#### ----MORE BOSTON GOSSIP.

# Lewissohn Said to be Figuring on a

Bingham Amalgamation Late yesterday afternoon James Pollock & Co, received the following

from a Boston connection; "The story is generally credited that Adoloh Lewissohn is endeavoring to bring about a merger of consolidation of the Utah Copper, the Utah Consolid-ated, the Ringham Consolidated, the Boston Consolidated, and the United States Mining companies, and that he has recently been accumulating the stock of these concerns for that pur-pose in connection with Standard Of interests, who are also interested in the deal. It is understood that the plan provides for the formation of a new crovides for the formation of a new company to be capitalized at \$50,000,000, and that this company will take over the properties on the following basis: 500,000 Utah Con. at \$50, \$15,000,000; 150,-000 Bingham at \$50, \$7,500,000; 500,000 United States Mining at \$30, \$15,000,000; 500,000 Hoston Con. at \$3, \$4,000,000; 450,-000 Utah Copper at \$10, \$4,000,600; total, \$45,000,000.

In addition there will be rulsed in cash to pay off bonds and for working capital \$4,500,000, making the total capital \$50,000,000.

Locally, little credence is placed in the foregoing. Anyway, if such a dea, were brought about, it would probably be on a different basis than the figures indicate.

#### JANUARY CLOSED.

#### New Pumps Being Installed at Goldfield Proparty.

The January mins has been tempo-rarily shut down for good reasons. In the first place the sagine has not been overhauled since the plant was installed in July, 1904, and it uns absolutely nec-essary that repairs be made to same. says the Goldfield News. In the second place to be

In the second place they were holst-ing with a bucket from the 280-foot level—the deepest in the camp—over level-the despest in the camp-over 11,000 gallons of water each 24 hours, at

a receiver the "pretended board of di-rectors" would divide \$450,000 among themselves, and they( the protestants) would not get any of it. The \$450,000 Was the proceeds of the sale of the ompany's property. The court did not go into any of the

whether the protestants were really the owners of the stock they claimed. The board of directors claime that it and sold the stock for assessments. The protestants claimed that this sale was irregular and that the directors had thus overlssued the stock. They made out a prima facle case on this, so Judge Morse gave the other side the alfunctive of having a receiver appoint-ed or filing a bond of \$40,000. This was done, the United States Fidelity and Guarantee company being the surety.

### DIXIE A BIG ONE.

#### One of the Greatest Properties in the Goldfield District.

The Goldfield News says of the Dixie mine, of which W. H. Clark of this city is manager:

"At a depth of 210 feet on the Dixle a station has been cut and the ore body opened up for a width of 16 feet. On Wednesday this shoot was sampled, giving the following values: \$248; \$280 and \$160. This is the best showing that has been made by the mine and proves it to be one of the greatest properties in camp. No stoping has been under-taken, nor will there be any until the shuft has been continued to a depth of 400 feet. The constantly increasing values as the shaft progresses leads the management to believe that the mine will develop into a bonanza of the first importance. The depth thus far at-tained has proved that the ledge, which dipped out at the 70-foot level, again straightened and continues with regu-larity. It broadens and then narrows down but its general course is practi-At a depth of 210 feet on the Dixle larity. It broadens and then harrows down but its general course is practi-celly vertical. At the 110-foot level the ore shoot has been proved for a width of over 20 feet. Values at this depth are of high milling grade. As extracted is shipping one is being set aside and ill be sacked for shipment, although o effort at production will be made un-1 the consummation of the plan of de-elopment as outlined. The incline and on the scalled or get lead is he tunnel on the parallel or east lead is be ling driven with the object in view of determining its connection with a cross-lead from the main ledge that has been opened at surface. It is believed that the junction of these two will be opened the junction of these two will be sposed, and a shoot of very rich ore exposed. In every feature of development the mine is substantially improving, a fact that is giving added importance to the eastern belt of the district. 

## \*\*\*\*\* AMERICAN MAY CON-TROL COPPER MINES.

Eastern correspondents of James A. Pollock & Company, brokers, sent out a bulletin this Afternoon to the effect that overtures had been made looking towards a control of the Amalgamated Copper properties going over to the American Smelting & Refining company, In local mining circles it is believed there is something to this

story and that there are also very good reasons to believe that the same interests are seeking to control several of the big Bing. ham copper bonanzas, which probably gives foundation for the Boston report that a \$50,000,000 merger is being planned.

### 

JESSE EWING CANYON, James Hacking of Vernal Brings in Assortment of Ore.

James Hacking, a well known citi-zen of Vernal, is in the city today as a witness in the Collett case now pendthe federal court. Mr. Hacking brought with him a grip

sack filled with specimens of ore from several mining properties, owned by himself in Jesse Ewing canyon, about midway between Vernal and Rock Springs. On Mr. Hacking's claims are row gulches. found copper, gold and silver ores and, he believes, the rare metal, radium. reads as follows: He intends to have the samples, bellev-ed to contain the latter, analyzed and will take advantage of the opportunity

will take advantage of the opportunity to have the work done by the geologic-al survey at Washington. Mr. Hacking says there is quite a stir in the Stinking water basin oil fields Rio Blanco county, Colorado. One

In Rio Blanco county, Colorado, One company has 11 wells down, all but one containing off. Off is struck usually at a depth of 675 feet. One well is down 2,580 feet. The off region is located about 50 miles from Black Dragon.

# SHIPMENTS FOR IOLA.
