THE OLD RELIABLE POWDER **Absolutely Pure** TH ERE IS NO SUBSTITUTE

Miss Mary Ockander, who is about to take her departure on a mission, will be tendered a farewell party in the Fourteenth ward assembly hall on Fri-day night next, to which all the young lady's friends are most cordially in-vited. The program, which begins at 8 o'clock, is as follows:

It is reported in railway circles that George J. Gould and E. T. Jeffrey presi-dent of the Denver & Rio Grande, will be in Denver in a few days. Mr. Gould was expected last week and came as far as Kansas City, but returned to New York. His expected visit is said to mean something more than ordinary. There is said to be dissatisfaction con-cerning the operating department of the D. & R. G. Selection . Opening prayer.

Trains have been late and cars have been distributed to a disadvantage and the conditions generally are said to have been unsatisfactory to Mr. Gould's practical notions of conducting rail-roads. The 17th annual report showed that the gross earnings of the road in-creased \$267,731.38 over last year, while the net earnings decreased \$30,576.57. The monthly report of the Denver & Rio Grande for July just issued which includes the report of the Rio Grande Western shows that while the gross earnings were \$2,608.76 more than last year the net earnings were \$4,286.01 less. While no blame is yet cast upon anybody for this condition of things, a fair hearing will be given and it will then be determined where the discre-pancy comes from. Mr. Gould's visit may include an inspection trip over the properties of the Colorado Fuel & Iron company. After spending several days is beity constitute. THE O. R. 4. 8

Funny things happen in this world and now and then some of them make one an interested observer, for instance: several years ago a man pursued a sys-tematic course of investigation to dis-cover what kind of elements the body cover what kind of elements the body would take up from the vegetable king-dom out of which to make gray matter in the brain and nerve centers through-out the body; also how to prepare this food so that it would be easily digested and allow Nature to make use of these elements. So far the proposition was all right. Question—How to bring all this about? delightful luncheon yesterday at the Country club, about 17 guests being present.

POLICE HAD A TIP. The peculiar part of the whole affair is that the police had been given a tip that "something would be doing" and Officers Brown and Leaker visited the saloon about half an hour before the robbery, and said they would return later. When they came back the tirck had been turned and the robbers gone. When the men first entered the sa-loon and ordered hands up, Friese and his customers though it was a joke, but they changed their minds when the robbers began to use their guns as clubs.
