

SUCCESSFUL CLOSE TO FAIR.

Financial End of the Exhibition
Comes Out on Easy
Street.

SOME \$2,000 ON RIGHT SIDE.

All Hands Today Are Busy Cleaning
Up and Removing Live Stock
And Exhibits.

The fair closed last night with a nest egg on the right side of the ledger. Just how big the egg is has not yet been determined, but it is asserted that it runs over \$2,000. In consequence the directors separated last night feeling that their labor had not been in vain. Prior to going home they settled up a number of details and incidentally voted a gold badge to Miss Jeanette Coulter, who drew the coupons in the raffle for the gold watch; voted a resolution of thanks to the police force for its good work; to J. G. Bransford for the excellent management of the races; and to J. G. McDonald for his untiring efforts in behalf of the fair during the past two months when he has neglected his business affairs to give his entire attention to making the fair a success. How well he succeeded, aided and abetted by the balance of the directors, has been told during the past week. The directors, however, passed no resolutions of thanks to the weather clerk for saving the day in the eleventh hour by turning on the solar faucet after his abominable conduct earlier in the week; however, several were taken in the direction of "squaring" him against next year.

The 26th annual exhibition of the Deseret Agricultural & Manufacturing society closed last night after a successful day wherein every cent taken in at the gates was clear profit. Everything went off without a hitch. The balloon ascension at 5 p. m. went off well and one of the best descents of the season was given by "Kid" Austin, the only incident marring the affair being that he landed on the railroad grade eventually with sufficient force to sprain his ankle. The horse races were good, but unlike Caesar's wife, they were not above suspicion, some of them—but then the losers on the pools are always making a howl on the slightest excuse. The midway gave a final whirl last night and then the fair closed in a blaze of glory.

Today all hands are busy removing exhibits, live stock and incidentals. The fair is already fading away into a mere memory.

One of the officials stated to the "News" that the expenses this year footed up to something over \$10,000, and that the receipts were well over \$17,000, which includes admissions, entries of exhibits, the lease of privileges and a percentage from the midway shows.

COLD MEDAL AWARD.

The Salt Lake Coffee and Spice Mills, manufacturers of Salt Lake Baking Powder, Extracts and Spices received the Gold Medal for the best display of Spices at the State Fair of 1903. No medals or premiums were given by the State Fair, on any of the above goods FOR QUALITY. We demanded a test on these goods, but were refused the same. The statement made by our competitors in the papers that they received a Gold Medal and first prize for best Baking Powder and Extracts is misleading, and we challenge them to a test on quality of the above goods. SALT LAKE COFFEE AND SPICE MILLS.

LEIGH, IDA.

MRS. ANDREW MOFFATT DEAD
Storms Delay Harvest Work—Heavy Hay Crop.

Special Correspondence.
Leigh, Fremont Co., Ida., Oct. 4.—Eliza Swann Moffatt, wife of Andrew Moffatt, died last Thursday at Haden, aged 23 years. Her health had been poor for several years. The funeral services were held in the Haden Opera House. She leaves a husband and one child, with a host of friends to mourn her departure.

We are having all kinds of weather except dry weather. It has been wet for several days and it is feared that grain will grow in the stock, as a great amount is in the fields yet. No betts have been moved out yet and consequently money is very scarce. The hay crop was very heavy.

PARKER, IDA.

DOUBLE WEDDING.

Beet Harvest and Thrashing Hindered by Continued Rain.

Special Correspondence.
Parker, Fremont Co., Idaho, Oct. 5.—Beet harvest would have commenced today had it not been for the rain, which has been almost incessant for ever a week. It is doing much damage to the second crop of alfalfa, which with rain and frost together, is much of it, very inferior. There are also many acres of grain in the field which cannot be threshed, until a dry spell comes.

It is thought by the district manager the beets throughout will not average more than nine to 11 tons per acre. This is owing mostly to the non condition of the ground, which is also full of weeds.

The stacked grain is being threshed out whenever there is a lull between showers.

RIGBY, IDA.

CRIPPLED FOR LIFE.

C. W. Poole Loses Right Hand—Local Improvements—Grain Shipments.

Special Correspondence.
Rigby, Fremont Co., Idaho, Oct. 4.—It is with great regret we record the

an accident which has deprived our townsman, Chas. W. Poole, of his right hand. He was bringing a steam engine from Idaho Falls and in attempting to remove a rock from the rear of his hand was caught and so badly

WRIGHT'S PHILIPPINE POLICY.

LUKE E. WRIGHT.

