A Boston merchant has a business ledger 190 years old.

Punch says the best check for pauperism is one of George Peabody's. The first and most important quality

in the character of young women is the possession of a sweet temper. A cutlery firm at Sheffield, England, has sent Ex-Secretary Seward an ele-

bears, in the other, by bare blacks. The sleeping man at the Bicetre Hospital, Paris, who had not waked for seven months, aroused the other day, swallowed a little chocolate, broth, and

wine, and then died. By a sure contradiction, no system of philosophy gives such a base view of humau nature, as that which is founded on self-love. So sure is self-love to degrade whatever it touches.

A Cleveland newspaper recently advertised that it would send a copy to any person sending a "club of ten." A young lady in the country sent it the ten of clubs.

Stantly on hand, for sale on the most reasonable terms, a good supply of COOPER WARE of the best quality and every variety.

A Frenchman, with several assistants is conveying olive seeds and cuttings in hermetically sealed cans to Louisiana SURGEON AND PHYSICIAN, with the design of establishing the culture of that fruit there.

Travelers who arrived in Chicago recently, over the Michigan Central Railway, report that about 75 miles from the city they saw continuous flo pigeons, "each numbering apparently millions, and covering a mile or more of space."

An ingenious Frenchman in Philadelphia skins frogs by drawing all their interior parts through the mouth, and then stuffs and mounts them in a variety of curious attitudes—as billiardists, velocipedists, dentists, etc.

Every young man should remember that the world will always honor industry. The vulgar and useless idler, whose energies of body and mind are rusting for the want of occupation, may view it with scorn—it is praise; his contempt is honor.

The negro, Harris, who was nominated for Lieutenant Governor of Virginia by the Radical Convention at l'etersburg, last week, has a white woman for a wife. She was a "Yankee schoolmarm" from New Jersey. They were married since the war.

In a printing office at Gosport, Ind. is a blind compositor. His average day's work is 5,000 ems, and on several occasions he has set from 7,000 to 9,000. His letter is distributed for him, and his copy is read by his partner, his memory being so perfect that he can retain from four to six lines.

At Mount Clemens, Mich., some seven years ago, two sisters-in-law got into a dispute over a baking they were engaged in, and vowed never to speak to each other again. They have lived in the same house since then, eating at the same table, and engaged in work addressed a remark to each other, or in any way recognized each other's presence.

The steamship China, of the Cunard line, has just made the quickest passage on record between Liverpool and Boston. The China sailed from Liverpool on April 27, took her departure from Queenstown at 5 p.m. on April 28, and undered Boston harbor on the afternoon entered Boston harbor on the afternoon of May 6, after a run of only seven days and twenty-two and a half hours. Her greatest speed on any day was 375 miles, and she averaged fourteen knots all the way over.

A correspondence of the Rural New Yorker offers this remedy for burns or sealds: "The most efficacious remedy I have ever tried was to apply common starch, just moistened with cold water, starch, just moistened with cold water, and spread on a cloth to effectually cover the wounded part. A little girl who was badly scalded was instantly freed from pain by the above remedy. Keep, the starch moistened, and in a few hours the inflammation will be gone, leaving the scalded part perfectly white. After the inflammation is out, apply a linen cloth dipped in sweet oil. It is a speedy cure."

MY SPRING HACK will leave the Salt Lake House every Morning at Eight o'clock, and at every HOUR through the day, calling at all the principal Hotels.

mill, on Russian River, California, met with a serious accident, the saw passing through his skull, from a point half an the back of the head. The wound gaped open a full inch, and the physician put in his pocket-rule to the depth of an inch and a half, and he estimated that the wound was nearly three inches deep. The wounded man complained of no pain, and the wound was BAND FLACS, thoroughly washed out, removing over three hundred fragments of the skull, and more than a tablespoonful of the brain. The scalp was shaved, the bone tourniquet, and the aperture closed with six stitches. The patient, in four weeks, was at work again.
