DESERET

Both Exchanges Show Better Market

With Prices Moving Up.

Stock on the local mining exchanges this morning were more active than they have been for several days. There was somewhat of a difference from the lagging market that has prevailed. Although prices were somewhat better for a number of stocks, they were far from denoting any marked activity.

denoting any marked activity. Grand Central on the Salt Lake ex-change showed an improvement of 10 cents a share from the opening, but from Blossom continued its downward course and was selling weak at the close at \$1.52½, which is 10 points bigher than the record low price since ore was found. The selling this morn-ing amounted to close to 15,000 shares. Mineral Flat, which has been high for Mineral Flat, which has been high for several days, commenced dropping to-lay and sold, for 15 cents.

Seven Troughs, one of the star per-formers on the market this week, made a new high record of 221/2 cents today. South Columbus Consolidated also came in for a substantial gain and reached is cents.

During the morning session, 76,725 shares of stock changed hands on the Salt Lake exchange at \$42,665.63. On the Utah exchange 21,900 shares were sold at \$5,059.50. The curb market this morning brought out many stocks but no sales. Eureka Swansca Extension was offered at 14 cents, and Tintic Standard at 13

rents. A bid of 11 cents was made for the stock. FORENOON QUOTATIONS
