WESTERN MARKET LETTER. Special Correspondence. Kansas City Stock Yards, April 1 .-The cattle market took a sharp turn for the better after Tuesday of last week, and as receipts have been small each day, prices continue to advance, each day, prices continue to advance, including today. Beef steers are 15c to 30c higher, including a 10 cents' gain today; cows and heifers have remained more nearly steady, as they were al-ready at a high point, and did not suffer much during the recent break on steers. Fleshy grades of country cat-tle are 10 to 15 cents lower than a week ago, while light and thin stock tattle are about steady. Supplies from the range country have been small, includ-ing some Colorado killing cattle at \$4,60 to \$4.90. Montana killers at \$4,65, Colo-rado stockers \$4.65, cows \$3.50 to \$2.85, bulls \$3.55. Of course, these prices do not represent the full strength of the market as quality was generally lack-ing in the offerings from the range. Bulk of corn fed steers are selling to-day at \$4.80 to \$5.50, top \$6.40, highest price paid in six weeks. A string of "Bell" brand heifers, fed in Nebraska, sold at \$4.75 today. With moderate marketing the situation will likely re-main strong. * Receipts of sheep and lambs are run-ning moderate and the demand good, market a shade stronger than a week ago, run \$,000 today. Colorado fed lambs sold today at \$7.70 to \$7.30, a few 60-pound lambs at \$7.50, and a small number of feeding lambs going to the country at \$7.15 to \$7.25. No including today. Beef steers are 15c few 60-pound lambs at \$7.50, and a small number of feeding lambs going to the country at \$7.15 to \$7.25. No good to choice ewes have been includ-ed for a week, a few medium grade Co-lorado ewes to day at \$5.65, and some commonish ewes at \$5.50, on the feeder order. Yearlings have been very scarce, selling today at \$6.60 to \$6.85, some \$32-pound Colorados at the latter price, while wethers have been extremely scarce, a few today at \$5.85. Receipts for March fell a small number below the receipts of March last year, and a greater shortage is anticipated from now on. TODAY'S MONEY MARKET. New York, April 4.—Money on call, casy, 2½@3 per cent: ruling and clos-ing bids, 2¼: offered at 2½. Time loans, very easy: 60 days, 4½@5 per cent; 90 days, 5 per cent: six months, 5@5¼ per cent. Close: Prime mercantile paper, 6 Close: Prime mercantile paper, 6 @6½ per cent. Mohawk ore, resembled it so strongly that a difference could scarcely be de-tected. The rock breaks heautifully, and a half car can be broken with a

single round of shots. This development was unexpected. In fact it was not supposed that there In fact it was not supposed that there was any copper in the sulphides, which lies immediately above the new ore body, but a subsequent assay of the sulphides discolsed copper in that for-mation also mation also. The shaft is now down 50 feet below The scoul level. At the 100 foot point, a crossent will be run to encounter the ore body discovered above. The Ramsey Consider is largely owned in Goldfield, and there is natrai-

y great elation among the stockhold-res over the recent splendid develop-nents at their property.

Telegrams from Ramsey state that the Low Comstock has also opened up high grade ore, running \$668 to the ton, at the surface depth of 10 feet.

GETS GOOD RETURNS.

The Nevada Star Mining company of Tuscarora has received returns from a trial shipment of ore to Salt Lake City. The high grade ore netted \$49.40 per ton and the low grade netted \$19 per ton after paying all the freight and smelter charges, also chargfreight and smelter charges, also charg-ing for sampling at Salt Lake. The superintendent based his estimates on an average of \$20 per ion gross, or about \$12 per ion net, and the showing is very satisfactory. The main work-ing shaft is now down over 110 feet and the superintendent expects to open up bonanza ore between 250 and 200 feet. Shaft No. 2 is down 100 feet with a drift of 120 feet.--Golfield Review. of 120 feet .-- Goldfield Review, PROSPECTING COMPANIES.

Safe Method of Getting Holdings in

Nevada for Poor People.

Sate Method of Getting Holdings in Nevada for Poor Poople.
There is a saying, "There is more than one way of choking a cat." and there are various ways of making money also. It is not only the rich who are interested in Nevada proper-tes for the men and women who darther than just so far have found a way to acquire holdings. The method is simple and does not entail any great cost. A number of persons get to-peter-usually n dozen or so and by furnishing \$20 per month or so they sum is used to pay the salaries and expenses of a couple of good pros-peters who tramp the state for likely claims. If a dozen or more persons are taken up and a company organized the stock is divided into equal parts. A person who can afford to put some small amount into this soportunity of setting into something which may more than pay him. A prespecting company last summer and at a cost of \$160 to each member to-which they are offered \$100,000. As being acts is of them in the com-pany set of steil the state something which they are offered \$100,000. As proportunity of setting into something which they are offered \$100,000. As pays act will get over \$160 even in the day of being of them in the com-pany set of steil some \$160 even in the day of being the state something which they are offered \$100,000. As Stocks

FURNACE CREEK SHIPS.

The Furnace Creek Copper com-pany, according to advices received this week, has commenced shipping ore to Salt Lake City. Arrangements have been made whereby freight wag-

Looks Good to Its Owners. The officers of the Seven Troughs Signal Peak Mining company are in receipt of a monthly report from Supt. Frank McInitire in which he says the pannings obtained in the shaft being sunk showed good gold values at a depth of 28 feet and are improving with each foot of additional depth. The shaft is now down 38 feet and is being sunk on a well defined ledge at a rate of 1½ feet per shift. The work is exposing white quartz eight feet wide. The company owns 11 claims which were located by John Cleghorn in the carly life of the camp. These claims fratalel those of the Seven Troughs Consolidated and are between the Eclipse and Therin groups. Two of the claims are between the Falryiew and the Kindergarten and cover the lava rock from dyke to dyke. So en-thusiastic is Supt. McIntire over the aboving that he looks for sensational developments with each shot. The officers of the Seven Troughs Signal Peak are W. J. Robinson, president; James Chipman, vice president; J. T. Hammond, secretary and treasurer. These with J. H. Moyle; Frank Me-intire, John Cleghorn and W. H. Me-intire, John Cleghorn and W. H. Me-intire constitute the board of direc-tors.
