

# MINING, BUSINESS AND STOCKS.

## MARKET SHOWS IMPROVEMENT.

Prices on the Stock Exchange Show Slight Advances.

## GRAND CENTRAL STRONGER.

Engle and Blue Bell Sells—Mercer Bought—Omaha Flat—Yankee Con. Higher.

### TODAY'S METALS:

SILVER 59 1/2  
LEAD \$4.57 1/2  
CASTING COPPER 15 1/2

A decided improvement is noticeable today in the tone of the stock market. Not only was business decidedly better but prices on the whole show slight advances over those quoted for the past few days. There are some exceptions, but even they show no material depreciation or change.

Daily Weet was traded in at 12.10, and Mammoth shows hardly as much strength today. Grand Central was much stronger, being traded in at 5.75.

Engle and Blue Bell was brought out on a bid of 1.20, while Ajax responded at 48 1/2 and Chloride Point at 18.

Mercer brought 5.25 at the outset, but weakened to 5.22 1/2 before the close of call. Northern Light made slight gains from 7 1/4 to 7 1/2, while Omaha was flat at 1.

Yankee Consolidated was stronger at 12. Joe Bowers commanded 9 and Bowers Extension sold for 5.

Martha Washington changed hands at 2 1/2, while Sunbeam went at 43 1/2.

Golden Eagle was handed out at 2 1/2 with a cent assessment due next week. Krenlin was bought for 2.

Wyoming Land Office.

Washington, Jan. 30.—The President today nominated A. D. Chamberlain of Inez, Wyo., to be register of the land office at Douglas, Wyo.

## WAS SHOW OF ANIMATION

Speculation Took on a Strong Tone in Wall Street Today.

Brief Period of Life, then Relapse Into Former Bullish Live Stock Steady—Produce Drops.

New York, Jan. 30.—Wall Street: The market opened with considerable show of animation and strength, ignoring the lower quotations cabled from London. Speculation took on a strong tone throughout and was very broad. The metal stocks led in the rise and improved from 1 to 3 1/2, under the leadership of steel and wire. Some of the railroads were taken freely. Realizing caused a return to the recent dullness, there being little stock offered on the decline. Losses were limited to fractions, and towards midday the trading became more lively on buying of the coalers, and prices improved. Reading first preferred rose 3/4 points.

Sugar was pushed up to 12 1/2 after 2 o'clock, but reacted on profit-taking. Lackawanna extended its rise from the lowest to 6 1/2 points. Pittsburgh C. & St. L. dropped an extreme 1 1/4, and rallied 3/4. The general list receded slightly from top figures, but offerings were not large. There was a good absorption at the lower level, and the market rallied. The closing was active and strong, with notable gains throughout.

The bond market showed strength on a moderate demand.

### SUGAR.

Raw, firm; refined firm.

### MONEY AND BONDS.

Money on call nominally 2 1/2 per cent. Prime mercantile paper, 4 1/2 per cent. Sterling exchange steady with actual business in bankers' bills at 4.87 1/2 for demand and at 4.84 1/2 for sixty days; cables at 4.88 1/2; commercial bills, 4.87 1/2 to 4.84.

## JUDGE TIMMONY'S COURT.

Tom Rooney charged with being unlawfully drunk, was the first person brought before Judge Timmony's court today. Rooney had gone down to the boat to see when the train left and got to drinking with some friends. Find out when the next train leaves," then said his honor, "and take it."

Jacob Stein and John Mertens were taken from a car in the Oregon Short Line depot. They were on their way to Tintic to get work. Prosecutor Diehl inspected the hands of the culprits and pronounced them the hands of hard working men; they were therefore discharged.

John Moore—Drunk and apparently glad of it—\$5.

Charles Read, accused of stealing a suit coat from a clothing store, pleaded guilty to the charge—by way of extenuation he said he had lain in the city jail for 30 days and was covered with all sorts of animal creation. He was given 50 days imprisonment to think over his iniquity.

## ELEVEN CARS OF PIC COPPER.

Represents the Production of Highland Boy for Month.

