## MINING, BUSINESS AND STOCKS.

## FIGURES AND FACTS ON YERINGTON MINES

J. J. Beatty Writes Interesting Story Of Condition of Properties in Mason Mining District.

Some interesting figures and facts relative to the mining properties of Yerington in the Mason mining district, Nevada, are given by J. J. Beatty, who with Heber M. Wells, W. Mont. Ferry and a number of others, in interested in properties and leases in the district. The following account of the district by Mr. Beatty appeared in the Yerington Times:

Reasons why Verlagton stocks are a

of the district by Mr. Beatty appeared in the Yerington Times:

Reasons why Yerington stocks are a bargain and should be bought at present prices and much higher. The Mason Valley has as much ore in sight as the Calumel & Arizona had when it sold in the open market at the rate of \$20,000,000 for its outstanding stock.

Many mines are today selling at 10 times the price of Western Nevada, and their ore reserves would fall short of the reserves in this mine if they were closely examined. This company has crosscut 150 feet of ore on the 300-foot level and is now crosscutting the same ore body on the 400, with strong indications of breaking into it on the 500-foot level. 500-foot level.

500-foot level.

The apex of this ore body was also cut on the 200-foot level. I will assume for example, that this body is 100 feet wide by 200 feet long by 200 feet deep and allow 10 cubic feet to the ton, which is ample, and the result is 400,000 tons of ore; allowing 80 pounds of copper to the ton, and 12 cents per pound for copper, the gross value of this deposit would be \$3,840,000.

NEVADA-DOUGLAS BONDS. The Nevada-Douglas, 6 per cent convertible bonds are an exceptional first class investment. It has already been made public by eminent engineers, the value of the ore blocked out in this With smelter and railroad facilmine. With smelter and rallroad facilities, this company can produce 500 tons per day of 5 per cent ore. Figure this output at 5 cents per pound net, which is conservative, the annual earnings will be \$912,500. Therefore, the entire bond issue can be liquidated, and a surplus fund of \$300,000 created in one year. This rate of production can be kept up for several years from the present openings.

present openings,
The gypsum deposits owned by this company are estimated, by the same engineers, at 20,000,000 tons. Cut it down to 15,000,000 tons, and this product alone, worked on a moderate scale, at \$2 a ton profit, can be made to return the company \$250,000 a year net, for

60 years.

And Morningstar City forms the footstool for those vast treasure vaults; and this is not all, the Nevada Bonard was main workings and Copper company's main workings are right at the east end of Main street and the Yerington Central, with its ore reserves lays 2,000 feet further east. This company also owns gypsum deposits of vast importance.

WILL BUILD MORNINGSTAR.

WILL BUILD MORNINGSTAR.

The Nevada Queen, will also be a great factor in the upbuilding of this metropolis (Morningstar) by the development of its large mineral area.

The four last named properties are termed (by the writer) the Bonanza Circle of the west slope, from the fact, that, by circumseribing a semi-circle; using a 1½ mile radius and using the east end of Main street for the hub which is close to the Nevada Bonanza main shaft, you have well within the bounds of this semi-circle all of the mines thus referred to; the Nevada bounds of this semi-circle all of the mines thus referred to; the Nevada-Douglas forming the south triangle and the Nevada Queen forming the north triangle of the semi-circle, and the Yerington Central and Nevada Bonanza almost forming a rectangular tract through its center.

react through its center.

Keep your eye on Morningstar City, also on developments in the Bonanza circle: the Nevada-Louglas is a wonderful mine; to this company is due a great deal of credit for their indomitable perserverance in financing and developing their property during the anie perserverance in financing and developing their property during the financial stringency, that prevailed, the country over, since 1907. This district (Moringstar) is going to have a ralligory for this indispensible improvement is also due to the Nevada-Douglas company.

HAVE STRONG MEN.

