been found on the 400 and 500 levels. Notwithstanding the fact that about 500 feet of drifing has been done on the 400 nothing more than a trace of gold has been disclosed by the assays. The mill is being put in shape for the treatment of the ores now exposed on the 200 and 200 levels, the object being to make the mine pay the costs of further pros-pecting, if possible. The mill will probby be started up about Nov. 15th, and it is stated that if the ore does not cover expenses of prospecting the mine the property will probably be relin-quished.

Stand and States States

EXAMINES BEN BUTLER. Professor Palmer Well Pleased With

Condition of the Mine.

Prof. O. A. Palmer, the well known mining expert returned to the city last mining expert returned to the city last evening, after spending several days examining the Ben Butler property at Bingham. Mr. Palmer stated today that while his examination was not completed he considered the prospects of the Ben Butler making a good mine very encouraging. It is stated that the professor visited the property for the purpose of gathering information that will be of use in a suit that may be brought against the Liberal owners involving the question of apex. Mr. Palmer was not prepared to say anything further regarding this matter today than that there is every probability that the ore body in the lower tunnel will be found connecting with the streak of ore ex-posed in the upper tunnel, several hundred feet nearer the surface. The property is said to be looking very good but the professor expects to become more enlightened on several points when he goes over the ground again next week.

Arrives from the Century.

Alma Tanner, who has just come down from the Century mine at Park Valley, reports the property in the very best condition. The mine never looked as well as it does today in spite of the fact that the big ore chuic has not been cut in the lower tunnel. The tunnel has crosscut the vein and drifting has been started towards the ore chute is exposed in the upper tunnel. It evidently lies south of the crosscut. No doubt whatever is felt that the same chute of ore will be tapped on the lower drift very shortly. Meantime preparations are being made to start up the new who being made to start up the new min in a few days. Dr. White expects to leave next week for the mine, Regard-ing the indebtedness the doctor said today that within one month the mill should pay off all the debts of the company on account of the construction of the mill.

A Big Tunnel Project.

A new mining era has begun in the Leadville, Colo., district, based upon milling and tunnelling enterprises, says an exchange. As to the tunneling pro-jects several are under way now, the main one being the great Yak, which is in almost 10,600 feet and has proven the great advantage of such projects not only in handling ore at a smaller cost to the producer, but in showing the character of the different formations penetrated. Even at this early date numerous claims lying adjacent to the Yak tunnel are being operated through that channel, but the fact that the company has so much territory along company has so much territory along its route goes to prove that when it is ready it will develop an enormous ter-ritory. Well informed mining men are of the opinion that the most successful way to explore the depths of Prospect mountain is to run a tunnel through it from the Birdseye side.

MINING NOTES.

Capt. Duncan McVichie went out to Bingham today.

The May Day of Tintie will market three cars of ore tomorrow. The Ben Butler of Bingham reached the market today with four cars of ore.

ing to start raising on the ore chute at once. In the "News" report yesterday it was not intended to convey the impression that the ore had pinched out. It had pinched or was much narrower in the face of the drift though it is said have looked good in the top and bottom.

THE FARMERS' INSTITUTE.

Work of the Agricultural College Carried to

the Homes of the People.

How Meetings May be Arranged For -Director J. A. Widtsoe Chairman of Committee-Institute Annuals.

The laws of the state provide that the Agricultural College shall hold Farmer's Institutes in various parts of the state each year, and funds are provided to meet the expenses of such meetings. This permits the officers of the college to carry the special work of the institution to the homes of the people and thus give instruction to those who could not possibly come to the college. In addition to the college officers experts in various lines of agriculture are engaged to add to the interest and value of those meetings. The arrangement of this work is placed in charge of a committee of which Director J. A. Widtsoe is chairman.

During the past year institute meetings have been held in thirty to thirtyfive towns of the state.

Any community that desires a Farmr's Institute meeting during the coming year should send a request to the chairman of the committee as early as possible; preference is given to those localities which will take the greatest interest in working up the meeting.

To give a wider distribution to the work of the Farmers' Institutes there is issued each year an annual embody-ing a selection of the leading papers and addresses given during the year. Four of those annuals have been issued. some of which yet remain on hand, and can be had on application to the ollege. The annual is of about one hundred to one hundred and twenty pages of reading matter and is sent free to

all residents of the state on request. F. B. LINFIELD. Agricultural College, Logan, Utah, Sept. 7th, 1901,
