

There is to be a Domestic conference of the students in the Provo school building, next Sunday, to which representatives from the Provo school have been invited. Elder Stephen Chipman, President of the Alpine Stake, will be one of the speakers, and will accompany President Chipman to Beaver on next Friday evening's train.

The lawn surrounding the training school building was left uncompleted, owing to the insufficiency of teams to haul soil during the day the preparatory students were at work two weeks ago. It is hoped that so excellent a project will be carried out according to the original intentions of the school.

Miss Virginia Brann, of the class of 1906, "silently stole away" a few weeks ago, and was married to her mission-ary lover, Mr. Anderson. They spent a few days in Provo just previous to the conference, dispensing smiles and receiving congratulations. "Lucky girl" was one of the frequent exclamations made by Miss Brann's young lady associates.

The continued cold weather has interfered with the well-planned plan of celebrating next Saturday as the anniversary of Expedition day, by a camp out in Provo canyon. The boys had many cold days and nights on their trip without serious effect, but that is scarcely a reason for not fearing the consequences of a single night out in the mountains at the present time.

The undisturbed middle—Prof. Hickman perplexed his class in psychology the other day by this syllogism, the premises of which they readily agreed to but wanted to dodge the conclusion: To wear false teeth is to deceive; to deceive is sinful; therefore to wear false teeth is sinful.

One day last week the Herald, through its Provo column, announced that Prof. N. L. Nelson and others, including Prof. Keeler and Prof. Swenson—had been granted permission to run a "saloon" on Third East street. Since then these professors have been busy explaining that the correspondent evidently meant to write "sawer."

The latest work attempted by the students is the draining of the north-western park, which was turned over by the city to the sporting fraternity as an athletic field. It is hoped to get it in shape for all the spring contests. A number of students from each class with picks, shovels and rubber boots, assembled on the ground last Wednesday for the purpose in hand.

The choir is vigorously working on a new opera, entitled "Ermine," by Jacobowski. This will be the third presented by the school of music during recent years. The music of this opera is not equal in dignity to the "Daughter of the Regiment," presented two years ago. Its only redeeming feature is the sprightliness of the songs in "Priscilla," presented three years ago. Practically the whole of the chorus will appear in this new role.

Mrs. Ella Wheeler Wilcox was programmed to be present at devotional exercises next Friday morning, but the lateness of the trains from California precluded that possibility. The students and teachers who were aware of the arrangement are much disappointed. Mrs. Wilcox has a host of admirers among the students in literature. The lady remains in the state for two days Saturday and Sunday, under the auspices of the president of the State Kindergarten association, Mrs. Ida S. Dusenberry.

The children in Miss Broadbent's department of the training school are emphasizing relief work in paper mache. Miss Ballard continues the study of pond life, in which the students-in-training are much interested. Miss Talmage is doing some interesting work in connection with the geography of Mexico, studying Mexican songs, weaving Mexican baskets, and building models of Mexican houses. Miss Schramm is devoting her time especially to color-work in subjects relating to the current season of the year.

#### WEBER STAKE ACADEMY.

Ordin—Principal McKay was absent two days this week through illness. We were all pleased to see his face again on Wednesday morning.

President Shurtliff visited the academy on Monday last, and spoke to the students during the "theology hour." He also visited some classes and was well pleased with what he saw and heard.

Our first match game of basketball between our girls and the ladies' team of the B. Y. college of Logan is now in progress at the Lester park pavilion. The results cannot be given until our next writing, but we feel safe in predicting that we will win.

The executive committee of the Athletic association at its meeting last Wednesday appointed Miss Lizzie McKay captain of the basketball team.

The night school students went in a body to hear Elder Roberts at the tabernacle last Tuesday night. His subject, "Succession in the Presidency," was in direct line with what the theology class has been considering.

Our baseball boys are showing up nicely. A city league was organized last Thursday afternoon with Prof. Alfred Nelson as president.

Arbor day was fittingly observed by the faculty and students. Regular class work went on until 12 o'clock, when the students and faculty assembled and listened to a program which reflected credit upon "poet" Widdison, who read an excellent poem composed for the occasion, and Chas. Saunders, who gave an address upon Arbor day. On the grounds the school assembled and before the "planting exercises" began the school sang "America." Each class was busy in a momentary effort to decorate the grounds with shrubs, evergreens, flowers and a hedge, all of which will greet them on every alumni day, reminding them they have done some little good.

