MINING, BUSINESS AND STOCKS

FINE RESULTS AT SEVIER CON.

Mill Running on Fifty Tons of Ore Daily Which Averages Sixteen Dollars.

PRACTICALLY ALL VALUES

Are Being Saved - Twenty-five Per Cent Caught on the Copper Plates,

Captain Henry C. Lawrence, manager of the Sevier Consolidated mine in the Gold Mountain district, is in the city again and to a representative of the "News" today, he expressed himself as being highly gratified with the results being obtained, both in the development of the mine and in the operation of the mill. "The mill," said Captain, Lawrence, "is handling an average of 50 tons a day and is making a remarkably good saving of values. In fact, we are saving almost everything in the ore; the loss in the tallings does not exceed .002 of an ounce in gold or .22 of an ounce in silver, while the cyanide makes no return on the waste, so you see we are doing pretty well. cyalide makes no return on the waste, so you see we are doing pretty well. The only trouble is, the mili is not large enough; but it is pretty well known, I guess that this plant was built as an experimnet, more than for any

The ore being treated," continued "The ore being treated," continued Manager Lawrence, "carries values of about \$16 to the ton; about 25 per cent of the gold is saved on the copper plates, while the balance is caught in the cyanide department."

The captain had with him a gold brick weighing 111 ounces, representing a week's run over the copper plates.

The company has in its employ a

The company has in its employ a force of about 40 men; it being the policy of the management to keep the development of the mine going at a rapid pace. The company has made no plans for the enlargement of made no trains for the chargement of the mill, but that steps will be taken in this direction before the close of the present year, there is not much doubt. In a little time the Sevier will rank well with the Annie Laurie mine.

ON MINING EXCHANGE.

Dull Day Among the Brokers-The Quotions Posted.

The market for mining stocks today was practically a dead one. Few trades

was practically a dead one. Few trades were made during the regular call, or on the open board; the transfers amounting to 2,250 shares, for which was paid the sum of \$1,165.75.

Daly, May Day, New York, Naildriverand Tetro recorded the only sales, and all of them at a weak price. Uncle Sam Consolidated was fairly strong in the bifdding, but brokers were unable to bring out any stock.

The closing quotations and sales were reported as follows:

the meantime the development of the mines and the blocking of ore will go along as it has in the past under the supervision of Ed F. Freudenthal. That early preparations will be made for the equipment of the O. K. mine with a concentrator has already been stated by Mr. Newhouse—before he left the east for home. The blowing in of the smelter at Milford is also among the early possibilities.

NEW NEVA DA COMPANY. Property Located in Lincoln County is

The Basis. Special Correspondence.

Provo, Feb. 9 .-- Articles of incorporation of the Moapa Gold, Silver & Cop-per Mining company have been filed with the county clerk. The principal place of business of the company is Provo City, and the capital stock is \$75,000, divided into 750,000 shares of the our value of 10 cents each, based on the valuation of the following mining claims, situated in the Cane Springs mountains, Lincoln county, Nev. The claims are the Utah, the Sampson and

the Rebel.

The officers of the company are S. K. Roberts, president; J. K. Bishop, vice president; H. G. Blumenthal, secretary; J. W. Lamb, treasurer, The officers are all residents of Provo, and with Frank Travis of Moapa, Nev., form the board of directors.

PROPOSITION TO CITY.

Paraffine Oll Company Ready to Furnish Paving Material.

Dr. Clarence Barratt, secretary of the Paraffine Oil company of Utah, which owns property in Utah county, has submitted a proposition to the city in which he proposes to furnish it with material for paving purposes. The proposition is now in the hands of City Engineer Riter, and will probably be presented to the council at its meeting on next Monday night.

