

AGRICULTURAL.

PLANTING FRUIT TREES.—Never before since we have resided in Deseret have we seen as much interest manifested in planting or setting out fruit trees as this spring, and it is stated that every nurseryman in this city and county has disposed of all his apple, plum, pear, apricot, and other trees, peach excepted, suitable for transplanting, which we believed to be true, from the vast numbers of trees which have been seen carried away in every direction, within the last two or three weeks. It has been pleasing to witness the change which has come over the people, especially dwellers in the country, in relation to fruit culture, and it is hoped that those who are engaged in growing trees for sale will extend their business to that extent that they will, at no distant period, be able to supply the demand, which they cannot now do by many thousands. If all the apple trees which have been transplanted this spring shall be taken care of, as they ought, it will not be long before apples can be bought in the market for much less than has been paid for them the past winter.

GRAFTING WAX.—The following, from the *Germantown Telegraph*, we designed for publication several weeks since, but it was mislaid. This composition has been found to admirably answer the purpose—the object to be attained being to have the wax of such consistency that it will not crack from cold winds nor from the summer heat:

Five parts of rosin;
One part of beeswax;
One part of tallow.

Melt these in a skillet, tin cup, or any metal vessel, the skillet being preferable, as it can be handled better, and the wax keeps warm longer in it. Melt these over a slow fire, and mix together well. When the scions are set—say as many as twenty or thirty, or as few as is wished—have the mixture ready and apply it, warm, with a small wooden paddle. See that every part is covered, and the air completely excluded. It requires no bandage.

EARLY VEGETABLES.—Asparagus, tomatoes, peas and new potatoes were offered for sale in the San Francisco (Cal.) market on the 14th ult.

BIG CABBAGES.—Kinderhook is distanced by California, in cabbage raising. The *Stockton Independent* says that a dealer in that place received, some few days ago, cabbages which weighed 36 pounds apiece.

The violet grows low; and covers itself with its own tears, and of all flowers yields the sweetest fragrance. Such is humility.

"As you sow, so also shall you reap," is not only a moral, but an agricultural truism.

What fruit kept best in the ark? The preserved pears (pairs).

THE TOOLS GREAT MEN WORK WITH.

It is not the tools that make the workman, but the trained skill and perseverance of the man himself. Indeed it is proverbial that the bad workman never yet had a good tool. Some one asked Opie by what wonderful process he mixed his colors. "I mix them with my brain, sir," was his reply. It is the same with every workman who would excel. Ferguson made marvelous things such as his wooden clock, that accurately measured the hour—by means of a common penknife, a tool in everybody's hand, but then everybody is not a Ferguson. A pan of water and two thermometers were the tools by which Dr. Black discovered latent heat; and a prism, a lens, and a sheet of pasteboard enabled Newton to unfold the composition of light and the origin of color.

An eminent foreign savant once called upon Dr. Wallaston, and requested to be shown over his laboratories, in which science had been enriched by so many important discoveries, when the Doctor took him into a study, and, pointing to an old tea-tray, containing a few watch-glasses, test-papers, a small balance, and a blow pipe, said: "There is all the laboratory I have."

Stothard learnt the art of combining colors by closely studying butterflies' wings; he would often say that no one knew what he owed to these tiny insects. A burnt stick and a barn door served Wilkie in lieu of pencil and canvas. Berwick first practised drawing on the cottage walls of his native village, which he covered with his sketches in chalk; and Benjamin West made his first brushes out of the cat's tail.

Ferguson laid himself down in the fields at night, in a blanket, and made a map of the heavenly bodies, by means of a thread with

small beads on it, stretched between his eye and the stars. Franklin first robbed the thunder cloud of its lightning by means of a kite made with two cross-sticks and a silk handkerchief.

Watt made his first model of the condensing steam-engine out of an old anatomist's syringe, used to inject the arteries previous to dissection. G. Ford worked his first problem in mathematics, when a cobbler's apprentice, upon small scraps of leather, which he beat smooth for the purpose, while Rittenhouse, the astronomer, first calculated eclipses on his plowhandle. — [Smiles' Self-Help.]