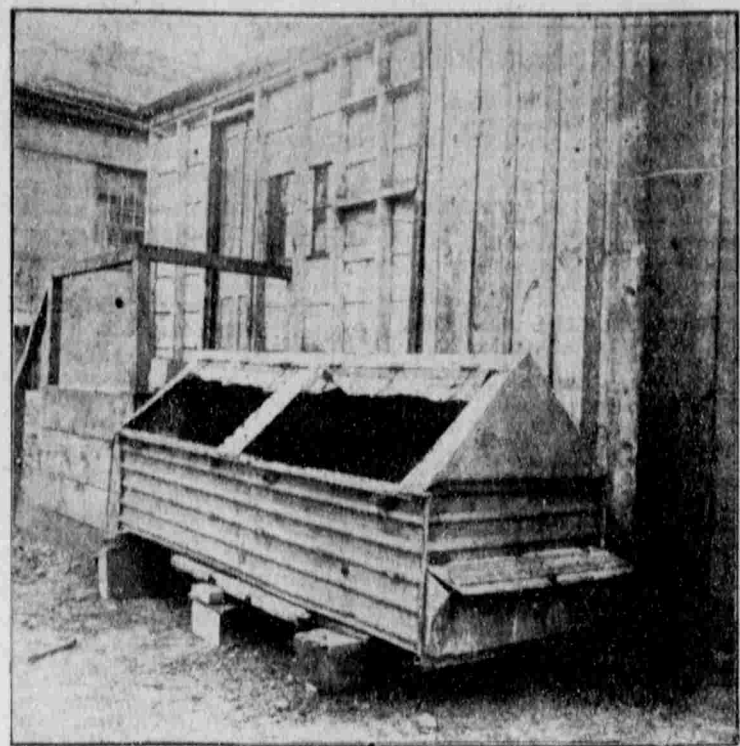

Photo by Harry Shipley.

#### A POWDER MAGAZINE.

The above half-tone is the production of a photograph of a relic that is a decided and fairly well-preserved reminder of the strenuousness of the early days of Utah's career. Through the efforts of Hon. Spencer Clawson it has been secured for the collection of Pioneer articles that is being constantly added to by the State Historical Society. In 1858 when the fallacious idea was widely circulated that the "Mormons" were in open rebellion against the government and when 2,600 troops were sent to Utah to settle by force of arms, if necessary, the question involved, Gen. Harney was in command. But his conduct was such that he was superseded by General Albert Sidney Johnston, who fell fighting for the "Lost Cause" at Shiloh.

It is good for the pleasure of those who follow.

At the close of the outdoor exercises Miss Jennette McKay read the poem "Planting the Apple Tree," after which three cheers were given for the four classes and a rousing "yell" for the academy.

#### BEAVER BRANCH.

Beaver, April 16.—At Polysophical Institute evening, "The Content of Musical Composition" was discussed by instructor Alfred M. Durham, and illustrations, piano and vocal, were given from Beethoven, Schubert, Leybach and other composers.

Yesterday was an ideal day and the teachers and students used it to good advantage by planting out several trees and beautifying the grounds to the east and west of the high school building.

Lunch was served by the young ladies on the campus. A game of baseball between Beaver and the academy team was played in the afternoon and a free matinee in the evening for all who had taken part in the labors of the day. A short program was given at 9 a. m., consisting of appropriate songs by members of the music department and an Arbor day address by Miss Mamie Ollerion.

Elders M. F. Cowley and Ezra Woolley visited us on Monday morning and spoke to the students at devotional.

Next Sunday a domestic ward conference will be held here. President Cluff and other visitors from the north will be in attendance.

The Misses Therese and Mabel Macer gave a very successful Easter party on Saturday evening, about 30 guests being present.

#### AGRICULTURAL COLLEGE

Logan—Mr. Elmer Stearns, a horticulturist of note from Los Angeles, visited the college last Wednesday.

Prest, Kerr, director from Utah of the National Educational association, will meet with the officers and executive committee of the Utah State Teachers' association, at Salt Lake City, next week for the purpose of discussing ways and means to obtain the meeting of the N. E. A. for 1904 or 1905, for Salt Lake. Prest, Kerr reports the prospects good for a large attendance from this state at the meeting in Boston next July.

