> A Terrible Power. A DANGEROUS THING.

A promisent electrician has given a reporter of the Philadelphia Bulletin some interesting information. "The Brush Company," said he, "have forty lights on a circuit. The

electricity producing the fortieth light has been forced through the other thirty-nine. Each light re-quires forty-six volts — which in electricity is synonymous with steam pressure in a boiler-and there are thus in a circuit, 1,840 volts; a terrific force, which should not be

For years the people of Utah have silently borne abuse and slander from a set of adventurers who want to obtain control of this Tarritory system, because the current goes in

In Siberia, at the markets of Ir- fitably be set forth for public consid- formed and he would experience a In Siberia, at the markets of it-kutsk, in winter, it is said, every-thing for sale is frozen solid. Fish are piled up in stacks like so much cord-wood, and meat likewise. All kinds of fowl are similarly frozen and piled up, many of them being stuck up in corners in fanciful atti-tudes. Some animals, brought into market whole, are propped up on a stream of water a quarter of an inch in diameter 300 feet. Now if I had a Brush machine grounded and the other end connected with the ing among their dry bones as would wake the echoes of the Wasatch mountains and make those heathen rage like suddenly awaken-ed hyenes. They had better chew very instant the stream of water over the few facts and figures we have set forth, as calmly as they can, moderate their boasting and get down to the basis of truth and common sense. The taxes they If a thousand men were to march up in a solid body they would all be killed in ten seconds. It would be absolutely imposable; to take the fort. It could be used with equally have not paid will do well enough