## ORE FROM LOWER MAMMOTH

Shows Native Silver—Ogden Onyx—Strike in the Copper Glance.

Eleven cars of pic copper in one month may not seem an extraordinary output to those acquainted with the shipments from the big copper producers of the world, but eleven cars of copper from a Utah mine in a month is cause for congratulation, as the copper industry is comparatively new in Utah. The above shipments, weighing approximately 661,000 pounds, have gone to the refinery at Perth Amboy, New Jersey, during the present month, and there is a possibility, said Manager Poland today, that the number may be increased to 12 cars, or over 720,000 pounds by tomorrow. No estimate can be formed of the value of such shipments. Though the pic copper is known to carry gold and other metals, the relative amount of each is kept a profound secret. It has been stated that preparations are being made to double the output of the smelter in the spring, and every assurance is expressed by those who have visited the mine that the property can easily stand the drain on its ore reserves that an increased smelter capacity will necessitate. President A. C. Burrage of the Utah Consolidated, or Highland Boy as it is known at home, was expected to arrive from Butte today on a tour of inspection. It is said he has not visited the property since the smelter was put in commission and it is thought his present visit has some connection with the proposed smelter enlargement.

## THE LOWER MAMMOTH.

Two Chutes of Ore Eight Feet Wide—Native Silver.

James Chipman brought to town some fine looking samples of ore from the Lower Mammoth, which he visited a day or two ago. The samples were obtained from two chutes of ore on drifts of the 600 level, which are said to be 8 feet across. One of the samples shows native silver, some striking effects in native silver, and closely resembles, it is said, some of the ore at one time marketed from the Grand Central. A vein has been run down about 25 feet from the drift on the 600 level, and the ore chutes have been reached by a short drift from the wings. It is now proposed to stoop on the vein and ascertain the extent of the chute, after which an incline may be run down on the vein. Some shipments are promised shortly, when developments warrants it the main shaft will be continued deeper and a drift run to the ore chute at a still greater depth.

## BUNKER HILL ORE.

High Grade Galena in An Upraise from the 200 Level.

Private assays obtained from samples of Bunker Hill galena, which are as high as 74.5 per cent lead, 34 ounces silver and \$2.40 in gold per ton. The carbonate ore assays 60.8 per cent lead, 19.3 ounces silver and \$1 in gold per ton. A. L. Jacobs, who visited the mine yesterday, says there is some ore in the bins and a three-foot vein has been opened up in the west drift in a stoop from the 200 level. There is every indication that the chute now being worked on is identical with the one on the 150 level, from which ore has been shipped.

## THE GIPSY BLAIR.

Rock Showing Metallic Values Found at a Depth of 160 Feet.

The contractors who are sinking the shaft 200 feet deeper on the Gipsy Blair property at Alta came down from that camp yesterday afternoon. They brought to town some fine looking samples of quartz and lime formation showing metallic values. It is stated that over two feet of the rock exists in the bottom of the shaft, besides a foot of loose material which shows evidence of silver. The indications are said to be more favorable than ever that the property will make a mine. Ben D. Luce will go up to Alta in a day or two to examine the new conditions at the property.

## COPPER GLANCE STRIKE.

A Foot of Ore Which Assays Well in Lead and Gold.

Some very good ore is reported to have been uncovered in the Copper Glance property in Bingham a few days ago. Barlow Ferguson, when seen today, stated that a foot of ore has been opened up which assays as high as 52 per cent lead and \$4.50 in gold per ton, with some silver. The strike occurred in the tunnel about 300 feet from the entrance. The Copper Glance is neighbor to the Connor and contains about 70 acres of ground for which a patent is now being sought.

## SOLD AT AUCTION.

Group of Nine Patented Claims Transferred for \$5,000.

Sheriff Haycock sold at auction last Monday the group, consisting of nine patented mining claims, belonging to the American Antimony Mining Company to W. C. Staines for the sum of five thousand dollars, says the Panhandle Progress. These claims are situated in the Antimony mining district, Garfield county. For a long time they have been lying idle, but it is thought since the advance in the price of antimony that these claims can be made to pay. We understand that the purchaser will place on the property some improved mining machinery and make a thorough test as to whether or not they can be worked with profit. Most of the ore is of a low grade and must be concentrated before it can be disposed of.