TREES! TREES! TREES!

I HAVE for Sale 10,000 First Class APPLE TREES. 40-41 L. S. HEMENWAY.

NOTICE IS HEREBY GIVEN.

THAT I have appointed Mr. Nat. Stein, Agent of the Overland Stage Line at Great Salt Lake City; and that no accounts, made on and after this date, against said Line at that point, will be paid, unless made by him, or upon his order, and by him duly certified to be correct. BEN. HOLLADAY, Proprietor O. S. Line. G. S. L. City, March 18, 1893. 38-3m

TO ALL WHOM IT MAY CONCERN.

FINDING that I should not have sufficient time to have Machinery manufactured in the Eastern States, in time to be freighted across the plains the coming season, it has been considered wisdom to defer my visit East.

I, therefore, now propose to leave here about the middle of October, and will spend the winter months in attending to all orders for Machinery, &c., that may be entrusted to me; and by that means will be enabled to freight across the plains the following season as early as the road will permit. 40-2 E. R. YOUNG.

"The Desert shall blossom as the Rose."

RESUMPTION AND EXTENSION OF BUSINESS.

H. OLIPHANT, the well-known horticulturist, can be found at his Gardens and Nurseries, one block east of his former location in the Twelfth Ward. He will be prepared to furnish anything in his line, such as fruit, shade and ornamental trees, shrubs, plants and a. forth.

SEEDS, SEEDS.

Both flower and garden seeds, just received by mail, for sale at eastern market prices for good pay. These are warranted fresh and pure.

STRAWBERRIES.

Fifty thousand plants of the best varieties (warranted true to name) which have proved themselves adapted to this climate. These will be sold cheap. Produce taken at Tilling Office prices.

PROPAGATION OF FRUIT.

He will do a limited amount of grafting for those wishing the same. Those having trees that bore poor fruit last year can have them changed to the best the country affords at reasonable rates.

G. H. OLIPHANT,

Enterprise Gardens and Nurseries, 12th Ward, G. S. L. City.

40-2

ROBERT M. QUARRIE, Poundkeeper, Ogden City, Weber county.

OH! FOR A CLEAN HOUSE!

J. COULT, PLASTERER, &c.

WHITE-WASHING done in the shortest notice, and on the most reasonable terms. Residence, 11th Ward, near the School House. 40-3m

STRAWBERRY PLANTS.

THE following are recommended as necessary to a sufficient variety of this fruit:

VICTORIA. Largest of all and the best, \$1 per dozen.

SCARLET MAGNATE. Grows more fruit to the square rod than any other: very large and fine.

VICOMTESSE. Another very excellent kind.

WILSON'S ALBANY. Ditto.

The last three kinds are \$15 per 1000.

BLACKBERRY PLANTS. Strong roots at 50c. each.

Also, DORCHESTER BLACKBERRY. Strong plants, 50 cents each.

All kinds of pay taken for the above.

RED GIANT RASPBERRIES. Magnificent fruit, 75 cents each.

ENGLISH RED CURRANTS. Fine, long bunched, excellent, 50 cents each.

ENGLISH BLACK CURRANTS.

GOOSEBERRY PLANTS.

40-41 T. W. ELLERBECK.

NO MORE BED-BUGS!

IT is said that to destroy one bug in March, or early in Spring, is to destroy hundreds, for so prolific are they during the warm seasons, that it has been pleasantly said, a bug becomes a great grandfather, in the short space of twenty-four hours. And as "prevention is better than cure," we recommend our readers whose dwellings are subject to such disagreeable pests, to at once adopt the use of

GREER'S

CELEBRATED ANTI-BUG LOTION,

which will prevent as well as destroy. It is clean, simple in application and perfectly innocuous to insects. To be had of ROBERT GREER, South Temple Street, four doors from W. W. Woodruff's, near the Tabernacle, G. S. L. City.

N. B. A considerable saving effected to purchasers by bringing their own bottle. 28-6

REMOVAL

FINDLAY'S
