

UTAH APIARISTS DISCUSS THE BEE

Wintering and Shipping Come
Before Annual Gathering
Held Yesterday.

AFTER NATIONAL CONVENTION

Steps Will be Taken to Secure Meeting
At the Time of Grand Army
Encampment.

After the Bee-keepers' association met yesterday in the city council chamber and re-elected officers, steps were taken to secure the convention of the National Bee-keepers' association to meet here in September. A resolution was adopted which will be forwarded to the president of the association asking him to hold the convention at Salt Lake. It was pointed out that the members who wish to attend could secure rates on account of the G. A. R. encampment.

The officers of the association were re-elected as follows: R. T. Rhea, president; W. C. Rhea, vice president; William Belliston, Nephel, second vice president; A. Fawson of Grantsville, secretary and James Nelson, assistant secretary. The country vice presidents and the committees were also re-appointed.

In a discussion of the wintering of bees, Nephel Miller of Logan said that he was unable to secure as low a rate as other shippers from California. He introduced a resolution asking that the association take the matter up and confer with the San Pedro, Los Angeles and Salt Lake Route and have the matter adjudicated if possible. He did not say that he had been discriminated against, but his resolution implied that he was unable to secure the same terms on a carload lot of bees.

President Rhea talked to the association on the general condition of the bee industry in Utah. He said: "All things considered, the bee industry throughout the state is in a fairly favorable condition. While many of our bee-keepers have been successful in wintering their bees, some have lost a portion of their bees. There are several causes for this condition, while with proper knowledge, care and attention, much of it could be avoided. While some went into winter quarters in poor condition, the main cause as usual was a lack of ventilation. If the bees are strong and have sufficient ventilation, as a rule they will winter all right."

"When A, B and C winter their bees successfully, and D and E lose theirs, in the same locality, it proves that it is a subject that needs practical investigation. I am pleased to note that quite a number of old and new bee-keepers in Salt Lake have been starting up again in the bee industry, so far with gratifying success. Many of the old time honey flows again were recorded last year, and on account of the excessive amount of moisture, another profitable year is looked for, in this and other parts of the state."

Many bee-keepers have expressed a desire to have the National Bee-keepers' association visit us this season, and this is an important question for consideration."

Several other members spoke along the same lines. Reports were heard

STONE IN KIDNEY

An interesting case was that of Mr. H. C. McDuffie, a member of the firm of H. C. McDuffie & Co., of the Crocker Building, San Francisco.

The case was puzzling. There was pain in the kidney with a showing of blood. Examination by seven physicians proved that the blood was from the kidney, and it was the opinion of all that there was a stone cutting the kidney, as the least exercise caused a showing of blood.

Four X-ray pictures were taken. Three of them showing a stone half an inch in diameter. To be certain that it was a stone that cast the shadow, a similar stone about the same size taken from a patient was put under him for comparison—both stones showing on the plate.

An operation was about decided upon when Fulton's Renal Compound was recommended to Mr. McDuffie. He feared the knife and gave it a trial. Within ten weeks the blood and pain had ceased and in six months he considered himself well.

We also have a three-page letter from an old-school physician, a lecturer in one of the San Francisco Medical Colleges, covering a similar case of stone in the kidney. An operation seemed inevitable.

He prescribed Fulton's Renal Compound upon the theory that as it was having some effect in reducing the inflammation and excessive uric acid that attends Calculus. He was so surprised to get a complete recovery that he thought a record ought to be made of it and gave us the letter above referred to.

Fulton's Renal Compound seems to have about the same percentage of efficiency in stone in the kidney that it has shown in Bright's Disease.

For free literature, address the John Fulton Co., 212 First St., San Francisco.

Fulton's Renal Compound can be had of our agent, F. J. Hill Drug Co.

We desire to advise with every patient who is not noting the usual favorable results by the third week.

From the various county vice presidents who told of the conditions of bees in their respective districts.

A BABY SHOW IN SALT LAKE

Would have many contestants, but it is safe to say that the healthiest baby would win the prize. No baby can be healthy who suffers from worms, and most babies do unless they are kept free from them with White Cream Vermifuge. Acts quickly, yet mildly—is its own purgative. Mothers, don't attempt to drive worms out with other Cream Vermifuges. Price, 25 cents. Sold by F. J. Hill Drug Co., 112 and 114 South Main Street.

