

EXTREME CRUELTY.

The Ground on which Mrs. Cottrell Obtained Her Divorce.

A WIFE'S SAD STORY TO JUDGE ZANE

The Defendant's Contradictory Statement is Not Believed by the Court.

The divorce suit brought by Margaret Emma Cottrell against her husband, Larned Cottrell, was heard in Judge Zane's court this morning, the petition being based on the ground of extreme cruelty.

The public are by this time tolerably familiar with the facts of the case, it having come up in one form or another on several occasions during the last few months. The defendant recently served a term in the county jail for an assault which he had committed upon his wife.

The plaintiff, a lady like little woman, apparently about 35 years of age, was represented by Attorney W. H. Dickson, for the defendant Judge Brownman appeared.

The story told by Mrs. Cottrell on the witness stand was a pitiable one. She said she was married to the defendant in Chicago on December 12th, 1878, and that they resided in Salt Lake about 14 years. There are four children—Stella aged 8, Wilfred aged 5, Larned aged 10, and Mary aged 12.

"What has been the defendant's manner of treating you for the last five or six years?" asked Attorney Dickson.

To this Mrs. Cottrell replied that he had systematically abused her and used foul language towards her. On the afternoon of September 10th, 1892, she came into the city on some business and reached home between 6 and 7 o'clock, having locked up the place where leaving. Her husband had gone into the country and she did not expect him back until late. He, however, returned during her absence, and was intoxicated. When she got home he was very angry, called her names and threatened to put her out of the house. When she went into the bedroom to change her dress the defendant caught hold of her by the arm, pinched it severely, and then he began the story of the last five or six years. "Do you think I will kill you?" he said, "I will kill you yet!" Her arm pained her very much for weeks, and she had to go to a doctor. He had given her husband no provision whatever. On November 2nd he came home from several weeks absence, having left her with but little money. He did not write to her while away, and she reproached him for it. "Do you think I will kill you?" he said, "I will kill you yet!" Her arm pained her very much for weeks, and she had to go to a doctor. He had given her husband no provision whatever. On November 2nd he came home from several weeks absence, having left her with but little money. He did not write to her while away, and she reproached him for it.

"Do you think I will kill you?" he said, "I will kill you yet!" Her arm pained her very much for weeks, and she had to go to a doctor. He had given her husband no provision whatever. On November 2nd he came home from several weeks absence, having left her with but little money. He did not write to her while away, and she reproached him for it.

Attorney Dickson—Since this suit was commenced has your husband been arrested and convicted of assault and battery upon you?

Witness—Yes, he has.

The defendant's counsel objected to this line of questioning, but the court admitted it in evidence.

Attorney Dickson said that the defendant served some fifty days in the county jail for assaulting his wife and even while under bonds to keep the peace he went to the house on several occasions and abused her.

Judge Brownman cross-examined the witness but failed to shake her testimony in any particular.

After Cottrell, daughter of the party, aged twelve, testified that she had seen the defendant kick her mother and threaten to use an axe upon her if she went to the lawyer's office.

In answer to Judge Brownman witness said her father never said "I mean" to the children.

At this point, a next-door neighbor of the parties, who gave evidence as to the defendant's cruelty and said that on one occasion he saw him strike his wife by the hair of the head and throw her off her feet.

Another neighbor spoke to the fact that when Mrs. Cottrell was ill, she would be threatened by her husband and could not get to her bed properly for quite half an hour afterwards. Her husband was very cruel.

The defendant went upon the stand and gave as alibi for the assault on his wife that he had never, he declared, used any violence whatever towards her. He had never tried to strike her. He had never threatened to use an axe upon her. He had never threatened to use an axe upon her. He had never threatened to use an axe upon her.

A—I never did. I did not kick her, but I did once raise my foot to her.

Q—Didn't you put a mortgage on that house?

A—No, I did not.

A—Other witnesses were called by the defendant's counsel who testified that they had always believed the defendant to be a sober man.

Judge Zane said the facts testified to by the witnesses for the plaintiff made out a clear case, although the defendant had fully contradicted them. His honor therefore granted the divorce.

