Recent experiments show that all classes of foods may be completely di-gested by a preparation called Kodol Dyspepsia Cure, which absolutely di-gests what you eat. As it is the only combination of all the natural digest-ants ever devised the demand for it has become enormous. Bishop L. L. Hatch Expresses Hopeful Views on Coming Industry.

Special Correspondence. Boise, Idaho, Feb. 21 .- Bishop L. L.

Hatch returned to his home at Franklin, Oneida county, this evening, after a pleasant stay in this city, it being his first visit to Boise. Mrs. Hatch was with him,

Bishop Hatch is one of the best known of the "Mormon" Elders of southern Idaho, and has the respect of all who know him. Before the train left last evening he consented to an interview upon the resources and ad-vantages of the section in which he

The most important thing in that section this winter," said he, "Is the sheep industry. Within a short distance of Franklin there are ten winter hambing plants in operation, and they are lambing about 18,000 lambs. This of course gives employment to a great number of people and makes business seem livelier than for some time past. "The sheep men are feeding sugar beets which were raised there. I am prone to believe the sugar beet industry is going to become the one of most importance in southern Idaho at least. We raise a beet there which is equal to that of any other section, There is always a very good profit in the indus-try. Last year I made an experiment on some land I own, and at the end of the season, I found I had paid all expenses of raising the beets and had a clear profit of \$39 per acre. Others can and will do as well. The Logan beet and will do as well. The Logan beet sugar refinery is making contracts to pay for this year's crop \$4 per ton, on board the cars. There is a nice profit in this price, and it will have a contract to change to cause a larger certain tendency to cause a larger acreage in this crop this year, and a consequent greater prosperity for our people

He was born in Denmark Aug, 31, 1848, the son of Jens and Mary Jensen. He joined the Church in his home. They can take small tracts from their parents' farms and settle down Aug. 31, 1846, the soli of Jens and analy Jensen. He joined the Church in his native land, came to Utah in 1862, locat-ing in this place, where, as he grew to manhoad, he took part in the tolls and struggles of a pioneer's life. He bore and make a good living from the beets they can raise. The fact that beet sugar is coming into very general use gives us surety for the future. "Mrs. Hatch and I have never been in was a member of Capt. Seeley's emi-grant company in 1868. Was on the

Boise before and I may say we are perfectly delighted with it in every way. It is handsomly laid out and kept up, and the climate is excellent. From a casual bservation I should say this section admirably adapted to the raising the sugar beet. I am somewhat of an enthusiast on this subject, and believe and hope I shall see the time when, where the soil permits, there will be beet sugar farms all over this fair State of ours,"
