He was accompanied by F. W. Baker, president of the Venture company of England, who comes to look into the methods employed in the operation of mines in Utah camps, Mr. Holden stated during the day that spiendid pro-

### **SPECULATORS** WERE AT SEA.

Strong Opening of the Stocks and Heavy Purchases Were Bewildering to Them.

#### OFFERINGS WERE VERY HEAVY.

Well Taken and While Affecting the Market to Some Extent it Soon Harnened.

New York, March 29.-Opening prices in the stock market today were well above the previous close. This was particularly noticeable in the Pennsylvania group, and the western stocks. Purchases of many of the representative leaders were in blocks of a thousand shares or more Northwestern advanced 2 points and Canadian Pacific, Union Pacific, New York Central, Sugar and Amalgamated Copper to 14. Speculative operators were wildered by the action of the market. After the strong opening heavy offerings came from all quarters and St. Paul, Baltimore & Ohio, Missouri Pacific, Ontario & Western and Rock Island declared a fraction under yesterday's closing. Exensive buying was begun at the lower ange and the market rose rapidly again,

range and the market rose rapidly again, eclipsing the opening figures. Pennsylvania and Union Pacific were taken in enormous blocks and the general inquiry seemed urgent. St. Paul, Pennsylvania and Southern Pacific were added to the earlier gains of a point or more. Lack, awanna jumped 6½. Realizing began at 11 o'clock and the market became quet. Active bidding for Canadian Pacific and its controlled stocks caused a rise of 1½ in Canadian Pacific, 2½ in Duluth, South Shore and Atlantic, 4 in Minneapolis, St. Paul & Sault Ste Marle, and 2½ in the preferred. This demonstration was ignored by the general market, which sold off steadily on an increasing volume of offerings. The Canadian group then reacted. Sharp pressure against Tennessee Ceal, which lowered it almost 2 points and the maintenance of a stiff 4 per cent call money rate contributed to the depressing factors. The morning's advance in a few stocks was wiped out, but the general market retained a fraction of the rise.

Bonds were slightly irregular at noon.

general market retained a fraction of the rise.

Bonds were slightly irregular at noon. The pressure was not continued and the market hardened slowly. Union Pacific got back to its highest and United States Steel and Reading sold a trific above their best prices of the forenoon.

The failure of call money to show any flurry encouraged buying strongly. Union Pacific advanced an extreme 2%. New York Central 2%, Delaware & Hudson 24, St. Paul 2. Canadian Pacific 1% and Pennsylvania 1%. Gains of 1 to 1% were fairly general. There was a buoyant rise of 4% in Wabash debenture B. bonds on large transactions. Profit taking checked the rise. United States Express fell 5%. The closing was irregular and rather dull. Continued hardening of prices carried the average higher than before. The United States stocks, Reading, Erie, Ontario & Western and Atchlson got a point over last night for the first time. Union Pacific extended its rise to about 2. Close: Money on call strong, 3½47 per cent, closing bid, 3½; offered at 4 per cent. Time loans, firm: 60 and 90 days and six months, 3½ per cent.
