## MUCH ACTIVITY AT GOOD SPRINGS

Ninety-Nine Encouraging Advance In Zinc Makes a Stir Among Zinc Mines of District.

Reports from Good Springs Mining district, Nevada, state that the formation has changed in the face of the drift on the 200 level of the 99 Mining company's property, and indications are favorable for encountering the ore chute on that level at an early date. Iron has entered the drift, which is thought to be the capping of the big copper ore body which has been found to be 20 feet between walls on the 100 level. Some very fine specimens of grey copper have been taken out in the upper workings which carry as high as 10 per cent of the red metal. Shipments made to the Salt Lake Valley smelters have assayed from 20 to 30 per cent copper.

The company resumed work about 60 days ago, since which time a small force of men has been employed. The mine is equipped with a gasoline hoist and compressor, air drills, etc. The property is being operated by Salt Lake, among whom is James T. Hammond, J. B. Jensen, the superintendent, says that a new mine is being developed with the mines of Elsie, Ariz., says that conditions in the "99" are almost identical with those in the great Copper Queen mine in the Arizona district. The largest ore bodies were found below the 400 level.

Mr. Jensen says that there is a lively interest in zinc production in Good Springs, owing to the value of \$5.00 a pound of high grade zinc ore which exists there. Heretofore Mr. Jensen says the long distance from reduction works has made production impossible, but since the recent advance in the price of the metal, several developed mines have started producing, and are now shipping zinc ore to the value of \$5.00 a week. Other zinc mines in the district are reported to be preparing to produce soon after the first of the year.

The Sultana group in that camp is named by Mr. Jensen as an exceptionally fine property. In this group is said to be exposed on the side of a gulch a body of zinc ore carrying 35 per cent, which is 30 feet wide. Some of the ore has assayed as high as 50 per cent zinc. The ore is said to be susceptible to the most economical handling, as great quantities of it can be quarried from the surface.

**MARKET WEAK IN SPOTS.**  
Iron Blossom and Columbus Con. Both Show a Falling Off.

The mining stock market was weaker in spots today, though most of the first half firm around yesterday's prices. With the announcement that the No. 1 shaft of the Iron Blossom has been closed down, the stock fell off this morning, sales being made from 66 down to 64. Columbus also dropped a few points from 160 at the opening to 15 1/2 at the close. Daily Judge is also a little weaker, being offered this morning at 45, with no takers.

Grand Central was firm around \$2.50 and Lower Mammoth moved up to 42 on reports that the property is getting in shape to give a good account of itself in the near future. Mason Valley was unchanged in spite of reports that a new find had been made in the mine. Victoria was active at 1.65 and Sioux Consolidated moved up to 46.

Mountain Lake, which sold at 1.00 and better last year, softened this morning to 3/4, with indications of its reaching a still lower mark. Mineral Flat has almost reached zero point, selling this morning as low as 1/4. Utah Con. fell back to 4. Columbus also dropped a half cent assessment, and Black Jack might have been bought for 7 1/2 or less. New York was firm at 14, but Colorado declined to 80.

**UNLISTED STOCKS.**

The only sale recorded among the unlisted stocks on the exchange this morning was 2,000 shares of Utah Treasure Hill, which changed hands at 10 cents. The demand for the other issues was light and the market was consequently weak. Federal Ely was offered at 20, but the best bid obtainable was 15. McDonald's was offered at 40 with 25 bid. As high as 25 was offered for Ely Witch, which was held at 32.

## SILVER ISLAND SHIPMENT.

Last Car Nets Company Nearly \$2,300—Account of Work Being Done.

The last car of ore from the claims of the Silver Island Coalition Mines company near Wendover, making the sixth lot, was settled for yesterday on the basis of 115 ounces silver, 3.60 per cent copper and 12.4 per cent lead to the ton. The car netted the company \$2,284.27. The lot was not as high grade produced as a car recently shipped, which assayed 130 ounces silver, 33 per cent copper. Owing to the fact that the ore contains so much silica thereby increasing treatment charges, the management is considering the advisability of sorting the ore, thus raising the grade of future shipments.

