these sections will be able to send out thousands of tons of ore each week. There are scores of mines in these three districts in which immense deposits of ore have been opened up but on ac-count of the long haul by team to the railroad the ore cannot be marketed at a profit. A smelter located in the Tintic valley, where there are no farms or farmers, would get the bulk if not all of this ore in addition to the output of the Tintic mines. It is the belief of nome of the best informed mining men of the state that within a very few years all of Utah's smelters will be lo-E. M. WEST & Co., stock brokers, D. F. Walker Bik, Tel. 166; res. 3510-z years all of Utah's smellers will be lo-cated along the line of the San Pedro railway between Garfield and Tintic with the bulk of them in the Tintic valley.

Olaus Jeidness, manager of the Ely Consolidated Mining company, is in the survey is doing a most helpful work for mining and that incidentally its work city to confer with local representatives of that corporation. He is on his way to Spokane, where the members of his

BEN LLOYD STRIKES IT.

Gets Into Seven Troughs District Early in the Game.

(Special to the "News.") Lovelock, Nev., Dec. 18,-Unimpeach-able words come to Lovelock from Vernon that another extremely rich strike of gold ore running into the thousands has just been made within a quarter of a mile of the town of Vernon in the Seven Troughs mining district, by H. W. Knickerbrocker of Goldheid and Ben Lloyd of Sait Lake City Utah. City, Utah. The strike is in the foot of the hills

and adjoins the Moler mine on the south. Two veins have been discovsouth. Two veins have been discov-ered and opened up one runs north and south and the other east and west. The rich strikes on each is not to ex-ceed 100 feet apart. The finders have a force of men trenching along the veins and expect even greater things when the intersection of the two is smached. A line of saveral chafts has reached. A line of several shafts has been determined upon and a thousand

been determined upon and a thousand sacks have been ordered. This is one of the richest as well as one of the largest and most important strikes yet made in the Seven Troughs district, which many predict will yet prove to be the greatest mining camp in Nevada. Knickerbrocker and Lloyd are both at camp but the rumor seems are both at camp but the rumor seems well grounded that a strong company will soon be incorporated.

VISITED BINGHAM TODAY.

Samuel E. Reinhard Looking Over Utah's Great Copper Camp.

Sidney M. Bamberger left for Bingham this morning, accompanied by Samuel E. Reinhard, a prominent busi-ness man and capitalist of Baltimore. who arrived in the city several days ago to look after local mining interests. Mr. Reinhold is a large shareholder in the Carisa Copper & Gold Mining com-pany in the Tintle district. He made an inspection of that property on Sun-day and returned very well pleased with

"I believe," said Mr. Reinhold this morning, "that the Carisa is a good morning, "that the Carisa is very large mine. While there are some very large ore bodies already developed. I am firmly of the opinion that the mine contains other big ore reserves as ye adeveloped. With more depth I feel aufident that the Carisa will become confident one of the greatest properties in the Tiptle district."

YERINGTON GETTING ACTIVE.

People of That Town Anticipate a Big-Initax of People.

The taking hold of the Nevada Doug-las, Mason Valley and other mides in the Yerington, Nev., district by Salt Lake people has started a boom in that coming copper camp, and Yering-ton people are talking about a pop-ulation for their town of from 15,600 to 25,600 in the near future as a conse-quence of the extensive mining opera-

tions to be carried on there. A few days ago a new chamber of commerce was organized, the purpose of which is to promote the general welfare of the district and town. A welfare of the district and town. A resolution was passed at the meeting urging upon Nevbada's representatives in Congress to lead their aid towards an immediate investigation of the re-gion by representatives of the United States geological survey, thereby recog-nizing the value of this service to the mining man. The following is a copy of the resolutions forwarded to Wash-inston.

is doing more than any other agency to put an end to fraudulent mining schemes. Those who cannot readily understand all this may take the word of honest miners for it. We urge upon our Congress the greatest liberality consistent with rea-son toward our conjugical unverse and is doing more than any other agency to

son, toward our geological survey and request them to enable it to do more work in the mining states. But we ex-pressly request that the study of flas district be put in the hands of only the most capable men in the service At the present time the company is sinking three shafts, but two others will be started right after he gets back and those who have had experience in the study of the great copper deposits of Utah and Arizona.

of Utah and Arizona. We candidly believe we have a cop-per deposit greater than anything known in Utah or Arizona, and we manifest our faith in it by this request will be started right after he gets back from the northwest. The American shaft is now down to a depth of 379 feet, the Brilliant, 260 feet and the Zack, over 300 feet. The latter has been penetrating the ore zone for some-time and the ore being taken therefrom is being piled upon the dump for future disposition manifest our faith in it by this request to have its character and value passed upon by an authority so high and un-biased as the United States geological survey; and. Resolved, That the secretary of this meeting be instructed to forward to each of our senators, and to the press, a copy of this resolution.

PARK CITY MINES.

Ore From N. Y. Bonanza Nets \$95 Per

Ton-Other News Lack of Railroad Equipment Retards The returns from the last 55-ton The returns from the last 55-ton shipment from the New York Bonanza were 16 per cent lead, 125.4 ounces sil-ver and .07-100 gold, netting the com-pany something over \$95 per ton, says the Record of Park City. The work at the mine is progressing spiendidly, and an average of two tons of high grade ore is being raised daily. Stoping on the 760 continues and a drift is now being run from the 800 level to cut the ore that is on the 760 and which will undonbredly prove up bigger and betto Eureka, Nevada, where that corporaka and other properties. Conditions ment. undoubtedly prove up bigger and bet-ter as depth is attained. The skip has not yet been installed owing to delay in making it in Salt Lake, and it may be the first of the year before this will be in operation. Work is going steadily forward, however, and conditions were never more favorable.

An eastern capitalist, who is interested to a considerable extent in Park City, in a recent communication to this office, gives it as his opinion that the office, gives it as his opinion that the first "deep" shaft sunk in this district will result in a big copper mine, and especially would this be the case on the Ontarlo vein. He draws a com-parison with the Anaconda of Butte, which was a marvelausly rich slived proposition on the upper levels, and at greated depth great deposits of copper were uncovered. This he believes will be the case with the Ontario. Supt. Jones of the Liftle Boll has a force of men at work at the mine, mak-

Refining force of men at work at the mine, makits some minor changes and improve-ments at the heisting works, which will make things more convenient and bet-ter. There were 106 meu on the pay-roil at the mine this month, and the property is rapidly opening up into one of the camp's biggest bonanzas. The company is well equipped to prosecute development work, and has am-ple ore-storage room and also a wellregulated boardinghouse for its employes.
