

BUSINESS IS UNDISTURBED

Local Situation for the Week is Generally One of Marked Improvement.

PANIC HAS NO EFFECT HERE.

Bank Clearings Take a Great Jump Upward and Everything is Encouraging.

The local business situation for the week is generally one of continued improvement. In the banking field, local bankers report another quiet week, unmarked by any special features, no change in rates, and only a medium demand for money. As for the panic in railroad securities on Wall street, this has had no effect in this city beyond influencing investors to catch up stocks that have depreciated as far as they can apparently. The bank clearings have taken a great jump upwards, the excess on one day this week being \$300,000, and on another over \$400,000, over the corresponding days of the previous year. There is less inclination to pad out the clearings, that is, to run the unsettled balances over from one day to another, than there was last year. In general the tone of the local financial atmosphere is healthful and encouraging.

QUIET IN REALTY.

The real estate men report a quiet week as far as noticeable events are concerned, but a steady flow of business that makes them feel at peace with the world. They consider the outlook very hopeful character. One realty man proposes to sue for his commission in one of the Newhouse deals, which he has not received owing to a misunderstanding between the parties to the deal; and the contention incidentally brings out the interesting fact that Mr. Newhouse considers the property in question, the northwest corner of Main and Exchange place, as one of the most desirable in the city. The realty men report steady inquiry for houses, and still say that no matter how many houses are built this year, they will be picked up as fast as finished. Only one apartment house of note has been started, the others, it appears, is now in process of construction, the Sharp flats (a musical paradox), at the corner of E and South Temple streets, which is up to the second story. The legend over the doorway is attracting much attention and more or less original comment. Moderate and unpretentious homes are springing up all over the eastern half of the city, and on the western section, the feature is the clearing up of the grounds selected as a site for the Gould union passenger station, with the pushing ahead of the plants of the Public Service and the Utah Gas Company, and the completion work on the viaduct.

Architects are not doing much these days. They seem under the impression that about all of the very large work for the year has been mapped out and provided for, and whatever new comes on will be of moderate proportions. The arrival yesterday of Sterritt of the great New York building firm of Sterritt & Thompson, yesterday marks a step in advance for the Newhouse building interests, and when Mr. Newhouse returns from Europe he will find active construction on the two great structures fairly under way.

HARDWARE TRADE.

The hardware trade reports a big business in shipment of mining supplies and grainer's outfit for railroad and irrigation construction work.

Who Said Dinner?

NEVOS HEADACHES

DR. WILLIAMS' PINK PILLS WILL CURE MOST CASES.

Starved Nerves Are the Cause and the Tonic Treatment Should Interest Every Sufferer.

Nobody who has not endured the suffering caused by nervous headaches can realize the awful agony of its victims. Worst of all, the ordinary treatment often relied upon to cure not even to give relief. The doctors will say that if a person is subject to these headaches there is nothing that can be done to prevent their recurrence.

Nervous headaches, as well as neuritis caused by lack of nutrition—the nerves are starved. The only way to feed the nerves is through the blood and it is in this way that Dr. Williams' Pink Pills have accomplished so many remarkable cures.

Mrs. Addie Merrill, of 39 Union Street, Auburn, Me., says: "For years I suffered from a severe headache, which would come on me every five or six weeks and continue for several days. The pain was so severe that I would be obliged to go to bed for three or four days each time. It was particularly intense over my right eye. I tried many medicines but got no relief. I had no appetite and when the headache passed away I felt as if I had been sick for a month. My blood was thin and I was pale, weak and reduced in weight."

"I read about Dr. Williams' Pink Pills in a paper and decided to try them. I first noticed that they began to give me some appetite again. I commenced to gain in weight and color. My headache stopped and have not returned and I have never felt so well as I do now."

Dr. Williams' Pink Pills act directly on the blood, purifying it and making it more available for the nutrition of the body and brain tissue. But in another month where there is some show for settled weather, there will be a heavy demand for builders' hardware. Dealers report also a strong trade in sportsmen goods or all kinds from jobbers and wholesalers to retailers in preparation for the coming of the spring, a considerable inquiry for cement and structural material, but as yet, no orders are being received.

However, it is evident that there will be an unprecedented demand for cement this spring for concrete work even for general structural purposes. Builders are anxious to know that if the present manufacturing plant in this city was doubled it could no more than supply the demand. The harness and saddlery department of the hardware trade reports business heavier than ever, the production being limited only by the supply of leather and meat to make up the goods. It has been found difficult to secure enough hands to make much of a show in filling orders. The retail hardware trade is slow for the present. But when the roads dry up and teaming is easier, both branches of the trade promise to be extremely lively.

DRY GOODS.

In dry goods, the wholesale trade still finds all the opportunity to get shipments which have within a few days a full cent a yard, or 15 per cent.

