INFORMATION RECEIVED DOES NOT SUSTAIN THE SENSATIONAL REPORTS.

A SPECIAL to the New York Times, from Washington, in to-day's dispatches in the NEWS, manifests that the sensational reports from Utah have not had the effect intended upon the administration and the military authorities at the federal capital. It is stated that the War Department does not consider that any emergency exists in Utah

requiring additional troops; that the department's information does not sustain the recent sensation reports of "Mormon uprising; that it is believed that the present troops in Utah are sufficient; that the ur-gent appeals for more troops have here made with a view to fithy been made with a view to flithy lucre; and that most of the requests of this nature so far have been

made from that money-loying and money-making class of people. All which shows that the author-

ities at Washington have a great deal more discretion than the sensation-breeders hereabout have. True enough, there is no necessity for more troops in Utah. True enough, the reports of "Mormon" uprising are sensational, got up expressly for political and pecuniary effect.

Now that the part of the conspiracy looking to financial gain from the presence of more troops is likely to prove a failure, it may be asked what else has been gained by the

flat, prices nominal, market bare of ence to the threatened uprising among the Mormons. It is believed the present force of troops in Utah is sufficient to prevent any lawlessness. Gov. Emery has ex, ressed himself to this effect in private letters. At military headquarters the urgent appeals made for additional treops are regarded as being prompted more by a desire of sutlers and post-traders to increase their business, than from any hostility threat-encuby the Mormens. Most of the requests thus far received come from this class of people.