The Paraffine company owns, according to Dr. Barratt, territory embracing about 160 acres, which is accessable through Dairy Fork canyon, and the main workings are about four miles from the tracks of the Rio Grande Western railroad. Western railroad. In the possession of Engineer Riter

are samples of the native material, also a showing of oil, wax and sand separated from it, the composition of which is 89 per cent sand, 10 per cent oil and asphaltum, the balance being maisture.

affine company will give the city the exclusive right to mine the contents of the sands rock vein; or, it will deliver the material to the nearest hipping point on the Rio Grande Western for \$2.25 per ton.

LEAVES COV. MERCUR.

Engineer A. H. Brown Resigns to Go to Salmon City. Arthur H. Brown who has served

the Consolidated Mercur in the capacity of Mining Engineer for several years, has resigned, to take effect on the 15th Mr. Brown has accepted a responsible position with the Kitty Burton Mining company, near Salmen City, Idaho, The property of this concern is soon to be equipped with additional milling machinery.

Special Correspondent. Santaquin, Utah Co., Feb. 6.—Today the Granite Mining & Milling company of this place held its annual meeting and elected a board of directors to serve during the ensuing year. The company owns a number of claims in this district and is prospecting them by running a tunnel, cross-cutting the formation, which has been driven to the length of eral small fissures. The adit is to be pushed thead until it encounters the contact vein where the big values are expected. A number of parties are working

Almost Ready to Start,

Manager W. H. Peck of the zinc plant at Frisco said today that everything is in readiness for the start excepting for the delay in the arrival of a shipment of belting. It is expected, however, in a few days. Undoubtedly the plant will be given its initial run before the expiration of another two weeks.

THE CRACKERJACK OF GOLDFIELD

Important Strike Was Made on This Property During the Past Week.

WORK AT THE JANUARY MINE.

New Mill to Go Up at Beatty-Sandstorm's January Shipments Aggregated \$37,000.

A strike of importance, the extent of which has been magnified by street rumor, has been made on the Crackerjack claim of the Goldfield Mining company, which lies on the east slope of Columbia mountain, says the Goldfield News, One of the finest looking ledges ever opened in the camp has been uncovered, but thus far the values fall little short of shipping grade. The width of the ledge has not been determined as yet, and even if no shipping ore is found by development, as seems probable, the high-grade mill ore will soon be a good paying proposition. A number of lessees are now

working On the January the most of the force is employed in lining up the shaft and cleaning out the bottom of the old shaft, which was badly caved. In the 160-foot level the owners have perhaps the best body of ore ever in the mine. At the 85-foot level the drift is in a good body of ore, from which the next to the highest assey ever gotten from the mine was received, but the average is not as good as at the 160-foot

E. A. Montgomery is contemplating the erection in the near future of a mill for Beatty. The gentlemtn feels that practically from the surface of his Sho-shone group he will have enough highgrade mill ore to keep a number of stamps busy, and in addition several others in the vicinity have offered to furnish him ore if he will treat it. This mill and the mines opening up around Beatty insures a thriving town. A new road has been cut through from Copote holes to Beatty which cuts off enough so that the trip can be made from Goldfield to Beatty in a day. At the Sandstorm lease numbers, they are now sacking the fourth ship-

ment. Returns for the months of De menf. Returns for the months of December and January show a total product of about \$37,000—\$25,000 actually marketed, and a mill dump of 250 tons of \$50 ore. The incline shaft is now down 15 feet and they are grading for the power hoist. The contractors are saying that in 15 days the machinery will be here, and everything will be ready for its installation by that time. A night shift has been put on at time. A night shift has been put on at all points and the work is driving to the limit. The men interested here have Barratt says, has been exposed to the elements for ages, yet the product shows no bad climatic effects. Judging from tests made with it by Dr. Barratt he is satisfied the sands will make the first kind of paying waterial.

For a consideration of \$2,500 the Paraffine company will give the city the exclusive right to mine.