When the demand in this line can be supplied is still a matter of uncertainty. Manufacturers are somewhat at sea because of the seemingly general policy of the trade to buy out the country who are ordering on the basis of a month's plan, so that small orders are fast becoming a constant quantity, and what to expect next is not exactly understood.

Then manufacturers are busy distributing goods on back orders for staple products, which are being gradually supplied. The men who facilitate freight handling and trains are running freer, just at present, there does not seem to be any such thing as accumulation of stock in most lines. There continues to be an enormous consumption in the cotton market. The primary market reported prey to the changing and changing market for many years at this time. The crop has all been moved to the seaboard where it is awaiting shipment to all parts of the earth. Some handlers think there is likely to be an acute condition in the textile fabric market before the season is over, if not a famine, if retail dealers persist in their uncertain methods of ordering.

EASTER OPENS.

In the retail dry goods trade, the local houses are preparing for an Easter opening the coming week, when there will be fine displays of all kinds of goods and millinery, which means cross sales all the year round and an immense trade. Large consignments are arriving from eastern jobbing houses of silks and dress goods, as well as a wide variety of other products in the dry goods line, including ribbons, gloves and millinery galore.

The trade also reports a strong demand for start wear, as gloves the demand is running to champagne, white and canary yellow.

NULL IN CLOTHING.

The clothing trade is reported dull during the week owing to the cold and uncertain weather, which has held back purchasers of spring garments. Trade is likely to be quiet for the next two or three weeks, or until more settled weather is in evidence, however, then sales are selling well.

DEMAND FOR CANVAS SHOES.

The shoe trade still reports booming times, with the demand coming in strong for Oxford and low cut generally. Local dealers are receiving large consignments of the above styles with side panels, gun metal finish and white canvas shoes. The demand for white canvas shoes promises to be unprecedented, phenomenal. This was so evident last fall that factories generally made special runs on white canvas goods, so that the country ought to be pretty well supplied this spring, when the warm weather approaches. Prices are stiff, with an upward tendency. Leather is firm.

INDUSTRIAL PEACE.

President Appoints Members of Board For Its Promotion.

Washington, March 15.—The president today appointed Sam L. Lee of New York and Thomas G. Bush of Birmingham, Ala., as representatives of the general assembly under the act of Congress establishing a foundation for the promotion of industrial peace.

No other little tablets in the world can do so much. You should carry Stuart's Dyspepsia Tablets around with you wherever you go and take them after meals. Then only will you realize what it is to enjoy a meal, and what perfect digestion means. Your whole body and mind will feel the effects. Your vials will increase, you will be more satisfied with what the world does, you will think happier and be happier and your face will be one of supreme contentment. That will bring you success and then more success. Your face will bring you dollars. Try it. It will cost you but ten cents for a package of these little tablets.

Send us your name and address today and we will at once send you by mail a sample package, free. Address F. A. Stuart Co., 82 Stuart Blvd., Marquette, Mich.

BALTIC TO REMAIN FREE.

London, March 14.—In a communication to the Times, Mr. Dashner says there is no foundation for the belief that any power contemplates any change in the treaty of 1892, which assures the free passage of the Baltic sea.

SPRING TRADE IS VERY GOOD

Compares Favorably With Last Year With Exception of Some Few Sections.

THE WEATHER AFFECTS THEM

Leading Industries Have Good Orders For Future Delivery—Iron Market Is Strong.

New York, March 15.—R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say:

Spring trade is making a most satisfactory comparison with last year, except in a few sections, where the weather is still unfavorable, and mercantile collections improve steadily despite the high money rates. Leading industries have orders covering production well into the future, especially cotton factories and steel mills, while the output of pig iron for last month was close to the largest on record.

Demand for iron and steel prices showing a downward tendency.

Prices of grain were well maintained, in view of the official report of farm reserves on March 1, which showed the unprecedented total of 266,944,800 bushels of wheat, 188,606,000 bushels of corn and 224,461,000 bushels of oats.

BANK CLEARINGS.

New York, March 15.—Branches' bank clearings report for the week ending May 14 shows an aggregate of \$3,223,250,000, as against \$3,431,260,000 last week and \$3,420,000, the corresponding week last year. Canadian clearings for the week total \$77,964,000, as against \$79,661,000 last week and \$82,009 in the same week last year. The following is a list of the cities:

	Inc. Dec.
New York	\$2,197,844,000 19.2
Chicago	220,456,000 23.5
Boston	152,289,000 15.6
Philadelphia	123,004,000 9.3
St. Louis	65,811,000 14.6
St. Paul	35,988,000 11.5
San Francisco	28,015,000 6.8
Baltimore	22,121,000 5.8
Kansas City	22,824,000 31.8
Chicago	20,425,000 15.9
Los Angeles	18,812,000 28.9
Milwaukee	11,851,000 32.0
Seattle	10,747,000 25.8
SALT LAKE CITY	2,056,000 26.7
Portland, Or.	8,461,000 46.8

Nothing is being sold by jobbers in the building line as yet, and only moderately so in the retail department. This is, of course, expected at this time of year, when the weather is still quite cold and unpredictable. But in another month where there is some show for settled weather, there will be a heavy demand for builders' hardware. Dealers report also a strong trade in sportsmen goods or all kinds from jobbers and wholesalers to retailers in preparation for the coming of the spring, a considerable inquiry for cement and structural material, but as yet, no orders are being received.