EXAMINATIONS IN SCHOOLS.

When the state board of education resumed its meeting yesterday in the office of State Supt. A. C. Nelson the following were appointed on the state library and gymnasium commission: W. M. Stewart of Salt Lake, five-year term; Dr. George Thomas of Logan, four-year term; Judge E. G. Goyens of the Salt Lake juvenile court, three-year term; Prof. John Walsh of Salt Lake, two-year term, and J. M. Mills of Salt Lake, one-year term.

The eighth grade county examinations were set for April 22, 23 and 24 and the final examinations will be held on May 25, 26 and 27. The county teachers' examination will take place on June 1, 2 and 3. The board insists that every teacher who applies for a one-year county certificate take this examination. The examinations applied to pass upon those papers are: Oscar Van Cott, William Bradford, J. Y. Jensen, Mosiah Hall, Samuel Hallman, W. J. McCoy, C. R. Marquess, J. H. Paul and J. Leo Fairbanks.

TICKET MEET MEE FROM ALL ROADS

Passenger Officials of All Lines
Entering Salt Lake, Are
In Session.

ENCAMPMENT RATES ARE UP.

Grand Army Veterans in the State to
Receive One Fare Concession
For Big Gathering.

A meeting of the heads of the passenger departments of the various railroads entering in Salt Lake is being held in this city at the office of D. E. Burley, general passenger agent of the Oregon Short Line. The meeting is one of occasional occurrence, held for the purpose of going over the general situation with reference particularly to the needs of the passenger departments of the lines concerned.

At the gathering rates will probably be authorized for the G. A. R. encampment within the state, and it is understood a one fare rate all over the state will be adopted for return trip on that occasion. Other matters of local interest will also be discussed. The officials present are: D. E. Burley, general passenger agent, and D. S. Spencer, assistant general passenger agent of the Oregon Short Line; Major S. K. Hooper, general passenger agent and ticket agent, and I. A. Benton, general agent of the passenger department in this city; the Denver & Rio Grande, T. C. Peck, general passenger agent; J. H. Burton, district passenger and freight agent, Riverside Division, and K. C. Kerr, district passenger agent, Salt Lake division, of the Salt Lake Route, together with the local traveling passenger agents of the various lines.

NEW IDAHO ROAD.

Branch of Chicago, Milwaukee & Puget Sound in Gen. State.

Notice has been filed at the office of the secretary of state at Boise, Idaho, of the proposed construction of a branch line of the Chicago, Milwaukee & Puget Sound railway, in north Idaho, according to the Idaho Statutes. The route will run, according to the description, commencing at a point of connection with its present main line of railroad at or near the village of St. Maries river and by way of Clarkia and Colville, through the counties of Kootenai, Shoshone and Latah to a point of connection with the railroad of the Washington, Idaho & Montana Railway company in Latah county; thence easterly to a point upon the north fork of the Clearwater river at or near the mouth of the Little North Fork. The estimated length of the branch is 55 miles.

PENNSYLVANIA RELIEF FUND.

Reports of the Employees' Relief fund of the Pennsylvania railroad system and its east of Pittsburgh, Pa. branch, show that the total payments since the organization of the relief department amount to \$2,515,283.98. On the line east of Pittsburgh and Erie during February, the sum of \$107,351.50 was paid out. Of this \$36,294.50 went to families of members who had died, while \$17,147.45 was paid to members who were incapacitated for work. The total payments on the line west since Feb. 15, 1896, when the relief fund was organized, amount to \$81,512,465.32.

In February the payments of the relief fund on the line west to members unable to work amounted to \$27,578.90, and to families of members who died \$13,259.40, a total of \$40,838.30 for the month. The disbursements in the 19 years of its existence have reached \$6,049,518.06.

AWARDS ARE DELAYED.

Changes in Gould Terminal Make More Figuring Necessary.

