# FIFTY-FIRST YEAR THE QUESTION OF EVACUATION.

# Commanders in China Differ - Von Waldersee Insists There Has Been a Military Administration.

shal von Waldersee, in the letter which sent to the ministers today, as the reply of the generals to the views of the ministers regarding the military questions discussed yesterday by the generals in conference, says a garrison of 6,000 men should be left at Tien Tsin and the adjoining district, Great Britain, France, Germany and Japan to ontribute 1,400 men each and Italy 400 men. To garrison Shan Hai Kwan, France, Great Britain, Russia and Germany are to contribute 300 men each and Itsly one company until the forts are rared. So long as any forces occupy Chinese territory the foreign millnmanders must exercise the full athority of a civil administration ac ing to the principles of The Hague cording to the principles of the higher meeting of 1890. The Chinese may re-main in office, as in the case of Pao Ying Fu and, partly, Tlen Tsin. Besides he 6,000 in the Tien Tsin district, warps, which must always in the Pei Ho, reserve communication with the

Fric-ons would arise immediately which ould lead to difficult conflicts, which ill be better avoided. The placing of the civil administration under the mili-tary has a further great advantage. It ould be inconvenient to the Chinese overnment, which would, therefore, deavor to get rid of it speedily by the

The question of evacuation is most difficult, on account of the approaching hot season, which is very injurious to the health of the troops and which, also, will increase the cost of the war indemnity immensely, result in the loss of hundreds of soldiers and probably mean the retention of the troops for the winter. The generals were unanimously of the opinion that the question could speedily be solved if the ministers would treat separately regarding the amount of indemnity and the method of raising it. The second part of this question must take many months before a solution can be found, on ac count of the difficulty of the matter.

is the question if indemnity is decided first and China expresses her willingness and ability to pay, the moment will have arrived to commence the evacuation, the execution of which will require several months, so the reduc-tion will be very gradual. The generals are convinced that 2,00 men at Pekin, 1,500 at Shan Hai Kwan and 3,000 men on the railroad, and altogether 12,500 men with the fleets at Taku and Shanghai will be a fully sufficient force to compel China to accept the demand for