However, it is evident that there will be an unprecedented demand for cement this spring for concrete work even for general structural purposes.

Dealers are anxious to know that if the present manufacturing plant in this city was doubled it could no more than supply the demand.

The harness and saddlery department of the hardware trade reports business heavier than ever, the production being limited only by the supply of leather and meat to make up the goods. It has been found difficult to secure enough hands to make much of a show in filling orders.

The retail hardware trade is slow for the present. But when the roads dry up and teaming is easier, both branches of the trade promise to be extremely lively.

Day. Lieutenant Wiegenenden demonstrated to the court how Springfield cartridges could be loaded into a Winchester rifle.

H. A. Tracy, test of the experiment at Fort McIntosh under conditions as nearly like as possible to those existing at Brownsville upon the night of the shooting.

The witness said the cartridge and chamber of the gun had not been hit, the cartridge cases were not sufficient to illuminate the faces or bodies of the men doing the shooting.

Above is out of the interior of the store of Leo Dykes, at 285 J St. He is using a No. 190 principle National Cash Register, of the very latest pattern. With this system he can tell who made the mistake, total amount of cash sales daily, credit sales, cash received on account of meat market, cash received account of Grocery department, and much other detailed information.

OKLAHOMA CONSTITUTION

It Has Been Completed and Will Be Submitted to the People To Vote on August 6.

ALL MODERN IMPROVEMENTS.

Initiative and Referendum—Succession In State Offices Prohibited—R. R. Comm'n and Two-Cent Fares.

Guthrie, Okla., March 15.—The only state constitution to be produced under modern conditions—that intended for the proposed new state of Oklahoma, has finally been drafted here. The constitutional convention finished its work today and adjourned after having been in session 115 days. The constitution will be submitted to the people of the two territories at a special election Aug. 6. One of the last acts of the convention was to appoint a committee to solicit funds to pay the expenses of the election, the convention having exhausted practically all the money appropriated by Congress.

The convention was overwhelmingly Democratic, being composed of 169 Democrats and 12 Republicans.

Probably the most important measure killed by the convention was the provision relative to separate coaches for whites and negroes, although the Democrats had pledged to include it.

Several delegations from the floor of the convention voted to reject the constitution if the Jim Crow provision was adopted, and warning letters were sent delegates by Senators Tillman, Pettus and others.

Woman suffrage was defeated by a few votes.

The initiative and referendum, patterns after the Oregon law, was adopted.

Succession in state offices is prohibited, and it is provided that no senator committee shall be named by a lieutenant governor, but be selected by the body itself.

Oklahoma will be a prohibition state, the most stringent liquor law in existence prohibiting not only the sale but the introduction of liquor into the state.

The constitution provided that the state shall vote on the question, and there is no doubt that the terms of the enabling act will be made uniform over the whole state.

Provision is made for state railroads to be built by elective, and a 2 cent passenger fare ordered.

Railway companies are prohibited from owning any productive agency of a natural commodity, a provision particularly intended to cover coal lands.

A fellow-servant law is embodied in the constitution.

Corporations are prohibited from owning more land than is absolutely necessary in the operation of their business.

The issuance of watered stock is prohibited, and the books of all corporations are made subject to action at all times.

The organization of corporations to do business outside of incorporated cities is prohibited.

A commission is appointed to negotiate the purchase of the mineral lands in the Indian Territory.

Statehood requires a constitutional amendment.

Halfa Catarrh Cure is taken internally, acting directly upon the blood and making the body fit for work.

Catarrh is a disease of the system, attacking the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in its efforts to expel the disease.

Halfa Catarrh has so much faith in its curative powers that it offers One Hundred Dollars for any case that it fails to cure.

Send for list of physicians.

Secretary of State, and the secretary of agriculture.

President Appoints Members of Board For Its Promotion.

Tonopah, Nev., March 15.—Jacob L. Walsh, formerly a railroad conductor, this morning shot and killed Charles Meyers and Jack Harrington. The tragedy was the result of a gambling row. It is alleged that Meyers and Harrington were playing roulette in a gambling house two days ago. Walsh, who was employed by the railroad, played on the wheel, caught the conductor and the two men, and when he refused to give them the money are alleged to have beaten him with sticks. When Walsh was discharged by the railroad superintendent for gambling, this morning Meyers and Harrington followed him to the depot, and opened fire with a rifle, killing both of them. He then started for the mountains and surrendered himself to the authorities.

The police are investigating the case.

The police are investigating the case.