The contract for the construction of the Denver & Rio Grande passenger station in this city, which was to have been awarded on Saturday, will not be let until today or tomorrow, according to latest advices from the east. It is understood some changes were made at the last minute and a short extension of time in which to figure on the plans for the construction was given by the railroad company. The matter is in the hands of Superintendent Archibald Scott, whose office is in Chicago. S. C. Watts, who has been in charge of the work of building the foundations and cement piers of the building, said this morning that he had received no word of the awarding of the contract, and did not expect to be advised for several days after the award was made, as he would have to go to the city of the headquarters of the road and then in turn be forwarded to Salt Lake. The foundation work is all in readiness for work to begin on the superstructure, and as soon as the contract is let and the successful firm can get on the ground, the building will be rushed through to completion at as early a date as possible.

KERR GOING TO EUROPE.

Halbert S. Kerr, who for two years past has been superintendent of the Cerro de Pasco railroad in South America, will leave shortly for Europe in company with Mrs. Kerr. Mr. Kerr today said the Cerro de Pasco mines, from which the railroad takes its name, was formerly owned and operated by A. W. McCune of this city, and Mr. McCune is now engaged in building another line of road beyond the original line, and connecting with the Denver & Rio Grande line. Mr. Kerr is making a great success with them. The mine now has an output of ore from which 4,000,000 pounds of copper is extracted every month. The enterprise is an assured success and both the friends of Mr. Kerr and Mr. McCune will be glad to know that they are doing splendidly. Mr. Kerr is a brother of K. C. Kerr, district passenger agent of the Salt Lake Route in this city.

WILL USE F. P. TRACKS.

The Independent Salt company, organized more than a year ago with a capital of \$100,000, and which acquired a tract of land on the shore of the lake four miles north of Salt Lake, will, it is understood, use the Western Pacific tracks to haul out its product. The output will be rather small to commence with, probably about 10 tons per day, but this amount will be increased as time goes on.

PRESS CLUB ELECTION.

The Salt Lake Press club held its annual election yesterday with the following result: President, Bruce J. Evans; first vice president, Percy F. Jensen; second vice president, Kenneth C. Kerr; secretary-treasurer, Earl Armstrong. Members of the board of managers, the officers and A. C. McKay, George H. Carpenter and A. N. White, Historian, Harry Shipley.

\$51,000 Worth of Shoes in One Order

The Burton, Peel Dry Goods Co., a Texas house, have heretofore bought their shoes from many different manufacturers. After careful investigation they have found that by concentrating on HB Shoes they could get "better shoes for the money" in every grade they carried. So they have just placed an initial order for \$51,000 worth of HB Shoes. This order includes over 8,000 pairs of the

American Lady Shoe American Gentleman Shoe

Their sales during the year will undoubtedly require additional orders aggregating several times the amount of the first order. The same reason which induced a progressive house like the Burton, Peel Dry Goods Co., whose knowledge of all lines of shoes is unlimited, to concentrate on HB Shoes, will apply with equal force to every good merchant in Utah.

\$45,000 Order From Uncle Sam

Uncle Sam is short on sentiment and long on judgment, so he, too, buys HB Shoes. The U. S. government has just ordered 35,200 pairs of HB Shoes, in competition with the shoe lines of the United States—both east and west. Here are two good endorsements of HB Shoes, but the best endorsement of all is that enough people demand and wear HB Shoes to make us the Largest Shoe House in the World.

HAMILTON-BROWN SHOE CO. St. Louis, Boston Keep the Quality Up

ASPEL MADSEN WINS ORATORICAL CONTEST

Student of Lehi High School Discusses Municipal Reform.

Aspel Madsen, representing the Lehi high school, won the first prize in the annual state high school oratorical contest at the University last evening. Five other contestants entered, all of whom delivered excellent compositions. The second prize was awarded to Warren Stratton of the Salt Lake high school, whose subject was, "Our National Holidays." Honorable mention was made by the judges of the composition of Mac Burt of Springville, the title of which was "What Next?"

The others competing were: Otto E. West of the Park City high school, who talked on "The Exclusion of the Alien"; Helen Brand of the Gordon Academy, chose the subject, "As a Man Will"; and Will Huntington spoke on "Theodore Roosevelt's Place in History."

The subject of Madsen's address was "Municipal Reform," and in addition to the excellent delivery the matter was very good.