As prayed, gave the wife the custody of the children, awarded her the household goods, and the value of the mortgage upon it, and the value of the household furniture, amounting to the sum of \$50 per month, payable on the first day of each month, the first payment to be made within five days from date; filed the attorney's fee at \$100, and ordered the costs to be paid by Judge Zane.

The parties have been residents of Twenty-first ward in this city.

REAL ESTATE AND MINING.

Incorporated Real Estate Men—Business and Mining Notes.

The Real Estate exchange held its meetings daily at 4 p.m. until further notice. This notice is not likely to be far distant if things go on as they have been moving the last twenty-four hours. Things are getting so warm that the exchange will either die of violent fever or it will have to meet in the early part of the day in give time for the exaltation of the heated gases formed by the incandescent temperature of some of the members.

The cause of the trouble was fully developed at last evening's meeting. J. H. Watt has been secretary of the exchange, and seemed to be getting on very well, as he is a capable man for the position. But in the office of secretary he would necessarily have first access to a volume of correspondence which would give him an advantage over others as to the state of the market and opportunities for profitable deals. For this reason a goodly number of real estate brokers, holding the position of secretary being filled by a real estate man, as in no other way strict law might be, in the promotion of his private interests, he would have opportunities which others did not possess.

For this reason a movement was instituted to depose Mr. Watt. It did not proceed in a peaceful way, however, and the incident caused considerable trouble, because of the impetuosity of the real estate men, and the fact that Mr. Watt was a man of considerable wealth and influence. The movement was not successful, but it has resulted in a new secretary being elected, and the exchange is now moving on as usual.

A decision was handed down in the last case yesterday afternoon, in the case of Thomas J. Hutchins vs. William T. Hutchins, to the effect that the case should be dismissed. The case involved eight acres of land in the town of Big Water, and the plaintiff claimed that the defendant had wrongfully taken possession of the land. The court found in favor of the defendant, and the case was dismissed.

The Metropolitan Trust company of New York has released the mortgage which it held on the Salt Lake Street Railway for \$100,000. The mortgage was borrowed March 1st, 1890, for the extension of the street railway system, and the payment in full for release was made on May 3rd of this year.

A few days ago there was noted the placing of a \$200,000 mortgage on B. Y. Trust company property. In the transaction of business enterprises the trust company has secured the loan held by Mrs. Mary J. R. Hampton on parts of lots 7 and 8, block 70, plat 4, of the block occupied by the theater. It is said that the consideration for the assignment to the trust company by Mrs. Hampton of these loans was \$10,000.

Mining and Other Notes.

A lot of ore is to be brought in from the extension of the Copperopolis mine in the Clinton district. The vein is claimed to be a large one.

The Greely company has sent a force of men out to get ready for re-commencing the work on the Greely mine at Alta as soon as the weather will allow.

A good strike of ore is reported in the Gateway mine at Willow Springs. The best of ore is about 100 feet and assays 40 ounces in silver and 10 per cent lead. If the Deep Creek road is built it will open up a way for the development of the mine at Willow Springs.

At the patent office in Washington yesterday patents were issued to Frank R. Allen of Salt Lake for improvements in a steam engine, and to W. W. Cleghorn of Park City, an engine for the purpose of driving a pump.

Several cases of diphtheria have been reported in the city.

Wm. W. Evans of Salt Lake, jailer here.

The shareholders of the Utah Commercial and Savings bank held their annual meeting yesterday afternoon, and elected the following directors: Wm. W. Evans, Joseph H. Smith, J. W. Mendenhall, Oliver Hardy, and W. E. Cummings.

A dispatch from Phoenix, Arizona, says that reports have reached that city of the flooding of the bottom of two prospects in the Copperopolis range, north of the Salt Lake. They are supposed to be the remains of the Mexicans who went out from Yuma some months ago, though many think that they are the bones of the two Frenchmen who carried the gold nuggets into Yuma some years ago and went out again, since they have never been heard of since.

