Give a Complete Christian Education-Remarks by Stevenson.

The cornerstone of Westminster college was laid yesterday afternoon, in the presence of 500 patrons and friends of the institution, and the program as prepared, was carried out. Dean Mc-

Niece in his address said: "So far as I know, the first movement toward the establishment of this college was made by that strong man, Prof. John M. Coyner, and myself in the spring of 1882, 24 years ago last spring. He was a graduate of Harvard class of 1852, and devoted his life to the cause of Christian education. He had established the Collegiate Institute seven years before and it was now a prosperous school of about 300 pupils Mission schools were springing up all over the territory and in our home mis-sion board. There were then about 18, and two academies. Since Prof. Coy-ner and I lived next door neighbors, and had many conferences about the future of Christian education in Utah. With these mission schools and academies we agreed on the importance of taking steps to provide for the culmination of

work in a Christian college. We laid the matter before the suring meeting of the Presbytery in 1882. was made chairman of a committee of six to take the subject in hand. the old-timers will be interested in the names of the other members of the committee. They were Rev. D. J. Mc-Millan of Mt. Pleasant. Rev. C. M. Parks of Logan, Rev. George W. Leonard of Springville and Elders John M. Coyner and J. C. Royle of Salt Lake ity.

WHEN WORK WAS BEGUN.

"We began the study of college charers and to look about for a suitable ite, Prof. Coyner took up his residence in California in May, 1885, after 19 years of most successful educational work, being succeeded as superinten-debt of the Collegiate Institute by that able educator, Dr. J. F. Millspaugh. Nothing positive was done in college matters until the spring meeting of the Presbytery in 1832. I then introduced a resolution providing for the election by the Presbytery of a board of 12 college trustees. For nine years, until 1901, I was president of the board. We

"In May, 1892, the general assembly met at Portland, and 600 of the delegates stopped over Sunday in Salt Lake lity. You would suppose these delegates would be too wise to be caught n the trap of a real estate speculator, have gone over nearly every square Portland, a prominent man among the New Jersey delegates received a most beautifully written letter from a real estate speculator here, who formerly lived in New Jersey, stating that he had been brought up in the Presbyterian church and now desired to do something enerous in helping the establish a college in Salt Lake City He proposed to give the denomination 92 acres of ground, beautifully located west of Jordan river, he said. He would set aside 20 acres for a campus He would plot the remaining 72 acres into 720 lots. By selling these lots for \$500 a lot the college would receive \$360,000. Of this sum \$160,000 would be used for a handsome college building and \$200,000 would be used for a permanent endowment. "The New Jersey delegate was com-but they were not. After they reached oletely captured by this fascinating offer which looked so fine on paper, and oved that the assembly at once ac cept the brilliant proposition. But in some way action was deferred until the next day, although it was with great difficulty the whole assembly was prevented from accepting the offer at or We were simply startled by the dis-patches the next morning, and three or four of us had to keep the telegraph wires hot trying to convince the assembly that the whole thing was a real es-tate speculation, and ought to be promptly discarded, but we labored in vain, so beautiful was this paper offer And the best result we could se was to have the matter referred to the board of aid for colleges for investigation. This investigation showed that the location would be suicidal for a college, and that the lots could not be sold at any price.

Mr. McClain and myself a com-mittee to confer with Col William M. Ferry, also a member of the board, and ask him to give us the ground here for a college. I had previously rode on horseback over all this valley. looking at various locations for the college and had come very definitely to the conclusion that this tract of 20 acres was by far the most heauti-fully located of all, taking into account that it was in reach of streetcar accommodations, city light and city wa-ter. Col. Ferry readily saw the great importance of the matter, and wished a few days for consideration. In 19 days he sent for me and gladdened my heart, saying he had decided to pur-chase this ground for the college, if I would take charge of negotiating with the different owners of lats. For three

months I worked night and day to complote these negotiations, and after great difficulty succeeded. So much for the history of securing this college ground.

Dr. McNiece concluded with a short narrative of the difficulties attending the carlier days of the institution.