The ore now being marketed is being taken from two true fissure veins, the Lefty and Emancipator. On the Lefty vein, which extends to a depth of 175 feet from the crown of the hill, at the same time the company is running another tunnel about 100 feet down the hill which will give a depth of over 300 feet from the top of the hill. The veins are not large, but contain high grade rock, the ore streak in the Emancipator vein being from a foot to two and one half thick. The company expects to ship two or three cars of ore a month right along, similar in quality to previous shipments.

## FINE SAMPLES OF COPPER.

High Grade Ore Being Opened Up in Upper Levels of Ohio Copper.

Some fine looking samples of red carbonate of copper have been received by Manager Colin Mackintosh of the Ohio Copper company from recent disclosures in raises from the 300 level on the "What Cheer" vein. Some interesting developments are also being made in the "Elvino" and "All's Well" veins, samples from which have reached the office of the company. In a small property the disclosures would be considered worth talking about, but in such a big mine as the Ohio, the finds do not count for much compared with the ordinary tonnage except that they assist in sweetening up the mill concentrates. The mill is said to be grinding away on about 750 tons of ore a day, the ob-

## INCREASES ITS FORCE.

Ely Resurrection Mining Company Puts Additional Men to Work.

Manager George R. Raymond of the Ely Resurrection Mining company announces that six more men have been put to work on that property, doing assessment work in the unpatented claims, and also pushing work on the tunnel which is now said to be in about 165 feet making 10 men in all. The company owns nearly 600 acres of mineral land of which nearly two-thirds is patented. The formation shows a lime capping, and where the lime has been eroded away the character of the property is exposed, and, according to a recent report, in every instance copper values are shown.

## CONCENTRATES.

It is reported that operations at the Iron Blossom No. 1 shaft have been closed down temporarily.

The J. D. Wood Investment company has taken over the Jersey Valley mines, in the Jersey district, about 50 miles south of Battle Mountain, from G. W. Abel, of Battle Mountain.

Boston reports state that the Coleman crowd have bought 100,000 shares of Miami Copper stock from the Lewishons. It is said that the company had that amount of stock on hand, and that the stock purchased is the treasury stock.

Twenty-five seniors of the state school of mines left today for the Sunnyside coal mines in Carbon county, accompanied by Dr. Fred J. Pack, Prof. H. H. Bradford, Prof. H. E. Beckstrand and others. This group is the field trip of the present year, the first having been made to Mercur two weeks ago.

The new train schedule to Pioche went into effect yesterday, which makes it possible for a man to spend several hours in the camps and be away from business only one day. The train leaves Salt Lake at 8 p. m. and arrives in Pioche at 10 o'clock next morning. Returning the train leaves Pioche at 1:45 and reaches Salt Lake at 6:30 next morning.

## STOCKS LOWER, CLOSING WAS EASY

New York, Dec. 2.—Prominent stocks started lower today but many of the less important issues showed small gains. The market showed a decided recovery in the Union Pacific and Wabash preferred lost 1/4, and the common, Southern Pacific and United States Steel large fractions. Colorado Southern and Consolidated rose 1/4.

Western railroad stocks and the metal group were irregular. The copper group resulted declines running between 1 and 2 points. An effort to rally the list by Wabash and Union Pacific failed, which resulted 2 points from its low level, to 3 1/2, had only a momentary effect, the list again falling to the lowest. Among the largest declines were Utah Copper 1 1/2, Union Pacific and Northern Pacific 1 1/2, Northwestern, Reading, Rock Island, National Biscuit, Third Avenue, St. Paul, Great Northern preferred, St. Louis, Great Western preferred, United States Steel, American Sugar, American and American Car, Colorado Southern, American Smelting and American Tobacco preferred rose 1/4 and North American 1.

Union Pacific was carried 2 points under last night, Amalgamated Copper 1 1/2, St. Paul 1 1/2, St. Louis 1 1/2, Great Northern preferred 1 1/2, Texas, Kansas City Southern, Interborough-Metro-North, and Erie preferred 1 1/2. North American rose 2 points. Prices rallied a fraction before noon.

Bonds were irregular. The 3 1/2 per cent U. S. bonds were 104 1/2, the 4 per cent U. S. bonds were 105 1/2, the 4 1/2 per cent U. S. bonds were 106 1/2, the 5 per cent U.
