Question of Disposing of Gold Captured by Americans at Tien Tsin Missionaries in China.

New York, Oct. 16 .- A special to the World from Hongkong says:

Americans and their extensive interests in the far south of China are imperiled by the rebellion in Kwang Tung province. Already the revolt is grown to such proportions that the Chinese authorities are unable to suppress it.

Mr. Wildman, the United States consul general at Hongkong, has gone to Manila to confer over the critical situation with Gen. MacArthur, the commander in chief of the American troops in the Philippines.

CAPTURED PAG TING FU.

London, Oct. 16 .- A dispatch from Shanghai states that Pao Ting Fu was captured on Saturday by the force of 7,000 allies sent from Pekin for the pur-

SPOILS OF WAR.

New York, Oct. 16 .- A special to the Times from Washington says: The American share of the loot at Tien Tsin is larger than at first report-Tien Tsin is larger than at first reported. It has been understood that all the Americans took after the capture of Tien Tsin was gold amounting in value to \$278,000. This report arose from the fact that Li Hung Chang asked Gen. Chaffee to restore that sum to the Chinese government. It now appears that this \$278,000 was only the value of gold coins and gold bars taken from the Chinese treasury at Tien Tsin, and apparently it was only the money taken from the treasury which concerned Earl Li as a government official.

Things of value were also obtained from other sources and it is now reported that the total value of the loot will reach a figure about \$100,000 in excess of the amount originally reported.

cess of the amount originally reported. The gold coin and gold bars taken from treasury were melted by order of Chaffee,

Gen, Chaffee.

Nothing is yet knewn about similar seizures in Pekin or at points along the line of march. The total value of the seizures will probably be very high.

Li Hung Chang's request for the \$278,000 taken from the treasury has received no reply.

elved no reply. QUESTION OF KEEPING GOLD.

There is considerable doubt about whether the United States is entitled to keep this gold, whatever its amount may finally be determined to be, because this government has been proceeding on the theory that no war exists in China. The expedition of Gen. Chaffee has been repeatedly defined as a rescue expedition and not an invasion. The United States has kept up communication with the officials and represent munication with the officials and repre-sentatives of the Chinese government and has insisted on regarding the whole trouble in China as the result of internal disturbance, which did not justify open war. It is, therefore, doubtful open war. It is, therefore, doubtful whether the American government can take the contents of a Chinese government treasury as spoils of war.

Nevertheless, it is extremely unlikely that the gold will ever be returned to China, even that part of it identified and claimed by Li Hung Chang. It may not be held as spoils of war, for the reason given, but it will probably be held as reason given, but it will probably be held as part payment of the indemni-ty which America will demand.

WILL WAIT FOR PEACE.

It will certainly not be returned until the peace negotiations are concluded nor will any final decision about what to do with it be made till that time. Certificates for at least a large part of it have been deposited to the war department's account with the treasury department. They will stay there for long time to come-certainly until the negotiations are concluded and probably longer.

The chief point of speculation now, therefore, is not what will become of the loot, but what its amount is. The sums already reported cover only the amount taken at Tien Tsin. Officials have no information to give concerning any sums which may have been taken at the cities along the Pei Ho or at Pekin itself. There was undoubtedly a great deal of looting at the capital. but whether any share of it fell to the Americans is a question concerning which no information is yet obtainable. of the fact that Tien Tsin was taken in July, and that it was three months later before any official statement could be obtained about the seizure there. In fact, only five days ago it was denied on high authority that Gen. Chaffee had sent any report on the subject, al-though he had,

THE ENGLISH ELECTIONS AND THE DOMINANT FIGURE IN THE BRITISH EMPIRE TODAY.

THE result of the British elections demonstrates beyond a doubt that the Right Hon. Joseph Chamberlain is the dominant figure in the British empire. His course in South Africa, which has been so bitterly criticised by his enemies at home, has received an overwhelming indorsement at the polls, and the Salisbury government will be stronger than before. Premier Salisbury still remains the nominal leader of the empire, but the Chamberlain policy is the policy of the

powered and scattered. Seven of the Americans reached San Jose, but it is probable that the remainder were

captured.

The enemy surprised a party of scouts of the Forty-third infantry at a point three miles from Takoban, Leyte island, killing three of the Americans at the first volley. Two escaped and gave the alarm, but the enemy succeeded in evading their pursuers. The native police of Takloban and conspired to surprise the Americans. The bodies of the dead soldiers were badly mutilated.

British Ship Missing.

San Francisco, Oct. 16.-The British ship Lancing, which left Port Blakely, on June 1st, bound for Port Pirie, Australia, is now out 126 days and twenty-per cent reinsurance has been offered on her. She has a cargo of nearly 2,000,000 feet of lumber. A story is current in shipping circles that the crew has nu-tinied, killed Captain Chapman and lo-cated on Bonham island in the South Seas, after wrecking the vessel, but this report lacks verification.

Dastardly Crime of Strikers.