The 15th annual report of the experimental station is now ready for distribution.

The work of the season has begun on the alkali farm west of the Jordan. From present indications the work of reclamation will be successful.

Prof. Ball gave a lecture last Tuesday to the city teachers on the subject of Nature Study.

The girls in the physical culture class will give a hall in the gymnasium next Saturday evening.

Dr. Whitte and Prof. Merrill came in Wednesday morning from St. George where they have been with Trustee Whitte looking up desirable sites for the dry farm experiments. On Thursday morning they left for Moab and Green River in continuation of their inspection tour.

The Sorosis society has had its room papered and has purchased some beautiful pictures to adorn the walls.

Prof. Ball addressed the farmers of

The expedition against Utah was not a brilliant success, though it was in many respects a hard one. Transportation in those days of heavy wagons and mule and ox-teams was not what it is in the era of the great iron horse in which the present generation lives. Some articles had to be transported with unusual care. Among them were the powder boxes or magazines like the one shown in this picture, which still has upon it the initials "U. S." as plain as they ever were. It is a metallic bound box and was bought by President Young at the time he purchased a great quantity of government supplies on the return of the troops to take part in the Civil war. It was brought from Camp Floyd at that time and has fortunately been well preserved up to the present.

The Fifth ward at an institute last Thursday evening.

Professors Merrill and Clark are planning some interesting co-operative soil experiments.

Mrs. Goodwin resumed her duties at the library last Tuesday after an absence of a week on account of illness.

Principal A. E. Wilson of the Ogden High school, accepted the chair of modern languages at the college. He comes to the work well equipped, and after years of successful experience as teacher and principal in the Ogden High school.

Prof. J. H. Bexell of Rock Island, Illinois, has been engaged as professor of commerce, the position made vacant by the resignation of Prof. Burchell. He is a man of liberal culture and special training in commerce, banking, and finance. He has been a graduate student at the University of Minnesota and the University of Chicago, and holds the degree of A. M. from the latter institution.

Last Wednesday was observed as Arbor day at the college. The faculty and students assembled in the chapel at 10 o'clock when the following program was rendered:

Music ..... Orchestra  
Recitation ..... Miss Pike  
Address ..... Prof. Hunt  
Music ..... Orchestra  
Recitation ..... Miss Love

From the chapel the audience repaired to the great slope of the campus, where trees were planted by the various classes and societies, while excellent music was dispensed by the college band, and appropriate addresses were made by the representatives of the classes. Dancing was engaged in by the students in the gymnasium from 2:30 to 3, music being furnished by the college orchestra.

#### IS GERMANY CAPTURING THE OCEAN?

(Continued from page seventeen.)

84 miles by rail from Berlin and 69 miles from the Baltic. The way is through a thirsty, sandy country, where women spade the fields under men as overseers, and where all toil in the sand for a bare living. The soil is so poor that it will grow little more than Christmas trees. Some parts of it are planted with pines and the forests are as carefully kept as we keep our gardens.

After several hours we came to Stettin. It has about 250,000 people and its shipbuilding works and other factories are making it grow. It has like Hamburg a free port so that steamers from New York can come right to the city and unload the food stuffs which are shipped there for the North German trade.

#### THE VULCAN WORKS.

Its shipyards are on the edge of the city. They are known as the Vulcan works and are celebrated the world over as having turned out the Deutschland, the Kronprinz Wilhelm and other famous vessels. The new steamer Kaiser Wilhelm der Zweite was still in the yards at the time of my visit; it is prophesied that it will surpass anything now on the ocean in speed.

I saw ships building there for the czar and the mikado; and also in course of construction vessels for the German navy, and merchant ships for all of the world.

These yards employ about 8,000 men,

and are increasing their force right along. They have a steady job on the German navy, and do an outside business running high into the millions. Ships like the Deutschland and Kaiser Wilhelm der Grosse cost something like \$3,000,000 apiece, and many a man-of-war costs more.

The Vulcan works have been in operation for more than 50 years, making both ships and locomotives. They have made more than 2,000 locomotives and a very large number of vessels of various sizes. They began with a capital of half a million dollars, which they increased to \$7,000,000, and this based upon the enlargement of their works.

