and the mountain ravines of their game. "Only last week some of our game wardens made arrests in several coun-ties for dynamiting fish streams, and for the illegal killing of deer. And the streams are so numerous and hunting grounds so scattered that the game wardens, vigilant though they be con-sidering the small amount of their re-muneration, cannot keep track and constant watch over them all. What we need is to have a new fish and game law that will provide for a sufficient number of deputy wardens for the vari-ous counties of the state, at an ade-quate salary to compensate them for spending their time and giving their attention to the matter of protecting the fish and game. There is not enough pay in the positions at present to war-rant a man spending more than a small fraction of his time in guarding the fills and streams, and our lawmak-ers should see to it that at the next session of the legislature a fish and game statute is placed upon the books that will guarantee, as far as the state is concerned, the preservation of the sporting grounds and waters of the commonwealth.
