It was therefore agreed to-day that instead of compelling all Chi-nese to register forthwith, the new bill should simply require our customs officers to register every Chinaman departing from this country, and after he has embarked on ship-board, recording his name, his last place of residence and description, age, height, and other distinguishing characteristics, and give him a certificate in accordance with such record. This plan would restrict with Mrs. George Cavendish, sister would be of advantagee in the capthe number of registration certifi-cates to a comparatively small proportion of the number of Chinese residents entitled to go and come freely, and it is believed would corres pendingly diminish the opportuni-ties for fraud. It would also manifestly obviate objection upon Chinese treaty rights by devolving all obligation for registration upon our own officers. The new bill will also contain some provisions for travel through the United States of Chi-

cality.

The ages attained by some of the conifere are scarcely less extraordinary then their colcssal bulk. The greatest longevity assigned to any tree is perhaps credited to the cele-bra'ed taxodium of Chapultepec, in Mexico, 117 feet in circumference, which is thought by De Candolle to exceed in age the baobab of Senegal inferred to be 5,150 years old. Geoppert states that Taxodium distichum has been ascertained by its annular rings to live 2,000 years. The mammoth tree has been estimated to live 4,000 years in California. De Candolle quotes a number of instances of longevity in the yew, and Endlicher considers one in Derbshare to be 2,096 years old, and the one at Grasford; in North Waler, 1,400 years old, The pines, cypress, firs, larches and cedars are credited with ages of 200, 300, and even 500 years. Pices 200 feet in height is mentioned by Groeppert, as ascritained by its annular rings, to be 460 years old and a larix of 120 feet to be 576 years old. The Scotch pine Pinus sylvestus) is said to require 200 years to mature its timber to perfection. In Veitch's Man-ual of the Conifare the ages of some of these are stated at considerably

Washington, 12.—The Savings' tank cashier's account is short \$30,-000 to \$60,000. Speculation is the cause.

Other examples of a longevity greater than 500 years are mentioned. These are Cedras deodara, 750 to 900 years, cedar of Labanon, 600 to 800 years. It is important, however, to recognize the fact that rings of growth are not in all cases trust-worthy guides, and the subject is worthy guides, and the subject is still involved in some obscurity. The rings of growth in eucalyptus have been ascertained to be blennial.