A message over the new telephone line which is within three miles of Amargosa, tells of a strike which was made this week at Bullfrog by Judge Ray which is said to be one of the biggest ever made in the state of Nevada. Full details have not been received, but it is said that while the streak is small, the values go over \$100,000 to the ton. As the scene of the strike is surroundd by many of the older and well known properties of the district, it is of great importance to oth rs besides

great importance to oth rs besides
Judge Ray and his associates.
R. W. Griswold, president of the Vindicator Mining company, stated that
active development on that property
has been commenced. They are putting active development on that property has been commenced. They are putting up a blacksmith shop and camp at the mine. The old shaft sunk by the former management will be cleaned out and deepened, and the main vein coming off the Vindicator mountain will be thoroughly opened at a good depth. This company is one of the oldest in the camp, and at a recent meeting the control passed into the hands of R. W. Griswold of this place. Mr. J. H. Emerson of the Stratton-Independence mine at Cripple Creek, Colo., L. E. Spangler of Denver, and representatives of Horace Granfield, the famous lessee of the C. K. & N. mine at Cripple Creek. The books of the company have been moved to Denver, Colo.

The town of Rhyolite is making rapid strides and there are now 95 tents there, with 300 people living in them. Twenty thousand feet of lumber passed through Goldfield yesterday, which will be used in the construction of two substantial store buildings in the town of Rhyolite. An addition to the town is being platted, which will be closer to the mines.

IS MAKING PROGRESS.

Dr. Meyer, Smelter Smoke Expert, Con-

fident of Success. Dr. Franz Meyer, the New York chem-Dr. Franz Meyer, the New York chemist, who is working in behalf of the smelters for the purpose of ferreting out a solution, if possible, for the smelter smoke difficulty, which has created trouble with the inhabitants of the rural districts, has his work well in hand and is confident of achieving complete success in the undertaking.

success in the undertaking.

He has been engaged by the Utah
Consolidated company, at large expense, to draw up the plans for a smoke
consuming plant, mention of which was made by Manager Channing at the gathering of farmers and smeltermen before the county board of health. The proposed plant will cost no less than \$150,000, according to the calculations

of Dr. Meyer. The smeltermen are confident that the existing trouble can be overcome by the use of water, if not in any other way, and this will likely be the ultimate-curse pursued, yet there are a great many conditions to be taken into consideration. consideration before any definite plans for the future can be made.

CONCENTRATES.

George Gunn, flield representative of the A. S. & R., has gone to New York. Engineer J. T. Brecken went out to tockton today on professional busi-

The Mammoth mine of Tintle was in the market today with several cars of

General Manager P. J. Queally of the Kemmerer Coal company of Kemmerer, Wyc., is in the city today. Director A. W. Chesterion of the Con-solidated Mercur mine departed for his home in the east last night.

Fred B. Whitmore has been appointed superintendent of the Co Mining company's mill at Alta.

The Eagle and Blue Bell of Tintle is shipping to the local market close to 50 tons of ore daily. Drifting is now in progress on the 800 level.

Supt. Frank P. Swindler and Consulting Engineer E. M. Rogers of the Bamberger DeLamar mines are expected in the city in a few days.

James Chipman has returned from a trip to Mexico, where he went to look into the crits of a colonization proposition in the southern part of that republic. The directors of the Uncle Sam Con-olidated are scheduled to hold a meet-

ing this afternoon at 4 o'clock. The motter of a dividend will be discusse but it is not likely one will be posted.

John Noyce, the victim of the "missed hole" explosion in the Columbus Con-solidated mine at Alta a few days ago will not lose the sight of his eyes as was at first feared. Both members was at first fear-have been spared.

Judge Dickson returned yesterday from a trip to the big Nevada gold camps, where he went principally for the purpose of attending the special meeting of the directors of the Montana Tonopah company.

The cost of mining these large ore bodies in the Boundary has varied from \$1.68 to \$2.10 per ton. The problem is how to handle the very large ore bodies without the risk of caving and ruining the mine on the one hand, or the employment of an excessive amount of timbering or leaving in the mine large blocks of pay ore as a support. The Granby Co. uses steam shovels and proposes to decrease the cost of mining by stripping from the surface down to the present level of the railroad track, and by the introduction of the caving system for lower workings.—In February Mines and Minerals, Scranton, Pa.

