

MINING, BUSINESS AND STOCKS

WEEK ON THE
MINING EXCHANGE

The Market, Quite Brisk at the Beginning, Ended With Decided Sluggishness.

COLUMBUS CONSOLIDATED SALES

Silver King Entered Into the Trading—Today's Closing Quotations And Sales.

The week closed with a little over \$4,000, as the volume of business transacted on the floor of the Salt Lake Stock and Mining Exchange this week. In the early part of the week the local market displayed quite a good deal of activity. Columbus Consolidated, Silver King, Grand Central and Daly-Judge furnishing the features. Towards the last, however, there was a decided slackening up and for several days the sessions of the Exchange have been on the sluggish order.

The decision of the supreme court in the Grand Central-Manpower case, in which the former won out after six years' tedious litigation, did not seem to make any great change in the operations of those stocks. Boston Consolidated has moved up several dollars a share during the past few days, but the local exchange has record of no sales. The stock has been an active trader, however, in the Boston market.

Today's closing quotations and sales were:

Bull Valley Company has found the Real Thing in Washington County.

S. H. Roundy, one of the principal owners of stock in the Bull Valley Mining company, which owns an onyx property in the northwestern corner of Washington county, came to the city a few days ago with a large lot of samples, which are probably the finest lot ever exhibited here.

A reorganization of the Utah Marble company, operating in Logan canyon, has been effected with the following officers: President, Joseph E. Cardon; vice president, John Montrose; secretary, N. R. Moore; treasurer, H. E. Hatch; directors, J. E. Cardon, John Montrose, N. R. Moore, W. S. Lamoreaux, L. S. Cardon, F. W. Thatcher, M. J. Ballard.

The famous Castellana mine near Ixtlan del Rio, Tepic, is again producing at a profit, the net revenue ranging from \$15,000 to \$20,000 a month. The mine is owned by a syndicate in which the Mexican Government and the Recovery company, which controls the McArthur-Forrest cyanide process in this republic, is principally interested, and it is now under American management—Mexican Herald.

COL. WALL GOES EAST.

Story Is Out That He Is to Have Conference With Charles M. McNeill.

Col. E. A. Wall, vice president of the Utah Copper company, departed over the Oregon Short Line this afternoon for New York.

It is announced that the business which calls the colonial east at this time is in connection with matters pertaining to the future welfare of the big Bingham mines operated for foregoing named corporation.

While Col. Wall refused to discuss it, there are very good reasons to believe that when he reaches his destination a conference will be had with

SUP'T. GALIGER
OF THE STOCKTON

Tells the "News" About the Recent Developments on 850-Foot Level.

IS IMPORTANT FOR CAMP.

What Assay Certificate Shows—Ore Bias Under Construction—What West Drift Shows.

There does not seem to be the slightest doubt but that the recent developments in the Stockton mine at Stockton can be recorded among the most important happenings of the year in that Tooele county camp.

According to Superintendent Galiger, who came in from camp last night and who was seen by a representative of the "News" during the day, the disclosure made on the \$50 level this week has about convinced him that what was supposed to be a shoot off from the Catherine vein is the real vein itself. When he left the mine yesterday afternoon the body had been penetrated for a distance of 35 feet straight ahead from where it was first broken into, while in width, the ore is exposed for all of eight feet, with no signs of either wall.

Of the eight feet, three of them show the presence of high grade shipping ore, identified with that found in some of the rich fissures of the Honerine mine, except perhaps the copper values at the depth of the Honerine are greater. However, this ore as shown by an assay taken yesterday contains values of .04 ounces in gold, 17.1 ounces silver, 70.3 per cent lead and 1.1 per cent copper. Portions of the remaining five feet would pay well to ship direct to the smelters, but taken as a whole, makes up some excellent high grade mill stuff. Pending the completion of the new ore bins, ordered put in by Manager Trenam a few days ago, work has been discontinued for the reason that everything taken out is ore and it was deemed advisable to stop hoisting until there was some place to put it besides piling it up on the dump for an unnecessary handling. Just as soon as the bins are completed work will be resumed and the ore sent to market. Superintendent Galiger has determined to ascertain the limits of the ore body as soon as possible and has ordered a cross-cut to the south, while another will be sent to the north just as soon as he can get at it.

Out in the west drift, on the \$50 level, a body of milling ore has been cut into to the distance of a little over 30 feet. Another shoot, about 90 feet from this one and developed recently, continues to look better all the time. The ore here is of a good shipping grade. Work has been discontinued on this shoot about 40 feet from the shaft, making four available ore bodies on the \$50 level, while four others Superintendent Galiger states, are within easy reach.

The Stockton company began the development of its property about five years ago. It has had a long hard pull, efforts of Manager Trenam and those who have given him assistance.

Ore in Indian Queen Mine.

A promising vein of copper-lead ore has been encountered in the upper tunnel of the Indian Queen mine in Beaver county. It was found at a depth of 135 feet from the surface.

Andrew Mayberry will go to Eureka, Nev., in a few days to look over the properties recently acquired by the United States company.

John J. Daly and Moylan C. Fox made an inspection of the Daly-Judge mine yesterday.

Manager Spiro and Supt. Dunyon of the Little Bell mine went to Park City this morning.

H. G. McMillian and Geo. A. Black inspected the Star Con mine in Tintic yesterday.

Supt. James Creighton of the Dalton & Lark mine of Bingham, is in the city today.

Lorin Morrison, manager of the Indian Queen mine in Beaver county is up from camp.

John J. Daly and Moylan C. Fox made an inspection of the Daly-Judge mine yesterday.

Manager Spiro and Supt. Dunyon of the Little Bell mine went to Park City this morning.

A carload of ore from the Advance property near Caliente, Nev., owned by Will Lawrence and brother of this city, has reached the sampler.

Andrew Mayberry will go to Eureka, Nev., in a few days to look over the properties recently acquired by the United States company.

Supt. Gatti of the Skylark copper mine in Beaver county has come to the city to recuperate from a slight attack of typhoid fever.

The assessment levied by the directors of the May Day Mining company, is 2½ cents a share. Delinquent date, Nov. 18; sale date, Dec. 3.

The ore and bullion settlements reported late yesterday by McCormick & Co., were: Crude ore and concentrates \$21,750; base bullion, \$22,000.

The greatest silver producing district the world has ever developed is Guanajuato district, Mexico. The recorded output is 1,400,000,000 ounces. It has been worked by civilized races since 1848.

Three more suits were recently filed against the owners of the Washoe smelter in Montana by farmers who want \$2,000,000 damages for injuries they claim have befallen livestock and vegetation from the smelter gasses. An injunction to stop the smelter is also asked.

Experienced mining men who have watched very closely the recent developments in the Esperanza Mining company, El Oro, claim that it is today the greatest producer of gold bullion in the world, and that the net yield of the mine for the present month will be \$1,000,000 Mexican money—Mexican Herald.

The Eastern and Western Gold & Copper company is the name of a new organization in the process of incubation, which is to operate a group of claims at Ophir, embracing 160 acres of ground. James Quinn, superintendent of the Buckhorn mine and Mark Lund are the owners of the ground.

A reorganization of the Utah Marble company, operating in Logan canyon, has been effected with the following officers: President, Joseph E. Cardon; vice president, John Montrose; secretary, N. R. Moore; treasurer, H. E. Hatch; directors, J. E. Cardon, John Montrose, N. R. Moore, W. S. Lamoreaux, L. S. Cardon, F. W. Thatcher, M. J. Ballard.