Chicago, Oct. 16,-Adam Maesch, a woodworker and until a few weeks ago secretary of the Woodworkers' union, was shot and probably fatally wounded last night near his home by two men supposed to be striking woodworkers or their sympathizers. The attack is said to have been due to the fact that he had returned to work with nonunion men after a strike had been de-

A general strike of union woodworkers was declared five weeks ago, in forty mills engaged in the manufacture off wood material. About 1,400 men were involved at first, but the unions soon won in thirty-five of the tied-up plants. It was in the factories of the South and West sides that the union victories were achieved. For the last few weeks the contest has been waged bitterly at the plants of the North and Northwest sections of the city where the style is still in force. the strike is still in force.

Big Winery Destroyed.

Fresno, Cal., Oct. 16.-The Kohler & Frohling winery, belonging to the California Wine association, has been en-tirely destroyed by fire. The building, machinery and tanks were valued at \$50,000. Over 250,000 gallons of port wine were stored in the structure. The total loss is between \$100,000 and \$125,-

The real rough rider is the man who rides the river with a twisting, squirming log for a saddle, on which he stands, balancing himself to its every motion. If his coolness fails or his nerve gives death reach out for him. It's the giving way of the 'nerve" which

proves fatal to so many a man. Perhaps he is simply crossing the street, as he has done ten thousand times. He hears a shout, stops, hesitates, gets "rattled" and is run over. When a man finds that his memory plays him false often, when he starts off to get something and forgets what he went for,

when he knows he has locked the front door and yet an irritating uncertainty compels him to get up and verify his knowledge, then that man is in danger at any minute when confronted by a trilling danger. He is unnerved. This condition can be perfectly cured by the use of Dr. Pierce's Golden Medical Discovery. It strengthens the stomach, nomishes the nerves, and purifies

"The reason I delayed writing was because I wanted to wait one year after I had taken the medicine before giving my statement, and now I can send a good, conscientious testimonial," writes Chas. H Sergeant, Esq., of Plain City, Madison Co., Ohto. "During the summer and fall of 1856 I became all "run down," nerves, were out of order and stomach out of order. I wrote to Dr. Pierce for advice. He said I had general debility, and advised Dr. Pierce's Galden Medical Discovery, and thanks to you for your selvice. I used six bottles; and since I stopped taking it, about one year ago, I have not taken any medicine of any kind, and have been able to more every day. My appetite is good, I can eat three square meals a day, I do not feel that miserable burning in the stomach after eating, and my blood and nerves are in good shape."

So Says a Britisher of the Recent Dissolution of Parliament.

He Was Re-elected, but His Party is in the Minority-He Expects a Change-

Pribune from London says:

New York, Oct. 16 .- A dispatch to the

Mr. James Bryce says that the dissolution of the British parliame. was quite without precedent and quite opposed to the spirit and usage of the British constitution. The law fixes the duration of barliament, and established usage has settled that parliament ought not to be dissolved prematurely save to take the opinion of the country on some definite Issue, usual when a bill has been defeated or the ministry censured. To spring dissolution especially upon a state registry for the sake of party advantage is a new departure, and a very bad one here. There has been really no issue before the country because the war is over and annexation is fait accompli. Consequently, this gen-eral election settles nothing and outnes no future policy, foreign or domes-ic. No one has the least idea what the ministry will now do, Perhaps they on't know themselves.

Mr. Bryce is not disheartened by the results of the elections. He maintains that too much discouragement is ex-pressed regarding the position of the liberal party. He says:

"Considering the difficulties under which it has had to fight this election, it has given proofs of strength which make it probable that before long the current may be setting in its favor. The

disparity represented by the number of members of each party returned is very nuch greater than the disparity repre ented by the votes cast. Mr. Bryce's personal triumph in se-uring his re-election has been rendered more significant by the unexpected suc

cess of the unionists in upsetting a strong liberal majority in Aberdeenshire and winning their sixth seat in Scotland. This gain gave them a lead of a single seat over the majority of the last parliament with only one out of seven

seats to defend in the remaining con-

Mr. Chamberlain, having finished the work of the canvass, has returned to the colonial office, where business is in arrears. The only hint which has been thrown out respecting the form of set-tlement in South Africa is his own forecast that the new territories wil governed as crown colonies after they have passed out of the condition of military rule. Objection is offered by some critics that this will mean government by Downing street, with all the wires in the hands of Mr. Chamberlain. His enemies are hardly consistent when they insist that he must mop up the mess which he has made, and at the same time object to his keeping the tentative administration of the new colonies under his own direction. His detractors are forced to coneede that governed as crown colonies after they detractors are forced to concede that he was a shrewd politician in bringing on dissolution when he did. The union-ists have barely kept their majority under most favorable conditions. They would certainly have reduced it by waiting until January or March. The cost of living has run up by leaps and counds, and the various industries are nampered by high prices of coal and aw material. The cotton supply for ancashire is a serious problem which henaces the working class with loss of moloyment, and the full burden of in-reased income taxation will be felt during the spring. The khakl election was adroitly timed for the government but it was premature so far as Lord Roberts was concerned since his return

is not expected until January. Alaskan Natives Dying.
