The first 60 miles of the way is over the government road to the Great Tonto dam, now under course of construction. The roadway is a perfect boulevard, and although it traverses one of the roughest mountain countries in Ari-zona, it is built on a 6 per cent grade, and is as fine a piece of road work as ean be found in the world. After reach-ing Salt river, some 52 miles from Mesa, the road follows the course of the stream just high enough from the river bed to escape the floods, and most of the way is built in solid rock along the base of cliffs that tower thousands of feet skyward. Four miles from the dam site the road climbs the mountan on a grade, and comes out immediately above the dam, and one can look down into the gap now being filled with giant blocks of sandstone, being laid by the large force of men in the employ of the contractors, O'Rourke & Co. The upper part of the dam is now en-tirely across the river, and its about 10 feet above the bed of the river, and the entire stream is now turned through the timpel through the side of the New York City-33 West One Hundred and Twenty-sixth St. Chicago-149 So, Paulina St. San Francisco-1443 Baker St. Los Angeles 423 West Tenth Denver-622 West, Sixth Ave. Chattanooga, Tenn.-711 Fair-

Dear Mr. Fletcher :- I wish to congratulate you on your numerous victories over counterfeiters and imitators of Castoria, and trust the time is not far distant when these inferior and dangerous mixtures will be entirely suppressed.

You are right when you say in your advertisements that it is "Experience against Experiment."

I feel it to be an outrage, and an imposition upon the parents of little children that my name should be associated with imitations of Castoria, dangerous to the health and life of these little ones who too often fight their battles for life in vain.

Let me again commend you for the high standard you have maintained in the preparation of my prescription, and I confidently believe it is due to this scrupulous integrity you are indebted for the wonderful sale of Castoria to-day, and the steady growth it has had since I gave you the details of its manufacture in my laboratory thirty-three years ago.