## THE SHARP MINE.

A Shipment is Promised Within the Next Ten Days.

The report that three feet of good ore had been encountered in the property of the Sharp Mining company in Silverton was confirmed today by A. L. Jacobs, who visited the mine yesterday. The tunnel encountered the ledge at a distance of 300 feet from the entrance, and an upraise on the vein has exposed a fine vein of oxide and sulphide of lead. Assays from samples of the former show 38.8 per cent lead, 23.8 ounces silver and \$2.40 in gold per ton. The sample of sulphide ore assays 53.2 per cent lead, 19 ounces silver and \$2.50 in gold to the ton. A new car track is being laid preparatory to starting shipments on the way. One or two cars loads of ore are promised within the next ten days.

## TRINIDAD CONTRACT.

One Hundred Feet More of Shaft-Work Will be Completed.

At a meeting of the Trinidad Mining and Milling company held last evening a contract was let for 100 feet of shaft work. The shaft is now down 175 feet, and the contractor who is working on reports that there is every indication that the values will be encountered before the new contract is finished. The property joins the Sir Victor in the south of Sunshine.

## FINE ONYX NEAR OGDEN.

Number of Tests Show It to be Superior to Mexican Onyx.

A correspondent of the Salt Lake Mining Review writes as follows concerning Onyx: "About twenty miles north of Ogden City there is an extensive onyx deposit owned by Ogden men, which is, undoubtedly, one of the finest deposits in the United States. The owners have done over \$250,000 worth of development work on the property, but none of the material has ever been put on the market owing to the lack of means by the owners to procure the necessary machinery for saving and polishing the product. Now, however, a company is being organized to develop the property and saw and polish the onyx for the market. The stock of this company is being taken largely by Ogden men, and it is expected that a mill will be in operation by the first of May. The onyx has been tested by the United States treasury department at the Watertown arsenal, and pronounced entirely satisfactory. Tests of the material have also been made by the experts of several of the eastern wholesale onyx and marble houses and their reports are unanimous to the effect that the Ogden onyx is superior to the Mexican onyx in texture and quality. Another decided advantage which the Ogden onyx has is that it is quarried in sizes which saw up into slabs 2 1/2 feet thick and 12 feet long, which is a decided advantage over the Mexican onyx, which is quarried in sizes which saw up into slabs 1 1/2 feet thick and 12 feet long. The coloring is varied and rich and the markings and tracings delicate and beautiful. Many onyx experts who have seen the display, which is on exhibition in the law office of A. R. Hayes, pronounce it as beautiful as any they have ever seen."

## THE DALTON MEETING.

Company's Receipts More Than Its Disbursements—Officers Elected.

The shareholders of the Dalton Mining company of Marysville met in annual session yesterday afternoon and listened to a report which showed that \$45,000 had been received during the year and \$41,500 expended, thus leaving a balance of \$3,500 which will be used to continue the work of prospecting. Some high grade ore has been raised during the year, and with freedom from indebtedness the outlook for the company is considered satisfactory. Arthur H. Larkin, J. C. De Kalb, C. H. Dwyer, O. R. Young and Dr. C. M. Garrison. Mr. McMillan was made president when the board organized. Mr. Larkin is vice president. Mr. Dickinson, secretary. Mr. Young continues to act as managing director.

## Paulsen Claims Sold.

The interests of the Home Copper Mining company in the property known as the Paulsen claims, were on yesterday transferred to the corporation known as the Big Creek Copper company, now operating on the Big Creek near the southern border of Carbon county. Messrs. W. P. Barbour and J. J. Henry, the purchasers of the Electric Light company and the Dillon coal mine, are the financiers of the Big Creek company. The Big Creek company assumes the \$15,000 bond and lease taken by the Home company from Mr. Paulsen, and in addition reimburses the Home company for all monies expended in development work, the purchase