Investigate the personnel of the di-rectorate of the different companies operating within the Bonanzo circle, and you will find that they are all men of unquestionable character; men men of unquestionable character; men who have made a success in private matters and are thoroughly capable of handling the affairs of the corporation. Something will be heard from, at least, one of these properties, in the near future. Don't overlook it, and say in a year hence, "If I had only bought so in so, look what I would have made." The opportunity is open for every investor to make money in this district.

# MAKE NEW REGORD

Scranton Mine is Again on Shipping List-Output of District for Week Reaches 235 Cars of Ore.

Again the Tintle district of Utah has nade a record shipment of ore, but unike most mining districts, but little is ever sald. Bingham, Ely, Bisbee and other camps look like a toadstool to a other camps look like a toadstool to a temple, but when it comes to values the camp can held its own with any of them. The latest big shipment for the Tintic district was for the week ending Friday night, July 23, when 235 carloads of ore went out of the district during the week. This means that a tonnage in the neighborhood of i,640 tops were shipped or 15,280,000 pounds. The Tonopah district generally ships in the neighborhood of 5,600 tons of ore a week of an estimated value of \$145,000, while the estimated value of the Tintic while the estimated value of the Tintic ores for the shipment during the past week was in the neighborhood of bet-

week was in the neighborhood of better than \$250,000. The record week from the famous Cobalt district, which is another lead-silver camp, was for the week ending July 5. when from the 11 mines of the district 104 cars of ore were shipped carrying 6,475,257 pounds or 3,237.63 tons. During the same week Tintic shipped 213 cars of ore, which was about 5,500 tons of ore.

The July record of the Tintic camp will beat anything that has ever been known there before. It is believed that over 30,000 tons of ore will be taken out of the district for the month.

of the district for the month. of the district for the month.

There is one new shipper on the Tintic list this week and that is the Scranton, in North Tintic, which has been idle for some time. It is again sending out the ore at the rat of four carloads a week. The Uncle Sam company now has its shipping capacity up to a car a day or seven cars a week.

## CROPS WILL BEAT PREVIOUS RECORDS

New York, July 23 .- R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say:

With the disturbing tariff questions soon to be out of the way and with crops that give promise of satisfactory dimensions and an aggregate value hundreds of millions of dollars in excess of the best previous record, business confidence is developing rapidly, although it is noticeable that enterprise is not yet outrunning conservatism in buying for the distant future.

Prices continus to advance in several branches of the iron and steel trade.

Exports of cotton goods thus far this year are more than double those of With the disturbing tariff questions year are more than double those of last year.

Tanners are more encouraged over the prospect for free hides in the tariff bill, and are consequently more disposed to hold off from buying. Domestic hides, though quiet, are unchanged in price, and a further advance has been scored in foreign dry hides. Leather is quiet, owing to buyers holding off until they have secured more orders for shoes. Prices, however, are very strong and decreased receipts offset the diminished demand. Trade in snoes continues quiet, and some of the factories are partly idle in their cutting rooms, having insufficient new business to keep them fully employed. Tanners are more encouraged over

EXCURSION TO CANADA.

Round trip from Salt Lake to Lethbridge, \$33.85 from Salt Lake to Lethoridge, \$33.30, to Stirling, \$32.80; to Raymond, \$33.20; to Magrath, \$33.85; to Cardston, \$35.25; to Spring Coulee, \$34.40. Proportionately low rates from other stations. Tickets good until September 15th. Excursion train will leave Salt Lake at 2:25 p. m., August 4th.

## MARKET STILL IN WAITING MOOD

Speculation Halts to See What Will be Result of Settlement Of Tariff Questión.

MONEY RATES SOME HIGHER

Today's Transactions Showed Some Hesitation-Close Was Easy And Lifeless.

New York. July 24.-United States Steel and Union Pacific have dicided the dominant influence on the stock market during the week, with varying effect towards strength and reaction. United States Steel has receded on the glowing bellef that the dividend would remain unchanged at the divectors' meeting next Tuesday. The approach of the conclusion of the tariff revision tends to hait the speculation, to see what response may follow from the general outside speculative demand. How far the speculative demand until now has been in anticipation of a strong stock market after the passage of the tariff bill, is a question that can be answered only the future action of the market. Time money rates worked higher and weak with the large outgo of gold to Souta America and the expectation of growing demand for money.