Luke E. Wright, who succeeds Gov. Taft in the Philippines, is a man of quite positive character. It is believed by Americans in the Philippines that the new governor will inaugurate several changes in domestic policy that will be more in accord with the aspirations of the natives.

crushed that amputation was necessary. Recently Mr. and Mrs. Elias Williams lost their little boy, Artemus Earl. His death was caused by spinal paralysis, apparently brought on by whooping cough.

DAHL-PERRY NUPTIALS.

Harry E. Perry and Miss Delaine Dahl were recently united in matrimony and they have now gone to seek fortune in the Corner d'Akone mines. Our population keeps increasing by immigration from Utah and other parts as well as by the arrival of babies in quite a number of homes recently.

Among those who are erecting nice residences are George E. Hill, Jr., A. T. Johnson, Shepherd Crowther, and S. S. Lator.

The new bank opened for business on the 15th ult. and is a great convenience to our business men. It is a branch of Anderson Bros. bank of Idaho Falls.

The new grain mill did not commence operations as was expected on the 1st inst., owing to the non-arrival of a water wheel, but it is hoped that it will be in running order shortly. The thrashing machines are very busy around here and grain is bringing a pretty good price. Agent Fullmer reports 10 carloads of grain shipped this last month. Several farmers have not gathered one-half the crop they would have done owing to the severe hail storm previously reported.

Rigby has become an incorporated village and the trustees are making a number of ordinances to secure "domestic tranquility, promote the general welfare, etc."

Weak Hearts

Are due to indigestion. Ninety-nine of every one hundred people who have heart trouble can remember when it was simple indigestion. It is a scientific fact that all cases of heart disease, not organic, are not only traceable to, but are the direct result of indigestion. All food taken into the stomach which fails of perfect digestion ferments and swells the stomach, putting it up against the heart. This interferes with the action of the heart, and in the course of time that delicate but vital organ becomes diseased.

Mr. D. K. Smith, of Nevada, O., says: "I had stomach trouble and was in a bad state as I had heart trouble with it. I took Kodol Dyspepsia Cure for about four weeks and it cured me."

Kodol Digests What You Eat and relieves the stomach of all nervous strain and the heart of all pressure.

Bottles only, \$1.00. Size holding 2 1/2 times the trial size, which sells for 50c.

CURRICULUM OF PUBLIC SCHOOLS.

Excellent Paper Read at the Federation of Women's Clubs
Last Week

BY MRS. REBECCA E. LITTLE.

Value of Manual Training and Domestic Science—Subjects Should Be Broad Rather Than Deep.

The following excellent paper on "The Curriculum of Our Public Schools," was read by Mrs. Rebecca E. Little, regent of the University of Utah, at the Federation of Women's clubs, held in this city last week.

The public schools are common property. We all have claims upon them. Almost everyone contributes something to their support paying directly or indirectly the taxes which go to their maintenance. Inasmuch as the subject is so near to us and of vital importance it demands our earnest attention. An institution whose good or ill methods of procedure mean the success or failure of a community to a great extent, is worthy of our consideration.

And what subject relating to the public schools is of greater importance than the curriculum, the list of studies

practical education manual training and domestic science have in some of the states become a part of the public school curriculum. Utah is just beginning to realize the advantages of having them, and in a limited way they have been introduced in some of our schools.

MERITS OF MANUAL TRAINING.

The merits of manual training and domestic science are obvious. No time need be taken to explain this. Certainly a man, if by the skill learned at school, can drive a nail straight, hang a screen door, or put a washer on the kitchen tap, is of more service to himself, to his family and community than if he could not perform these acts. A young woman is more capable of looking after a home if she can sew and has good ideas on cooking. It is not necessary to dwell on this; but simply to admit their advantages and aid in their encouragement.

VALUE OF DOMESTIC SCIENCE.

The value of domestic science and manual training in the school is overestimated. The trouble with innovations is that too much is expected of them. Then after trial if what was looked for is not realized, the venture is pronounced a failure. Domestic science as taught in the public schools is not to train the girl to become a competent cook or a finished dressmaker, manual training is not to furnish the boy with a trade. We ought not to try to specialize in the public schools. This can better be done after the school age.

BROAD SUBJECTS REQUIRED.

The subjects to which an American youth devotes so many years of his early life should be selected more for their breadth than their depth. As in the public schools the child lays the foundation which is to be the support or basis of his future efforts, it is highly essential that the foundation be a broad one. Certainly the curriculum should be chosen from the standpoint of utility, but with a wide conception of utility.

