held on Monday, the 11th inst., a trick was resorted to by the so-called "Liberais" which ought to be exposed and in future provided against. Persons district where there was likelihood of senders of the higher ranks. Its caprinciple and clearly illegal in practice. We have the names of individuals who it is said committed this offence, and among them are those of men as conspicuous for their pretended devotion to the law as they are who differed with the governnotorious for their unscrupulous animosity to the "Mormons."

that.

"Sec. 2. At a school meeting to be held in each school district in the year eighteen hundred and eighty, there shall be elected by the registered voters of the district, three school trustees for each school district, one for the term of one year, one for the term of two years, and one for the term of three missives were merely forms to which years. And annually thereafter at the school meeting provided for in section 3 of this act there shall be one trustee elected by said registered voters in each school district whose term of office shall be for three years and until his successor is elected and qualified."

No one is entitled to vote, t.en, in any school district unless he is a registered voter of that district. A citizen who resides in the Fourth District can only vote, legally, in the Fourth District. If he votes in the Thirteenth District, for example, his vote is illegal. Instances of this kin : could be named. The object of the trick was to strengthen the "Liberal" vote in the Thirteenth District, where there was prospect of a "Libera." victory, by the ballots of men residing in another district where the People's Party was sure of carrying the school election. It is claimed, we are informed, that some who perpetrated this "Liberal" trick excused themselve by saying they did business in the Thirteenth District though they lived in another. No one knows better than they that this is no excuse at all. Their residence determines their voting district as it does their vo'ing precinct. No proposition can be clearer than that "a poor excuse better than none." But this pretense is far worse than silence, for it a line sophistry to subterfuge and folly unfairness.

The remedy for wrongs of this kind is vigilance on the part of those what are intrusted with the duty of watching over the public interest. In some instances the school trustees were a 11?tle behind the times. They should have been ready with lists of the registered voters of their districts. Every improper vote should have been c ailenged. Persons living in a certain district should not have been permited to vote in another district. In ft ture this must be seen to. The experience of the past should be profitable in time to come.

If tricks of this kind can be used with effect in school elections, what is to binder them or similar tricks at the general election? Nothing but prompt action by the committees of the Peeple's Party in the several precincts, an i b, such judges of election as are cisp sed to act fairly instead of as "offen ive partisans." In certain pieciasts specially, advantage will be scheme to gain the election for "Lib-