The yards now cover about 100 acres. I took a naphtha launch and rode by them, going a long distance by a steel framework of steel 100 feet high, built for constructing their enormous vessels.

There was an elevated railroad on top of this framework with cars upon it, shifting the plates of armor and steel which form the shells of such vessels, and dropping them into place under the direction of overseers. Several vessels were in the framework at the time, and the din of many hammers could be heard far up and down the Oder.

During my stay in Germany I have met some of these shipbuilders. They apparently have little fear of holding their own. They use the best of materials, importing much of their iron from Sweden, and they have excellent mechanical engineers. Their labor is far better than ours, and they can furnish better work for the money than we can.

FRANK G. CARPENTER.

#### Good For Children.

The pleasant to take and harmless One Minute Cough Cure gives immediate relief in all cases of Cough, Croup and La Grippe because it does not pass immediately into the stomach, but takes effect right at the seat of the trouble. It draws out the inflammation, heals and soothes and cures permanently by enabling the lungs to contribute pure life-giving and life-sustaining oxygen to the blood and tissues. Z. C. M. I. Drug Store, 112-114 Main Street.

#### What to Eat.

This matter will be found to be entirely different from and superior to the usual run of food articles, in that every item is a nugget of culinary wisdom and eminently practical. Conducted by Katherine Kurtz, Marquette Building, Chicago, to whom all inquiries should be addressed. All rights reserved by Banning Co., Chicago.

#### Menus for Next Three Days.

##### SUNDAY.

##### BREAKFAST.

Cereal. Fruit. Cream.  
Breaded Veal Cutlets. Cramed Potatoes.  
Waffles. Coffee.  
Maple Syrup.

##### DINNER.

Bolled Mutton. Mint Soup.  
Cucumber and Caper Sauce.  
Browned Potatoes.  
Spinach. Lettuce. Stewed Onions.

##### SUPPER.

Lobster Salad. Small Rolls.  
Spiced Fruit. Plain Cake.  
Cocoa.

##### MONDAY.

##### BREAKFAST.

Sliced Bananas and Oranges.  
Grilled Ham. Stewed Potatoes.  
Toast. Coffee.

##### LUNCHEON.

Sliced Cold Mutton. Hot Potato Salad.  
Butter Cakes. Tea.

##### DINNER.

Tomato Soup.  
Broiled White Fish. Parsley Butter.  
Baked Potatoes. Hot Spiced Beets.  
Cucumbers. Coffee.

##### TUESDAY.

##### BREAKFAST.

Cereal. Fruit. Cream.  
Creamed Dried Beef. Hominy.  
Rolls. Coffee.

##### LUNCHEON.

Minced Mutton on Toast.  
Canned Fruit. Macaroni and Cheese.  
Coffee Cake.

##### DINNER.

Clear Soup.  
Broiled Steak. Masked Potatoes.  
Creamed Carrots. Cold Salad.  
Junket. Coffee.

##### Jelly Sauce.

Dissolve a cup of tart fruit jelly in a pint of boiling water, then add sugar to taste, according to the acidity of the jelly, but do not make the sauce very sweet as it should be served with sweet pudding. Thicken with a tablespoonful of moistened cornstarch or arrowroot and flavor with a little grated nutmeg. Fruit jams may be used instead of jellies for sauces.

##### Custard Sauce.

Beat the yolks of four eggs with four tablespoonfuls of sugar until creamy. Pour on rapidly, a pint of milk, a pint of scalded milk. Return to the fire and stir and cook just long enough to cook the raw flavor from the eggs, but not long enough to thicken very much. Then remove from the fire; flavor with a teaspoonful of vanilla and beat for about 10 minutes to make it light. This may be served hot or cold.

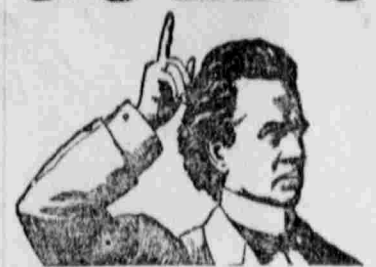

##### Chocolate Sauce.

Put a cup of sugar and one of water in a saucepan and boil hard for five minutes. Remove from the fire to cool and then stir in rapidly four ounces of grated chocolate dissolved over hot water and flavor with a teaspoonful of vanilla. Stand over hot water until about ready to serve; then add a cup of cream and whip for five minutes.

