The skin is not simply an outer covering of the body, but through its usands of pores and glands it performs the great and necessary work of regulating our temperatures, and also assists in disposing of the refuse and waste matters of the system by the constant evaporation that goes on through these little tubes. To perform these duties the tissues and fibres hich connect and surround the porce and glands must be continually nourshed by pure blood. When from any cause the circulation becomes infected with impurities and humors, it loses its strengthening powers and begins to disease and irritate the delicate tissues, and produces Eczema, Acne, Tetter, or some other itching, disfiguring skin trouble. S.S.S. cures skin diseases of every kind by going down into the circulation and neutralizing and removing the impurities and humors. It changes the quality of the blood from an acrid, flery fluid to a cooling, health-producing stream, which, instead of initial. irritating and inflaming the skin, cures and nourishes it by its soothing, healthful qualities. Salves, washes, lotions, etc., may be used for any tem-Porary comfort or cleanliness they afford, but skin diseases cannot be cured until S. S. S. has purified the blood.
