

## MINING, BUSINESS AND STOCKS

MANAGER DERN  
OF CON. MERCUR

Comes in From Camp and With  
News of Completion of  
New Shaft.

## ON GOLDEN GATE GROUND.

Connection Made With Brickyard  
Tunnel—The Boston-Sun-  
shine Mine.

George H. Dern, general manager of the Consolidated Mercur mines, is in the city today. In camp, he says, things are moving along in about their usual way; however, an event of importance during the past week was the completion of the new No. 5 shaft in Golden Gate ground to a connection with the Brickyard tunnel, which will enable the company to draw on the ore reserves of the Golden Gate mine again to advantage.

The company has done record work in the sinking of this shaft, it having taken just a month and four days to make connection with the tunnel after the first excavations were made at the surface. The Consolidated Mercur mill is handling the usual output of 800 tons daily.

Regarding plans of the new Boston-Sunshine Mining company, recently organized to operate the Sunshine mine, Mr. Dern says the date for the beginning of work has not been fixed as there are some details yet to be attended to relative to the remodeling of the mill. When this is accomplished the signal will be given and a most vigorous campaign will be carried into execution. "There is nothing to do in the mine," said Mr. Dern, "as it has been thoroughly developed and is ready to supply the mill when we get through with the alterations."

## ON MINING EXCHANGE.

## Ohio Copper Sells Under \$2—Closing

There was a little better tone to the stock market today and a market stiffening in prices in some of the tinne issues. Back Tunnel, Black Jack, May Day and Lower Mammoth all improved, while Sioux Consolidated and Seven Troughs held their own.

Ohio Copper is weak and holders of this stock are losing patience and are willing to make sacrifices rather than take chances on the future. The stock sold as low as \$1.95 and offered at the close at \$2.00. Utah Treasure Hill is stronger and sold at 20 cents, with several brokers bidding 19½ for it at the close.

## DOCTORED THE BOOKS.

## Goldfield Mining Men Arrested On a Serious Charge.

A dispatch from Goldfield brings the information that Henry and Arthur Webber, prominent Nevada mine operators, had been placed under arrest charged with embezzling \$20,000 belonging to the Doctor Mining company. The accused were released on \$10,000 bail each.

The complaint is sworn to by Eugene Patterson, a former bookkeeper for the Webbers, but the latter is brought in reality by Captain Thomas Hooper and F. H. Begeles of the Begeles syndicate and White Rocks Mining company, who allege that they paid \$20,000 each to Henry and Arthur Webber for treasury stock in the Doctor Mining company. It is claimed that Patterson, at the instigation of the Webbers, turned the stock ledger which showed that the stock was treasury stock and opened another ledger showing that it was individual stock, and converted the money to their own use.

The Webbers are pioneers in Goldfield and prominent in the business and social affairs of the community. The Begeles syndicate is a Michigan corporation, which owns the control of the Little Chief mine in the Tintic district, Utah.

FINE GOLD FIND  
CREATES INTEREST

Option on Big Block of Stock in  
Seven Troughs Mine  
Expires in July.

## TIED UP AT 10 CENTS A SHARE

Recent Developments Important—  
New Hoisting Plants Ready  
For Operation.

Local officials of the Seven Troughs Fine Gold Mining company have received advice to the effect that a strike of considerable importance has been made in the George and English lease. While the information is lacking in details the message states that the vein is three feet wide, and that assays run high, selected samples showing as much as \$5,000 per ton.

The Fine Gold property is well situated in the district and is regarded by many acquainted with its location as standing a very good show of developing into one of the leading producing mines of the camp. A few more developments of the character of the one just reported makes it safe to predict that the eastern syndicate which holds an option on 400,000 shares of the company's capital stock will exercise it. The option calls for 10 cents a share and the holders have until July 23 to come through with the final payment. At the time the stock was tied up, a payment of \$17,000 was made.

Some splendid developments have been made recently in the Seven Troughs district and there is no longer any reason to doubt that the mines there are going to make good. The recent disclosure made on the Ellipse property has satisfied officials of the company that they are going to get the Mazuma Hills vein and consequently, a bonanza of more than ordinary importance. All that is needed on the Ellipse, said W. J. Craig, a shareholder, today, "is more depth and I guess we will get that after awhile."

