### DESERET EVENING NEWS: THURSDAY, JANUARY 24, 1901.

The undermuslins cover the counters of practically all the aisles in the Ready=to=Wear store. And what a beautiful sight it is. Snowy white, desirable garments, and what remarkably small prices. Excellency of fabric, neat finishing and a dainty style to every piece. Not a garment here that was not made in a factory of highest reputation for worthy muslin underwear. The collection is still tremendous and in complete variety; but don't delay coming beyond tomorrow or Saturday.

THE SMALL PRICES ARE PROVING WONDERFULLY ATTRACTIVE.

uiry is being made just now regarding several of the old producers, which in carly days produced many thousands. The inquiries are largely from men in the East who are evidently casting about for mining properties having the assurance that the new railroad will open up the country around Pioche. Mr. Godbe has tied up the immense tailings dumps of early days from which he ex. bects to secure a great deal of money if the railroad project does not fall to the ground. He recalls the time many years ago when the grade was built for another railroad but nothing came of it. He hopes, however, for better things

CARISA DEVELOPEMENT.

the 150 Level.

from the present project. Mr. Godbe says that Robert T. Harrison of Los Angeles county, Cal., is building a quartz mill about two miles west of Ploche. Mr. Harrison owns the Half Moon and Abe Lincoln groups of mines, which carry gold, silver and lead, the principal values being in the yellow

level.

### The Ore Body is Large and Strong on A 60-horse power holst with com-pressor and Burleigh drills is to be installed at the property of the Stock-Manager H. E. Cary of the Carisa and Spy mines, which are owned by him-self and another gentleman, reports conton Gold Mining and Milling company's property at Stockton. With this equipment the company will sink from the ditions to be very encouraging at the present depth to the water level. present time. The ore chute on the 150 level is not quite as rich as it was on

Mr. George K. Fischer will leave on the 100 level, but there is more ore in sight. The ore body appears to be going down strong and within a week Mr. Cary hopes to catch in one the 250 level. Saturday for the Santa Rita copper mine, N. M., which is owned by the Standard Oil crowd. From the e Mr Fischer expects to go to Old Mexico If it proves as strong at that depth as it is above it is probable that the dou-ble compartment shaft, on which work ceased at the depth of 70 feet, will be pushed down as the management is unon a two months' trip, combining business with pleasure.

Weakness of Steel Car Permeated Everything, Causing Many Declines.

### General Selling Was Urgent and Support Apparently Was Withdrawn Everywhere,

New York, Jan. 24.-Wall Street:

Trading at the opening was rather

quiet and changes were, for the most

part, narrow and divided between gains

and losses. The reduction of the divi-

dend rate on Steel Car resulted in a de-

cline of 3 points in the stock and Fed-

eral Steel and St. Paul lost 2 points

each. This weakness permeated the en-

tire market and losses averaged a point

in ten leading stocks. A renewed out-

break of liquidation uncovered many

slimly margined in accounts and weak

spote developed. St. Paul's maximum

loss was 4 points and Baltimore & Ohio,

Oil preferred, Northern Pacific, Brook-

lyn Transit and the active steel stocks

2 to 3. The general selling was urgent

and support apparently withdrawn

everywhere. Purchases by the shorts rallied some of the leading stocks sharply but as soon as this demand ceased the market became intensely

Room traders attempted to make a turn against the bears by bidding up

St. Paul 1% and Northern Pacific, Brooklyn Transit and Steel and Wire

about a point. But the buying was very small in the advance and prices

stipped back. The closing was dull and heavy at about the low point.

Bonds were quiet and irregular.

CLOSING STOCKS.

New York, Jan. 24.-Closing stocks:

Tin Plate, 59; American Tin Plate pre-

full and re-actionary in spots.

### of the Property.

Eureka, Jan. 23 .- No new develop ments have been reported at the Little Chief mine this week. Rumors have been in circulation to the effect that the recent strike made in the southwest drift from the 600 foot level. was not upon the ground of the Little Chief company, but these are undoubtedly without foundation. Pat Shea, an old time mining man, who was at one time the superintendent of the Euroka Hill mine when that property was at its best, has been selected as general manager and superintendent of the Little Chief. Under Mr. Shea's direction the Little Chief is apt to soon be ranked among the producers of the Tintic district.

LITTLE CHIEF CHANGES.

Pat Shea Has Been Placed in Charge

is held by two men.

# BIG INDIAN ORES.

### A Plan For Reduction Said to Have Been Successfully Worked Out.

Regarding the immense deposits of low grade ore at the Big Indian mine, ten miles north of Lisbon in which Senator Kearns and Governor Wells schator Rearis and Governor Wells are interested, the editor of the Grand Valley (Mcab) Times says plany and specifications for a reduction plant have been completed. Superintendent Skews has discovered a process for re-ducing low grade copper ore and War-ren Loose is said to have invested.

ren Loose is said to have invented a practical furnace for working the procseven said the ore of the Big Indian district is principally copper carbon-ate in a sandstone matrix. The large percentage of silica makes smelting out of the question. The Skews process consists in passing the crushed ore through a furnace heated sufficiently to change the carbonate to metallic copper and the extract the copper on concentrating tables. The problem to solve was a furnace that would change the carbonates to metallic conper and

About 18 inches of rock quite freely spattered with kidneys of galena is now being followed in the 30-foot tun nel on the Galena company's property in Beaver Lake.

It is expected that the Copper Belt raliway at Bingham, will be finished to the Forks on Saturday, soon after which time the hauling of ore over the road will begin.

Mr. J. D. Wood and wife expected to leave this afternoon for Los Angeles, Cal., to be absent for two months. While away Mr. Wood will examine his oil interests in that State.

No special change is reported at the Tesora. The brokers must have sud-denly awakened to its worn judging by today's price. The mine is sending out a car of ore a day as usual, but no change is reported.

Mahager Packard of the Star Con. expected to take down the price of three cars of Star Con. ore this after-noon. He reports the 200 looking well with some work being done on the 400
