THE BILL TO EXECUTE THE LAWS IN UTAH. - Washington, Feb. 17.—The bad condition of affairs in Utah, owing to the disorganized condition of the courts there, is now a subject for consideration by the Senate committee on the judiciary. The President's de- Frederesson A sire to have the laws executed in that territory and his personal visit Gillman F to the Capitol to consult with both Graham B the Senate and House committees on the judiciary, has induced the Hanr C Senate committee to take prompt | Hadley M A action upon the subject. They Hamlin R Homer M A have had several meetings upon Senator Frelinghuysen's bill in aid of the execution of the laws of the Jenkins J territory of Utah, and will report it very soon, but it will be greatly Kingsbury MO amended. The bill is now undergoing a very thorough discussion in Linderoth M Longstrom MLyon ML committee.—Indianapolis Journal. Loeber C

THE TRUTH.-In the whole United States there is not a Baking Powder or Flavoring extract, that is so valuable, so positive, so effectual in producing the most elegant and healthful bread and biscuits, the most deli- Isaacson cious, desirable, and delicate flavored cakes, pastry, ice cream, etc., as Dr. Price's justly celebrated Cream Baking Powder and Special Flavorings, Almond, Lemon, and aromatic flavors. Try them and you will be delighted with their true qualities and find Jenks M that they are far superior to anything in their line. d79 s w 1e

Farmer should Without Them!

L. SMITH has recently II. applied for a Patent for a

CLOD CRUSHER & WORM DESTROYER,

which is said to surpass anything ever of-fered to the Farming Community. The advantages claimed by Mr. Smith are as follows:

1st. It runs easier than any other land

near the surface.

3rd. It is a better clod crusher or pulveriser than any other manufactured. One grizzly Steer, coming two years old, This roller is a construction of seventeen

clod crusher, land press, or cultivator, as it leaves sixteen small furrows four inches apart each time it passes over the land. Those sowing broadcast have only to sit on the back of the roller and sow the seed, which, falling in the furrows, is covered with a brush harrow. Again, it is only necessary after the seed is up to commence with the roller half a furrow out and you I. I. QUORS, have a water furrow on each side of seed. In conclusion I have only to add, where this implement is used an increase of one third the usual crop is the result.