The Little American mine, one of the great Arizona properties, with a few exceptions, are now in full operation, and by the 1st of June at least two or three hundred men will be employed. The amount of timber used at the mine is about 100,000 feet per day, while the amount of ore is about 10,000 tons per day.

The output of the mine is about 10,000 tons per day, and the amount of ore is about 10,000 tons per day. The mine is now in full operation, and by the 1st of June at least two or three hundred men will be employed. The amount of timber used at the mine is about 100,000 feet per day, while the amount of ore is about 10,000 tons per day.

The output of the mine is about 10,000 tons per day, and the amount of ore is about 10,000 tons per day. The mine is now in full operation, and by the 1st of June at least two or three hundred men will be employed. The amount of timber used at the mine is about 100,000 feet per day, while the amount of ore is about 10,000 tons per day.

The output of the mine is about 10,000 tons per day, and the amount of ore is about 10,000 tons per day. The mine is now in full operation, and by the 1st of June at least two or three hundred men will be employed. The amount of timber used at the mine is about 100,000 feet per day, while the amount of ore is about 10,000 tons per day.

The output of the mine is about 10,000 tons per day, and the amount of ore is about 10,000 tons per day. The mine is now in full operation, and by the 1st of June at least two or three hundred men will be employed. The amount of timber used at the mine is about 100,000 feet per day, while the amount of ore is about 10,000 tons per day.

The output of the mine is about 10,000 tons per day, and the amount of ore is about 10,000 tons per day. The mine is now in full operation, and by the 1st of June at least two or three hundred men will be employed. The amount of timber used at the mine is about 100,000 feet per day, while the amount of ore is about 10,000 tons per day.

The output of the mine is about 10,000 tons per day, and the amount of ore is about 10,000 tons per day. The mine is now in full operation, and by the 1st of June at least two or three hundred men will be employed. The amount of timber used at the mine is about 100,000 feet per day, while the amount of ore is about 10,000 tons per day.

The output of the mine is about 10,000 tons per day, and the amount of ore is about 10,000 tons per day. The mine is now in full operation, and by the 1st of June at least two or three hundred men will be employed. The amount of timber used at the mine is about 100,000 feet per day, while the amount of ore is about 10,000 tons per day.

The output of the mine is about 10,000 tons per day, and the amount of ore is about 10,000 tons per day. The mine is now in full operation, and by the 1st of June at least two or three hundred men will be employed. The amount of timber used at the mine is about 100,000 feet per day, while the amount of ore is about 10,000 tons per day.

The output of the mine is about 10,000 tons per day, and the amount of ore is about 10,000 tons per day. The mine is now in full operation, and by the 1st of June at least two or three hundred men will be employed. The amount of timber used at the mine is about 100,000 feet per day, while the amount of ore is about 10,000 tons per day.

The output of the mine is about 10,000 tons per day, and the amount of ore is about 10,000 tons per day. The mine is now in full operation, and by the 1st of June at least two or three hundred men will be employed. The amount of timber used at the mine is about 100,000 feet per day, while the amount of ore is about 10,000 tons per day.

The output of the mine is about 10,000 tons per day, and the amount of ore is about 10,000 tons per day. The mine is now in full operation, and by the 1st of June at least two or three hundred men will be employed. The amount of timber used at the mine is about 100,000 feet per day, while the amount of ore is about 10,000 tons per day.

The output of the mine is about 10,000 tons per day, and the amount of ore is about 10,000 tons per day. The mine is now in full operation, and by the 1st of June at least two or three hundred men will be employed. The amount of timber used at the mine is about 100,000 feet per day, while the amount of ore is about 10,000 tons per day.

The output of the mine is about 10,000 tons per day, and the amount of ore is about 10,000 tons per day. BAD ECZEMA ON BABY.

Head on both sides. Itching Awful. Had to Tie the Hands to Cradle.

Cured by Cuticura.

Our little boy broke out on his head with a bad case of eczema, when he was but three months old. We tried every remedy, but they did not cure him. We then tried Cuticura, and after using three boxes he was cured.
