CITY COUNCIL.

The City Council met in regular session at 7 o'clock p. m. July 9, Mayor Armstrong presiding.

N. Treweek and others presented a petition setting forth their rights to a portion of the water of City Creek for domestic purposes, stating that for the past week they had not been able to get water in the day time for any purpose whatever, and that the mains that run north from South Temple Street, on East Temple, and that should supply the water in that part of town, supplied the sprinklers. They asked the Council to furnish immediate relief and order the extension of another main of sufficient size to connect with the sixteen inch main in City Creek Canyon, where the T was placed.

Mr. McCornick remarked that Mr. Ottinger stated that there was not sufficient force in the day time to send water to those parties who have no reservoirs in which to store the water that might accumulate during the night. The petition was referred to the committee on water-works with the superintendent of waterworks associated.

James Bogan asked permission to place a moveable news stand on the Wasatch corner. Referred to the city marshal, with authority to act

in the matter if it did not conflict with the city ordinance.

H. J. Putnam asked that a permit be granted a Mrs. Jellick, who is known as a hard working woman, to open a fruit stand. Referred to the committee on license.

The following communications were received:

We would respectfully state to your honorable body that we have secured the water flowing through the wheels of the Hanauer smelters which is equal if not superior in quality to our city Creek water; that we have made surveys to convey such water to certain farming lands and are now building a canal. As the city is in need of water and this water can be brought to the city, we make the following proposition:

We will build the necessary canal, conduit, etc., to convey the waters to the intersection of State road and Ninth South Street, except that the city grant us the use of this canal on the State road to Roper Street, to Ninth South Street. We will keep the whole in repair and deliver to the city 5,000,000 gallons daily for the sum of \$7000 per year for twenty years or 10,000,000 gallons daily for \$13,000 per year for twenty years, the city to take the full amount each year to insure the continuance of water rights. This water to be delivered to any points in the city lying north of the Mill Creek depot on the Utah Central Railroad, and west of West Temple Street, and also on the land lying north of Roper Street and west of the State Road, all to Ninth South Street.

Whatever portion the city desires may be taken out at the intersection of Ninth South and State Road, and it may water the lands lying north and west of the boundaries mentioned. North of Ninth South Street it could water much land in the southwest and west portion of the city.

We believe this water sufficient to water 1,000 acres if 5,000,000 gallons be taken, or 2,000 acres if 10,000,000 gallons be taken, and we estimate that the city could supply from this about eight hundred acres of land that now receive other waters from Mill creek, Parley's, Emigration and City Creek canyons, or the Salt Lake & Jordan canal, giving these lands an ample and sure supply of water, and bringing into the city the water that now goes to these lands through the Salt Lake & Jordan canal, and the ditches from Mill creek, Parley's and Emigration canyons' streams.

We ask that the proposition be accepted or rejected at an early date, as we are now building the canal to certain farming lands, and to insure our rights to the water must proceed diligently with the work.

Very respectfully.
PRATT BROTHERS Co.

Having petitioned your honorable body on previous and divers occasions for the privilege of purchasing from the city certain lands lying adjacent to Ensign Peak, we, your petitioners, now respectfully submit the following statements and propo-
