held three meetings today, and ate the third, which did not adjourn until 6:30 o'clock, reached a tentative agree ment, on which will be based the com promise which the Republicans of the conference hope to reach at an adjourned meeting tomorrow forenoon At the conclusion of the final meeting tonight the probability of the repor-ing of a compromise bill to the two houses of Congress was much stronger than any previous time this session. Indeed, it was considered a certainty.

LEADING POINTS.

Following are the main points of the inderstanding that had been reached. The reserve provisions in the Vrec-land bil, calling for retention of 25 per cent in central reserve cities and 15 per cent in other reserve cities, h. reduced to a straight 10 per cent re-serve without reference to classification of citic

of cities. A higher rating is given to state and municipal bonds than to other se-curities upon which emergency curren-cy may be taken out by banks. That is to say, county, state and municipal bonds will be valued at not to ex-ceed 90 per cent of their market value, and all other bonds at not to exceed 70 per cent of their market value, bolk without regard to whether they are offered as security for additional cir-

ALL IS TENTATIVS.

In this preliminary and purely tenta-tive welding of the Aldrich and Vree-land bills into a modified measure com-prising the principal features of each and making it possible to obtain an emergence. and making it possible to obtain an emergency currency under two dis-tinct and radically different forms of application and security, several of the minor details of financial machin-ery are not yet fully settled. They will be taken up for consideration and disposition when it has become a set-tled fact that a bill is to be reported by the conferees. Meantime the work ing draft of the compromise bill, as outlined in the foregoing paragraphs, will be printed tonight at the govern-ment printing office, so that the Re-publican conferees may have the text before them when they meet at 2:30 tomorrow morning to decide upon the attitude they will take and maintain in the full conference to be held im-mediately afterward and in which the Democratic members of the confer-ence will for the first time paragrapher. CONDITIONS IN SENATE.

The conditions are so different in the The conditions are so different in the senate that another situation may be encountered there. Still, today's devel-opments have been such as to justify the statement that the bills will not be held up in the senate for so long a time as seened probable' when the com-promise first began to receive attention. Then the fear was that the measure might be talked to death.

might be talked to death. Strenuous representations as to the possible effect on business of a failure by Congress to enact financial legisla-tion before adjournment has had the effect of causing several Democratic senators to agree not to discuss the bill at length in case it is reported. Repub-lican scenators have been active in spreading this propaganda, and they have not been without success. Those who have been won over will content themselves with casting their votes against the measure. Others would, however, insist upon discussing the bill and explaining their objectons at length.

length. There are probably half a dozen of this latter class and it is impossible to estimate how much time they would consume. They assert, however, that seriously opposed to the provisions of the Vreeland bill as they are, they would still not enter upon any pro-ceedings that might be characterized as a fillbuster and say that after express. a filibuster and say that after express-ing their views and forcing an explan-ation from the supporters of the bill they would let it go to a vote. The bill, they would let it go to a vote. The time necessary for this proceeding none will undertake to say, and estimates range all the way from one day to one month. It seems probable now that from a week to two weeks would be required in the senate in the senate.

DEMOCRATIC POSITION.

The Democratic senators who oppose the compromise realize that they would be seriously handicapped in any effort at such tactics as would postpone for any great length of time the vote on the bill by the absence of a large per-centage of their members is a mean the bill by the absence of a large per-centage of their members. So many Democratic senators have recently left for their homes that they realize they would not be able to make an effectual filbuster if inclined to engage in one. There were indeed only 14 Democratic senators in the city today and it was stated that while the absences had been requested by telegraph to return. H was doubtful whether they would obey the summons as most of them had It was doubtful whether they would obey the summons as most of them had gone away intending to remain. A number of Republican senators are also out of the city, and it is apparent that there will be great difficulty in main-taining a quorum in the senate if the final disposition of the bill be long postborned postponed

A BRAVE WOMAN.

Other cereals may be used, for a little time, for variety. But the staple is always wheat.

Whole wheat alone contains all the needed food elements in properly balanced form.

So we use for Mapl-Flake the finest wheat in America.

But wheat must be cooked-cooked more than the usual-else it is half indigestible.

The atoms must be separated-by a fierce heat-so the digestive juices can get to them. Not half the wheat that people eat is subject

to digestion.

The balance is wasted. It ferments and forms gas. It leads to digestive disorders.

That's why we spend full 96 hours in preparing Mapl-Flake.

We steam-cook the wheat for six hours. Think

Chicago. May 27.—The horses of the Chicago fire department were accorded an enviable tribute of efficiency by the city civil service commission yester-day. The work of the animals that re-spond to the fire alarms was pronounc-ed flawless, and steps were taken to bring the efficiency of the firemen up to the same high standard. Hereafter the same painstaking care used in the selection of the horses that haul the engines and trucks is to be exercised in the recruiting of the ranks of the human fire fighters. The opinion of the commission is that if the fire-men as a whole were as efficient as the horses the department would be above criticism. The civil service examination of the horses is more rigid than the test of would-be firemen. The animals are put through an intricate trial of strength, wind, endurance, speed and behavior, the like of which would stagger a ha-man being. Then they are subjected to a training of three or four months before they are allowed to run to their first fre. The merit board discovered that in the examination of firemen the physical requirements were unduly subordinated to the mental. Bigger and heavier fire-men are to be sought in the future. A man to become a fireman must be five feet eight inches tall, instead of five feet seven inches, as at present, and the required weight will be increased in properton.
