

HEADING FOR SALT LAKE

Denver People and the New Road to the West.

Bass Meeting Called in Colorado's Capital in Aid of the Road to This City and the Coast.

On Thursday evening next a meeting of the Denver chamber of commerce will be held to receive an interesting and important report, to be made by ex-Governor Evans, Chairman of the Denver chamber of commerce railroad committee, on the proposed Denver, Salt Lake and San Francisco railway.

Gives this largely depends whether or not the short line from Denver will be taken up by the road to the coast. It is stated that Mr. Evans has a favorable view of the proposition, and that one of the great eastern roads is ready to back the enterprise if sufficient western assistance can be obtained to put it in motion.

The leading men of Denver are in sympathy with the proposed new line, and at the meeting of the Denver Real Estate and Stock Exchange on Saturday this favorable opinion was freely expressed. The following press-cutting from the *Advertiser* was received:

"Without the building of a direct short line west from Denver to salt Lake and the Pacific coast is of the utmost importance to every citizen of Denver."

Denver. That every member of this exchange is urged to attend the meeting of the chamber of commerce Thursday evening and that this exchange holds itself in readiness to assist in bringing this enterprise to a successful issue.

SHORT LINE TO THE COAST.

The Denver Chamber of Commerce Working in Harmony with Salt Lakers.

An executive meeting of the chamber of commerce railway committee was held yesterday afternoon, says the Denver *Advertiser* of Saturday. The object of the meeting as explained by one of the members, was to interest capital and business men in a direct line of railway from here to the coast.

It is expected that the commercial bodies in Salt Lake City and San Francisco will also assist in the enterprise, as the proposed line will materially benefit a section of country through which it will run without working detrimental to any other line running to the coast.

One of the plans that was taken under discussion at yesterday's meeting was that of a transcontinental.

From here a direct line in Clear Creek canyon would reach the main range near Empire, where a tunnel 6000 feet in length would place the road on the western side of the range. By a series of grades a section of country would be traversed which is not covered by any other line.

This unbroken territory is composed of coal fields, grazing and farm lands, well irrigated, and it is estimated would give a good traffic to the proposed line.

By the Berthoud route the distance between Denver and Salt Lake City would be shortened 240 miles, with a very little grading. The distance to a number of Colorado towns would also be decreased.

The interest displayed by the Denver committee at yesterday's meeting has served to raise the spirits of the projectors. Salt Lake City has already signified her willingness to raise \$100,000 for the building of the first five miles of the road west of that city, and from information received from the Western congress, which has recently adjourned at Ogden, it is known that California and Oregon are deeply interested in the outcome of the race. To California the new line, as expressed at the congress, where the subject was mentioned, means the opening up of a country in Nevada, Utah and Colorado which has heretofore been closed to commercial pursuits.

The committee will confer with similar bodies in Salt Lake and San Francisco, and after their views have been received another meeting will be called, and in all probability the project will assume tangible shape.

SCHOOL MATTERS.

An interesting meeting of the Trustees and Teachers.

The trustees and teachers of Salt Lake county met Saturday, May 12, at 1 p.m. in the University building to consider the better graduation and establishment of high schools in the county and a uniform school calendar. Sup't. D. R. Allen presided. The superintendent stated briefly the object of calling the meeting; and the questions under consideration are important to both trustees and

teachers; would like to hear the subject of the establishment of high schools thoroughly discussed and the advantages and disadvantages considered. Would like to get the trustees in touch with us so the Legislature might come in. It is the next session.

Trustee J. M. Whittaker opened the discussion and gave a powerful argument in favor of high schools in the county, especially not a school where there was no interest in education; the unity of the trustees and teacher was necessary to advancement. The present system of mixed schools cannot do effective work. Gave a plan for a high school, the proposed thought the teacher had a great responsibility. At the close the gentleman was cheered with hearty applause.

One of the deaf mute students under the direction of Prof. McLean gave a brilliant display, the professor interpreting. The rendition was unique and interesting.

The discussion was continued by Mr. Joseph Cornwall in favor of high schools. He showed the disadvantages of the present system, and the injury often done right children by the lack of such a school in their localities that they might be able to attend.

Mr. Howe favored low schools; thought the public schools were not in one district; would like the legislature to change the time of election of school officers so men could not give sufficient consideration to important subjects like the political affairs of the state.

Mr. J. M. Whittaker made a motion that it be the sense of this meeting that "the trustees and teachers look to the establishment of high schools in the county."

Superintendent Allen showed the advantages of such a step, and the motion was carried.

Miss Vlaine Nelson rendered a piano selection in a pleasing manner.

Mr. Stuerland made a motion that we find the management of the schools of the county left by a lack of education, and Mr. Whittaker, Mr. Stewart and Mr. Adkin spoke in favor of the plan, while Mr. O. T. McCormick and Mrs. L. F. McCormick argued strongly against it. The vote stood, the trustees and five teachers voted for the motion, the rest of the teachers for the motion.

Mrs. Bell Salmon favored the meeting with a recitation which was finely delivered.

The subjects, "Teacher's Contract" and "Uniform School Calendar," were next taken up. Sup't. Allen presented a calendar he had prepared to follow as far as possible the ensuing year.

Mr. A. C. Larrabee, paying one week's salary to teachers who attended all meetings of the institute, adopted.

A committee consisting of trustees and teachers was appointed to draft a contract between trustees and teachers, after which meeting adjourned.

T. W. Blum, Secretary.

Plat E Monuments.

City Engineer Doremus and corps of surveyors will at once commence the work of placing stone monuments at Plat E and marking off areas possibly difficult to ascertain in that part of the city with reference to the bounded condition of streets and private property lines.

Hood's Cures

Sciatic Rheumatism

Quick Relief and Perfect Cure

"I was not satisfied with some remedies which did me no good. A friend presented me a bottle of Hood's Remedy, which I began to take. The relief was quite and two bottles cured me completely. I have since used your name and product, sending you my name and post office, requesting that you send me a bottle for 1 dollar. It is a valuable medicine. I recommend it to all who may be afflicted with rheumatism or gout."
