They shall cause a record to be kept of all business transactions, and their books, and records, shall at all reasonable times be open to the inspection of any stockholder. They shall also, when required, present to the stockholders reports in writing of the situation and amount of business of the company, and declare and make such dividends of the profits from the business of the Company, not reducing the capital stock while they have outstanding liabilities as they shall deem expedient.

NEW INVENTION FOR STEAMBOAT PADDLE WHEELS.—The Boston Journal says that Dr. Pratt, of that city, professes to have invented paddle wheels that have no back water—a great acquisition of propelling power. The contrivance is simple enough; the introduction of two eccentric wheels in the paddles, connecting by rods placed horizontally in grooves at the arms, and a friction roller at each end. In making the revolutions, the floats are in truth raised out of the water perpendicularly, under the shaft, and let down again when required for propulsion. In this way, back water is done away with, and no difficulty can arise from the clogging of the wheels by ice or drift wood.