The judges were: Manuscript, Prof. George M. Marshall, Prof. F. W. Reynolds, Delivery, Prof. Maud May Baycock, Dr. William C. Ebaugh and A. Blaine Roberts.

Several selections were given by the mandolin and guitar club, and a solo by Miss Helen Barnes, which added greatly to the enjoyment of the evening.

The contest in declamation will take place at the university this evening, at 8 o'clock, at which time nine contestants will compete for a silver medal for the best delivery of some literary masterpiece.

WORDS TO FREEZE THE SOIL.

Your son has Consumption. His case is hopeless. These appalling words were spoken to Geo. E. Blewens, a leading merchant of Springfield, N. C., by two expert doctors—one a lung specialist. Then was shown the wonderful power of Dr. King's New Discovery. "After three weeks use," writes Mr. Blewens, "he was as well as ever. I would not take all the money in the world for what it did for my boy." Infallible for Coughs and Colds, its safest, surest cure of desperate lung diseases on earth. 50c and \$1.00. Z. M. J. Fitzgerald, 112-114 So. Main St., Salt Lake City, guarantee satisfaction. Trial bottle free.

BELL COMPANY TO SHOW PLANT

A special invitation has been issued by the Bell Telephone Company to Conference visitors to inspect the Company's building and plant at No. 34 State street when in Salt Lake. Guides will be ready between the hours of 10 o'clock a. m. and 4 o'clock p. m. to conduct visitors through the building and explain the apparatus. All visitors will be welcomed to the plant, which is the largest and best in the west-northwest country, will prove interesting. Visitors will have an opportunity to see the big new switchboard in service with the operators at work.

REPORTS ON COAL MINES.

Pettit Says Properties Show Good Condition Generally.

In a report filed in the governor's office, J. E. Pettit, state coal mine inspector, treated the principal coal mines of the state, saying that they are being worked under modern conditions and are all in good shape. The report is a long one, and covers the following: Tropic, which is among the most powerful known, has been experimented with successfully in the Clear Creek mines. It has given off flames and very little smoke. The West coal mine at Coalville is given some attention in the report. The creek on the west side of the mine is reported as subsiding although a slight raising of the coal and leaving of the floor is said to have taken place. This has required a great deal of new timbering and ventilation of the mine is in better shape.

The Clear Creek mine is said to be properly damped and free from dust. The pillars have been drawn out of the west fault and this part of the mine abandoned. The Union Pacific company is criticized for the method employed by the miners in blasting. The care of powder is commended but attention is called to the fact that coal slack is

being used in tamping shots in direct violation of the rules.

The inspector criticizes the Independent Coal and Coke Co., because its miners are violating the state laws by taking into the mine full boxes of caps, enough to cause great damage if an explosion should occur. Several dry spells were found in the mine although the property is described as being fairly well sprinkled.

During the spring every one would be benefited by taking Foley's Kidney Remedy. It furnishes a needed tonic to the kidneys after the extra strain of winter, and it purifies the blood by stimulating the kidneys, and causing them to eliminate the impurities from the system. It is a powerful and pleasant new life and vigor. Pleasant to take. F. J. Hill Drug Co. (the newer substitutes), Salt Lake City.

OBITUARY.

One of the earliest pioneer settlers passed away at her home in Mill Creek, Sunday evening, March 28. She was the daughter of William and Elizabeth Collins McPhie and was born at Glenhead in the parish of Kirkcubright, Ayrshire, Scotland, Jan. 6, 1832. At the age of 11 years she was baptized into the Church of Jesus Christ of Latter-day Saints. In March, 1852, she accompanied her father to England where he went to reside.

She was married to Mr. Thomas F. Boam, a native of Scotland, in 1854. They had four children: Mrs. Elizabeth Boam, who died in 1858; Mrs. Mary Boam, who died in 1860; Mrs. William Boam, who died in 1862; and Mrs. Thomas Boam, who died in 1864.

She was a member of the Mill Creek branch of the Church of Jesus Christ of Latter-day Saints, and was a devoted and faithful member.

Her funeral was held Wednesday last, at 2 o'clock from the Windsor ward assembly hall, which was filled to its capacity. The burial took place in the Mill Creek cemetery.