A well known brokerage firm of Bos-The cost of mining these large ore

A well known brokerage firm of Bos advises its clients that with the dend checks a statement will probably be sent to the shareholders, defining ac-curately the financial condition of the company. The directors, for their own information, have been having the becks carefully audited and the figures should be ready by this time. The di-rectors, however, have no intention of allowing any literary attacks to coerce them into any policy with which they are not in full accord. We do not believe any bona fide stockholders have ever had any difficulty in getting a corr statement of the financial condition of the company from the officers, but we do believe that it is better policy to have such statements sent to all the stockholders and the ground for critic'sm is removed.

LOCAL MARKETS.

In today's local markets, there are not any special changes. Turkeys are about gone, and chickens are becoming scarcer as farmers are finding egg fruit getting plentier. Iambs are scarcer, and if the cold weather on the Atlantic coast does not let up, the Utah fish and oyster markets will suffer thereby. One car of halibut and sal-mon arrived today from Seattle for a prominent Salt Lake house, so that those two wholesome fish are not . But advices from Baltimore that conditions there are no better, with supplies running low and no relief in sight. Prices are likely to adrelief in sight. Prices are likely to advance in consequence. All steamers except those running into Norfolk, have stopped running. New York advices to the same firm state that there have been no oyster or fishing craft in for 12 days, so that the supply is about exhausted, as only five or six days' supply is on hand. The Connecticut stock is scerce, though regular custors. stock is scarce, though regular custo-mers are for the time being attended to. But dealers are receiving new or-

ders subject to delay.

Fine Turkish figs are in the market at
20 cents per pound, and new Syrian
dates are selling at 20 cents per package. Oranges have a slight tendency upwards. The remainder of the markets remain practically unchanged, and prevailing prices today, are:

MARKET SHOWED DULL, HEAVY TONE

Pennsylvania and Ontario Western Heavily Bought but Western Leaders Were Sold.

U. P. AND S. P. WERE DEPRESSED

Persistent Pressure Against Well Known Railroads and Specialties Caused Sharp Decline.

New York, Feb. 9.-While heavy buying f Pennsylvania and Ontario & Western mparted a degree of strength to part of the market there was selling of the westerns leaders, St. Paul, Union Pacific and outhern Pacific were depressed below resterday's closing, while Pennsylvania and Ontario & Western were sin ultaneously put a point above. Selected stocks of the middle west were bid up quite sharply. Prices generally dropped before 1 lo'clock, Long Island, Sloss-Sheffield Steel and Federal Mining rose 1 to b and Detroit Southern preferred and Malting preferred off 1.

Only a few stocks showed any strength, Only a few stocks showed any strength, he general market showing a duil and neavy tone. Illinois Central rose 13, in all. There are gains in Great Northern referred of 7, D. & R. G. preferred 4, Vestern Union 14, Manhattan 13, Detroit southern, 13, and Federal Mining 24, New fork Airbrake fel 315, Mailting prefererd 2, and American Telephone 14, Honds were firm at noon.

The morning's persistent pressure

Bonds were firm at noon.

The morning's persistent pressure against the well known railroads and specialties finally culminated in a rather sharp decline which practically oblit rated the early rise in Pennsylvania and Ontario & West. Over night losses of a point were scored by St. Paul. Un. Pacific, D. & H., Realty and Rubbe. preferred, and many others were down a large fraction. Subsequent buying of the local tractions led by Manhattan which touched 1% helped the market, but the buying elsewhere on the raly was very slight. Metropolitan Street Rallway moved up 14, Metropolitan Street Rallway moved up 14, Metropolitan Scurities 1½. Chicago Terminal preferred 14 and Hocking Valley 1. Federal Mining continued its recent rise and touched 31½, a gain of 64. of 6%.
Interest in the market waned and fluc-tuations were confined to narrow limits.
Prices ruled close to the lowest and the local tractions did not hold their gain.
