BALTIMORE FIRE LOSS.

The first definite esti-mate they were able to make on totals was through an Associated Press dis-patch from Albany printed today, giv-ing the losses of companies doing busing the losses of companies doing bus-ings the losses of companies doing bus-liness in New York, reported officially by them to the insurance commissioner of New York. New York, Feb. 19.-During the past six months every steamer belonging to the Furness line, arriving at this port, has landed explosives and big guns, says a World dispatch from Halifax, N. S. They were distributed among the harbor for-tifications. The shift of workmen em-ployed until recently was the largest in the history of the garrison and num-bered 1.800. These men, under direction of engineers from England, working on hight and day shifts, made great changes in the forts and assisted in mounting the new guns, all of which are the latest pattern with disappearing mounts. The old guns were dismounted. Gen. Parsons, commander-in-chief of the imperial forces in Canada, acting un-der orders from the war office, has or-der orders from the var office, has or-deroyal artillery. The order calls for the manning of every fortilication by every available man. All guns will be thorough-ly tested and discharged and searchlights will play every night. 'The decalogue is as good a labor platform as any. In religion we find the highest form of solution offered. Next to religion comes constructive evolution-that evolution which believes in the potency of effort. We are to have a new law of wages, grown out of religious thought. The application of this religious idea is the true solution of
