SESSION OF PROVO CITY COUNCIL

Prohibition Ordinance Read First Time and Consideration Deferred Two Weeks.

(Special Correspondence.)
 PROVO, Aug. 17.—At the session of the city council last night the committee on Judiciary reported the draft for the prohibition ordinance read Oct. 10, and which the convention asked the council of the various cities in the county to enact before Oct. 1. The ordinance passed its first reading and was laid on the table for two weeks.

It is very short and strict, providing that the manufacture and sale of liquor in Provo city is a misdemeanor punishable with a fine of not less than \$50, nor more than \$250, and in addition imprisonment not to exceed six months. The ordinance is to take effect Jan. 1, 1910.

Councilman Carter opposed the ordinance on the grounds that it did not specifically mention the sale of liquor, but that the number of clubs would be organized in order to evade the ordinance.

President Powell explained that the attorneys who had drafted the ordinance were of the opinion that the clubs would be subject to its provisions the same as persons. While there was some difference in court decisions on the question of the right of clubs to dispose of liquor, he was of the opinion that if the law did not reach clubs it could and would be amended.

Councilman Beebe wanted the question of county prohibition considered because he considered it worse to have saloons all around the city under county license, than in the city, where they could be under control.

President Powell spoke of the necessity for doing something to prohibit the sale of liquor, and conform to the wishes of the people; he did not expect that a prohibition ordinance would entirely stop the sale of liquor, nor that the time would soon come when all conditions would be favorable to prohibition. He was not in favor of waiting long such a time, but to do something for the cause at once.

Councilmen Knudson, Giles and Jensen spoke in favor of the ordinance. Councilman Craner was of the opinion that as between prohibition, such as it was, and liquor, he was in favor of the former.

Councilman Newell preferred saloons in the city to saloons on the outskirts. He said that the whisky sold outside of the city would not be so good as the whisky sold in Provo. It would be better to have the city create more trouble than the brand disposed of in the city saloons.

Further consideration was deferred for two weeks.

A communication was received from Ira Cole of Lima, Ohio, asking whether a franchise could be obtained for a gas plant, and asking for other related information. Mr. Cole stated that he wanted to establish an oil gas plant referred to the mayor.

The committee on railroads and telegraph lines reported that the Independent Telephone company was now dissatisfied with its franchise, and asked for further time to report on the Bell Telephone company's franchise so that the committee could consider both matters together. The additional time was given, and the city recorder was asked to obtain information in regard to the franchise of the Bell Telephone company in other cities similar in size to Provo.

A resolution creating sewer district No. 11, comprising almost the entire east half of the city, was passed. The system is 24.48 linear feet and will cost \$47,883, or \$1.33 per linear foot. Sept. 8 was set as the time for hearing objections.

PEOPLE OF JUAB COUNTY FAVOR PROHIBITION

Citizens in Mass Meeting at Nephi Adopt Strong Resolution Against Liquor Traffic.

(Special Correspondence.)
 NEPHI, Juab Co., Aug. 13.—At the mass meeting called by the county commissioners Monday evening, Aug. 9, to consider the question of prohibition and get an expression of the people as to their desires upon this most important question, the following resolution was presented by Mr. William Bailey and unanimously adopted:

"Inasmuch as the county commissioners of Juab county have taken for an expression of the people of this end of the county upon the question of prohibition, therefore be it resolved that we favor the prohibiting of the manufacture and sale of intoxicating beverages, except for medical purposes, prescribed by the signature of a regular practicing physician, and except for scientific purposes, no sale to be made except under the signature of presidents and superintendents of institutions of higher learning; also that proper committees be appointed at this meeting to put into effect the intent of the resolution."

Accordingly the following executive committee was appointed: Roy T. Homer, chairman; James W. Paxman, William H. Pettigrew, George A. Sperry, John W. Cold, Alonzo Ingram, Chairman I. H. Grace of the meeting urged that the committee get to work immediately and make a report to the citizens of their findings at a meeting to be called by said committee.

DESPITE SUMMER FROST CANADA CROPS THRIVE

(Special Correspondence.)
 RAYMOND ALTA, Canada, Aug. 7.—The Utah excursionists landed here yesterday morning safe and well. There was something over 150 in the party, composed mostly of people visiting relatives in Canada. As a touch of frost occurred during the night preceding their arrival, some of the company set us down as residents of a country almost uninhabitable on account of cold. The excursionists will be distributed along the branch railway from Stirling on the main line to Raymond, Alameda and Cardston, the end of the branch line.

Despite the light frost night before last, there are today tomatoes well along toward the ripening stage in some of the Raymond gardens. Crops look excellent and harvesting will commence next week, the yield should be generally good, and farmers who have farmed properly, owing to the high price of grain, will have a bank account of such proportions as have not been enjoyed for several years. The beet crop is good, and the fact that the year's struggle with weeds has been the most severe in the history of the district.

A goodly number of citizens have been visitors at the A. Y. P. exposition, all of whom give glowing accounts of the prominent place Utah occupies at the great fair, which fills the old state house with visitors.

The contract for the waterworks system for Raymond, has been let to a firm of Toronto engineers, the Galt and Smith, who will be doing the laying of the lines where pipes will be laid. The contract provides for about seven miles of pipe including the line from the spring which is a couple of miles south of the town. The source of supply is ample for a town of 5,000 people, (we have 2,000) and can be increased to accommodate twice that number if necessary. The estimated cost will be \$40,000, and within a few days a bylaw will be submitted to the ratepayers, which if passed upon favorably, will authorize the municipal authorities to install the system.

Mr. Roy Brewerton a former Salt Lake Laker, recently returned, bringing with him Mrs. Roy Brewerton, nee Miss Laura Poulton of Salt Lake, happily surprising his relatives and friends here. Mrs. Brewerton will doubtless prove a most valuable addition to our society, being, as she is, the possessor of a beautiful voice as well as a charming personality.

It may be of interest to her Salt Lake friends to know that Mrs. Jennie Alford Brandon, with her husband and her own dramatic company, pays Raymond occasional professional visits. They are located in the metropolis of Southern Alberta, Lethbridge, where they have a theater, which is one of a chain they control in the province. The lady is a great favorite with theater goers, and satisfying the public seems to be amply satisfactory to the lady herself.

The Canada country is booming and thousands of citizens will be added to its population this year. The states, and in fact from all over the world, as Canada is coming to be recognized as "the land of opportunity."