The opening price nevement in stock today showed some hesitation in the mixture of small galas and losses and the light volume of business. With the exception of a rise of 1½ in Erie second preferred there was no change greter than a half. The speculative contest seemed to enter in the Harriman Pacifics. First Southern Pacific was depressed a point and later Union Pacific rose a point to its previous record price off 198½. The sympathetic response to both movements was singgish. New York Central and Minneapolis, St. Paul & Salte Ste Marie rose in the market closed casy and lifeless. belief that the dividend would remain

PRODUCE.

Chicago. July 24.—The declining tendency of wheat was still unchecked at the opening of trade today. July showing a further loss of 5% to 1%. The more distant deliveries also were weak. The fresh slump was due to bearish foreign advices and to continued ideal conditions in this country for harvesting and moving the new crop. Opening prices were unchanged to 1% lower, July being at 1.09% to 1.10% and September at 1.06% to 1.06% after touching, 1.07%.

tember sold off to 1.06½ after touching, 1.07%.

Renewed purchases by leading interests caused considerable strength in corn at the start. Part of the demand was based on talk of dry weather in the southern states. Opening quotations were unchanged to ½ ½ higher with July at 72½ to 72 and September at 67% to 68%. Later July advanced to 73½, while September sold up to 68½.

Oats were strong. The strength of corn was a bullish influence. July opened unchanged at 45½ and sold up to 45%. September, which opened a shade lower to a shade higher at 40% to 40½, advanced to 41.

September, which opened a shade vanced to 41.

Trade in provisions was extinmely Mistless and the market was about steady early in the day. Prices at the start were 2½c. higher to 5c. lower.

Wheat-Prospects of local arrival agregating between 500 and 600 carloads for Monday, caused additional declines during the final hair of the day. There was a little rally from the low point on covering by shorts but the close was weak with July off 3½ at 1.07%. September was down 1¼6% at 1.05% @\$\frac{3}{2}\text{ at 1.07% September was down 1¼6% at 1.05% @\$\frac{3}{2}\text{ at 1.07% September was down 1¼6% at 1.05% @\$\frac{3}{2}\text{ at 7.1% and September up 5% at 55% @\$\frac{3}{2}\text{ at 7.1% and September up 5% at \$\frac{3}{2}\text{ at 7.1% an

Coffee—Steady, No. 7 Rlo, 7%; No. 4 Santos, 9.

There is more Catarrh in this section of the country than all other diseases put together, and until the hast few years was supposed to be incurable. For a great many years dectors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a tenspoonful. Its acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure, Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, Ohio.

The above cut represents the Stewart apartments as they will appear when finished. They are being built at the corner of First avenue and C streets at a cost of about \$65,000. George S. Walker is the architect. The building will have 21 apartments, all of which will be finished in the most modern style, with hardwood floors. Hyrum Stewart, the owner, is building the apatrments as an investment, and the choice location should make them very popular.

You certainly ought to use one of

#### "Hot Point" Pacific Electric Flatirons

and be up-to-date. You can iron in comfort with the "HOT POINT" iron during the hottest weather because the temperature of the room is not raised a single degree. We could write pages in telling you of the merits of our "HOT POINT" frons, but the best way to know of them is to try

We will be glad to have you do it at our expense. Just 'phone our

Commercial Department and we will send you an iron on 30 days' free trial. We know you will like it, and will want to buy it at our special price of \$4.00. Order one now.

DO BE COMFORTABLE

Why trod back and forth from stove to ironing board?
Why iron in a sweltering room?
In other words, why put up with the old fashioned methods of ironing?
They were good enough for mother becauses there were the best in vogue
But they are not good enough for you.