##### Sabanyon Sauce.

Put two whole eggs and two yolks in the double boiler; beat until mixed and then add two-thirds of a cup of sugar and beat thoroughly. Set over the lower part of boiler containing water that is not but not actually boiling. Beat until the sugar melts and the eggs begin to

## COLDS

I know that my Cold Cure will break up any form of cold in a few hours—MUNYON.

MUNYON'S COLD CURE cures cold in the head, cold on the lungs, old colds, new colds and influenza, and all forms of throat and lung ailments. It relieves the head, nose, throat and lungs almost instantly. It prevents pneumonia, grippe and diphtheria.

Price 25c. at any drug store. If you have Rheumatism try Munyon's Rheumatism Cure; if you have Dyspepsia try his Dyspepsia Cure; if you have any Kidney trouble try his Kidney Cure. Munyon has a specific ready for most every disease: mostly 25 cents.

MUNYON, Phila., Pa.

## "Bounce"

If you want to be rid of that stomach heaviness after eating breakfast and in its place have that feeling of "bounce"—an elastic step—a bright eye—an alert mind and the spirit to dare and do, try this simple yet satisfying dish for breakfast—

SHREDDED WHEAT BISCUITS. Dip Biscuit quickly in hot or cold milk or water, with a little salt.

added. Serve with Cream and Sugar. Fruit and Fruit Juices served with Shredded Wheat Biscuits also make an appetizing dish and served as Toast it is a Treat.

Perfectly digestible and wholly nourishes the whole body. Sold by all grocers. Read for "The Wheat Biscuit" Cook Book, illustrated in colors FREE.

The Natural Food Co., Niagara Falls, N.Y.

thicken; then add slowly, beating rapidly, half a cup of sherry wine. Cook a little longer until the sauce thickens to about the consistency of a custard, then at once turn into a cold dish to stop further cooking and serve immediately. If you do not use wine, tart orange juice with a little lemon juice added may be used.

#### Meringue Sauce.

Whip the whites of three eggs to a stiff froth. Take as many spoonfuls of sugar as you have egg whites; put the sugar on to boil with enough water to dissolve it and cook until it will spin a thread when dropped from the point of a spoon. Pour this slowly into the white of egg, beating all the time; then stand it over warm water and beat with an egg whip for a minute longer. Add a little lemon juice or wine or whip in two tablespoonfuls of currant jelly.

#### Inquiries Answered.

Mrs. E. C. B. writes: Will you be kind enough to inform me how to make an orange marmalade, using one dozen medium sized oranges. Also lemon jelly.

#### Orange Marmalade.

Slice one dozen medium sized thin-skinned oranges (dark yellow variety) and without peeling cut into very thin slices; remove all seeds and cores, put in a porcelain kettle, cover with six quarts of cold water and let stand for 24 hours. Then put over the fire with some water and boil until skin is tender, add seven pounds of granulated sugar and boil steadily but slowly until clear and thick as jelly. Turn into glasses when cold, cover with thick white paper or paraffin.

#### WANT IT UNDERSTOOD.

She was evidently a farmer's daughter, and he was a broad-backed, red-handed young man of 23, and as they landed at the Detroit and Milwaukee depot, the other day, even the newsboys hags it was this fact that determined their action, for they walked straight up to the police officer standing in the door, and the bridegroom said:

"Officer, we was married yesterday."

"Glad to hear it," was the reply.

"We are now on our way to the bride's home. We are going to be in Detroit three or four days."

"That's right."

"We shall walk up and down and go where we darn please. Sarah may have had of my arm, or I may have it around her waist."

"I see."

"If we want to stop and kiss we are gins to do it, and we shan't care who is lookin' on."

"That's your play," smiled the officer. "You can also chew gum and walk hand in hand if you want to. Anything you wanted to ask about?"

"Only jest this," sturdily replied the groom. "There will be fellows who will huckle and grin, and there will be fellows who will call out, 'Ah, there!' to us."

"It may be so."

"It will be so, and you jest say to the newspapers, and let them say to everybody else, that the undersigned stands ready to chuck all the chucklers, and the 'Ah, there!' will find themselves so tangled up that the 'You there' and the 'Oh, there' and all the other things in town won't be able to separate the pieces. Officer, look at that! I don't mind if you chuck at me!" Detroit Free Press.