By the first of the coming week, two new hoisting plants will be in operation in the Seven Troughs district. The most recent purchasers of such outfits, says the Monette Mining and Milling company, are the Monette group of claims immediately north of the famous property of the Seven Troughs Mining company, and the Seven Troughs district. The new hoisting plant, operating the Gaynor lease on the property of the Seven Troughs Kindergarten Mining company, in Seven Troughs camp, will be in operation of the respective companies about a week ago. A force of miners has been employed on both properties during the last week, and the hoisting plant, both of which stand 36 feet high, is now being erected by the hoists and erecting the huge galvanized frames, both of which stand 36 feet high. The management of both companies expects to have their hoisting plant in operation by the first of the coming week, when sinking operations will be resumed. The shaft on the Monette ground is now down about 100 feet, and the depth of about 100 feet. It is the intention of the management of the companies to sink to a much greater depth than this far, and the work outlined is concerned.

## COPPER EXPORTED.

## (Pollock Special Wire).

New York, April 10.—Yesterday copper exports were 310 tons making, since April 1, a total of \$5,375 tons and this year's total exports for the month were 400 tons, this year 11,520 tons.

## GIROUX CON. BONDS.

## (Pollock Special Wire).

Boston, April 10.—The first installment of 20 per cent on the \$100,000 Giroux Mining company bonds, which are payable May 1, is being paid today. The bonds have not yet been subscribed to their pro-rata proportion of these bonds, for up to the present time, for the \$100,000 bonds, \$50,000 of the \$100,000 offered, \$50,000 remaining in the treasury. The directors as stockholders, subscribed for \$50,000 of the bonds, and the balance of \$50,000 was subscribed by the directors and closely identified persons, and in only by about \$20,000 of the bonds also at 95.

## NEWHOUSE AT GOLDFIELD.

## (Pollock Special Wire).

Samuel Newhouse has taken his first fling in Goldfield, says the Goldfield Review. Before his departure for Goldfield, he gave his check to E. H. Mead, secretary of the January White Rocks Leasing company for enough treasury stock to put Manager Jim Cutler on easy street as far as the work outlined is concerned.

The January White Rocks lease is on the big acreage owned by the White Rocks Mining company, adjoining the January and February claims of the Consolidated, and is offered by well known Utah operators. A shaft 215 feet deep disclosed a vein of magnificent proportions, containing small amounts of gold and silver, the value being in tetradrachme carrying gold. Another 100 feet of depth is being attained as fast as three shifts can sink.

## UNITED STATES SMELTER.

## Will Probably Be July Before Lead Furnaces Are in Operation.

The United States Smelting, Refining & Mining company has a force of 150 men on the pay roll at Bingham Junction, a large portion of which are mechanics.

In an interview yesterday, Asst. Manager Rhodes stated that a number of the lead furnaces will be made before the smelter would be in operation, and that the company is planning to operate up to its capacity. Many of the present roasters are to be replaced by new converter roasters, which are to be built at quite an expense. This new roaster is the result of many experiments during the last year. Addition of the new roaster will be in operation.

## CHINESE SELL COPPER.

## Government Suspends Coinage of Copper Money the Reason.

## (Pollock Special Wire).

Boston, April 10.—The cause of the recent weakness in copper after the United Metals Selling company had established a 15½ cent price for the Chinese government to suspend the further coinage of copper. The result was that Japan immediately offered copper to the United States at a discount of 10 per cent. Chinese merchants offered the re-sale of copper purchased for coinage purposes which had not yet left this country. It is believed that the United States will not put in the price to 13 cents has discounted any further re-sale of the metal. Since Oct. 1, approximately 18,000,000 pounds have been shipped from the United States to China, and other Chinese ports. After a period of 11 months, in which not a pound was shipped to China, exports of the metal commenced last October, and since that time have been reported. The high water mark was in the month of December when 5,600,000 pounds were exported and this figure gradually declined to 1,753,000 pounds in March.
