### ADVENTURE WITH A GRIZZLY.

Editor Deseret News:—Yesterday the "boys" working in American Fork cañon thought they would have a little sport. They having previously found the retreat of a bear. Mr. Aldrich, had promised the "boys" that he would go into the den and bring him out; but they thought it was all "gas" with him; so to make his word good, he armed himself with a candle and a gun, and went to the hole in the rock, which was quite small. He fixed his candle on a long stick, then shoving a small rock ahead of him, he started for "his man," whom he discovered after advancing on his hands and feet, about fifteen feet within the cave. Mr. Bear seeing the light, gently put it out with his paw. Mr. Aldrich leveled his gun and fired, hitting Bruin, and then retreated to reload, when he went in again; which he repeated seven times, to make sure that he had killed his game, then hitching on to the bear, the carcass was brought out to the astonishment of the spectators. The den or cave was found to be wider after entering than at the mouth. The bear weighed three hundred pounds. Mr. Aldrich is a backwoodsman from Illinois.

B. W. DRIGGS.

Nephi, March 6th, 1868.

Editor Deseret News:—Dear Bro.,—Having a few leisure moments, I improve them by writing you a few lines. On Monday, the 2d inst., I left home in company with Elder Erastus Snow, for a tour to "Dixie." Drove to Milo Andrus', where we were kindly entertained for the night.

On Tuesday, 3d inst., drove to Provo, where we arrived quite late, the roads being very bad. At American Fork and Battle Creek we noticed that the people were working some in their gardens, and saw one or two plows running, and were reminded in several ways that seed time is at hand.

Wednesday, 4th inst., we called on President Young, and were (as usual) a little late, the President was in his carriage about starting down to Bro. Madsen's fishery, at the mouth of Provo river. We found Bro. M. a whole-souled, big-hearted patriarch, though not very old. His family are all workers, and everything around the place indicated thrift. He told us that during the past winter, himself and family had manufactured seines, nets, lines, and other implements which would have cost, had he purchased them, not less than five hundred dollars. He had raised the flax, dressed it himself, and others of his family had carded and spun the twine, and he had knit his seines during winter evenings. He also told us that he had three years' bread-stuff on hand. After drinking a glass of Danish beer (very mild drink) we took our leave of this truly enterprising man, and returned to Provo city.

After dinner, we drove to Spanish Fork, where we stayed all night. In the evening we attended a lecture in the school house. Bro. W. D. Jones was the lecturer. Subject—"The manufacture of iron and its uses." The lecturer handled his subject very well, for a new beginner. After the lecture, Bro. Snow was requested by Bishop Thurber to make some remarks, which he did to the joy of all present. His subject was the union of the Saints, and the necessity of sustaining ourselves. He urged upon the Saints the importance of sowing the usual (or even greater) amount of grain, and not to be frightened at the prospect of grasshoppers; for if we do not sow, we cannot expect to reap.

Thursday 5th, we started from Spanish Fork, about 10 o'clock, and drove over to Spring Lake Villa, where we took dinner with our enterprising friend Benj. F. Johnson. In the afternoon, drove to Mona. (What's in a name?) where we stopped over night, being kindly entertained by Bro. Ed. Kay. In the evening meeting was held, Bro. Snow and myself speaking. This place, (Mona) is capable of being made into a very pretty little town. The new town being laid out on a high, gravelly ridge, with plenty of water, and near the base of the mountain, will make it a good fruit growing spot. And as the settlement has plenty of hay land, and a good range for stock, we may reasonably expect to see a flourishing place in a few years.

This morning snow covered the earth to the depth of three or four inches. We drove over to Nephi, where we will remain till to-morrow. The people in this place are somewhat nervous in regard to the grasshoppers, but the Bish-

op says they will sow most of their land notwithstanding.

This is an enterprising place, and though only two years since I was last here, yet I see many and marked improvements. Four good schools are kept here, and what is best, all are taught by our own teachers. There is a manifest improvement in the great work of Education.

Your Brother in the Gospel,  
Jos. W. YOUNG.

### MARSHAL'S SALE.

Office at the Old Stand, next door to the  
DESERET EVENING NEWS Office.

W. H. H. SHARP,

Surgeon and Dentist.

TO THE MUSICALLY INCLINED

And to those desirous of

Learning Music!

Mrs. WHITE, of Rochester,

TEACHES Robbins' American Method for the

Piano-forte, which is so far superior to the

old method of teaching the Piano-forte, Melo-  
deon or Organ that its full importance can  
scarcely be estimated. It is a century ahead of  
all other methods for the Piano—Pupils acquir-  
ing a knowledge of Music in an almost in-  
credibly short time.

References to and letters of recommendations  
from the most eminent Professors of Music in  
the East.

Mrs. WHITE is stopping at the TOWNSEND  
HOUSE for a limited time, where she can be  
found, and full particulars learned Private  
tuition given.

COMMISSION PURCHASING 1868.