One trouble in this practical area is that we expect immediate returns. We haven't the patience to wait for final effects. In our desire to measure definitely the results of education we are apt to undervalue and overlook the contributions to happiness and aid in developing character and in perfecting the human nature.

THE ARTISTIC NATURE.

If a knowledge of music learned in youth, makes a man's life fuller and more appreciative, if while listening to the strains of a sacred choir, it experiences intense enjoyment, who will say that the time required to educate his artistic nature was not well spent? Music instead of being simply a recreation should become an essential feature in our schools.

The child acquiring a facility for free-hand drawing in school can ever after express his thoughts and emotions in a few simple strokes of the pen. That acquisition of skill is a perpetual source of enjoyment. With additional instruction on coloring and perspective, which reading on the different schools of art, he acquires enough knowledge on the subject to enable him to appreciate a good picture. This being admitted, art as taught in the schools is from a utilitarian standpoint.

MORAL TRAINING.

Taking a little of the time from intellectual studies, and devoting it to the moral training of school children, it is believed, will result beneficially. There is good reason for urging this to be done. There is something wrong with our system of education, when statistics show that there are more criminals among the educated than the non-educated class. Whether a systematic ethical training will be effective in removing evil is yet to be proved. It doubtless would be of some value. In moral influence, much depends upon the teacher, its being a case where personality and example are more than precept. Example and precept and personality combined would surely bring about good. "I care not who teaches my boy Greek," said the author of Tom Brown's School Days, "but let me select the master who is with him in his hours of rest and of play." Doubtless he had in mind that good man, Dr. Arnold, the famous teacher at Rugby, whose moral influence it felt throughout all England.

SHOULD READ GOOD BOOKS.

Of ethical value next to associating with worthy people, is the reading of good books. There are many, many books which are of great value which might be read with profit. There is one book, however, of world renown belonging to this class, which is not given the same interest that our forefathers devoted upon it. There may be serious objections to having the Bible taught in our schools, but to read it in class would surely call for no criticism. In the way the pupil would unconsciously imbibe a feeling of reverence, and get ideas of ethical value.

One argument in favor of the kindergarten is that the Bible stories told help to develop the spiritual nature of the child. If Bible stories are a good thing in the kindergarten, why aren't they good in the grades? No one yet has satisfactorily explained why the child's spiritual development should not go on after it is six years of age. But some may argue that it is not expected of the schools to teach morals and reverence, that it is the duty of the church and the home. But some children do not go to church, and some have not good principles taught in the home. While the schools are universal, and if the reach whom the others cannot. No one should complain of the prerogative. Besides, it usually requires the efforts of the schools the family and the church to develop the child. The Bible should be read not incidentally but have a definite time and place, not only for its ethical, but for its literary, historical and artistic value.

THE COMMON CURRICULUM.

Sufficient time and attention are paid to the studies forming the common curriculum. Reading, writing, arithmetic, grammar and history have so long been regarded as essentials, have so long held a leading place, that they need no stimulus, and it is quite improbable that there will be a falling off in their interest. I should like to add spelling to the list just mentioned, but the facts in the case will not warrant it. The methods employed for teaching this course are well tried, and it would seem that the limits of excellence have been attained. But they train only one side of the child's nature, the intellectual, and that now is considered too narrow a vein of education. The curriculum is extended.

THEORIES REVOLUTIONIZED.

The nineteenth century has been of a revolutionary character in almost all modes of action and thought. Perhaps in nothing else has there been a more radical change than our theories of education. The great inventions, the mechanical improvements of the past 100 years have upset our ideas on this subject. Accordingly our system of education is changing, to conform to the vast commercial enterprise and industrial activities of the time. Action, action is the watchword of the present generation. The question is not how much do you know, but how much can you do with your knowledge; not the amount of learning but the facility to apply it is the paramount idea. To meet the growing demand for a

OUTLOOK FOR EDUCATION.

The outlook for education in the future is optimistic. The tendency is to abandon what is narrow, one-sided and aim instead to give the child broad views of life. Written examinations are no longer regarded as a sure test of the child's education. They may measure his knowledge, his accumulation of facts, but not his power, ability to perform, his character. Carlisle in speaking of Shakespeare, says the correct measure of a man is his degree of vision, meaning the number of sources which supply him with knowledge and power. The greater the number of avenues open to him for obtaining wisdom, the broader views life and larger conceptions will be his. Though the beneficial results from a study of music, art, physical culture, ethical training, can not be weighed definitely, yet these factors in education are doing their work, and their ultimate results will not be disappointing.

WESTMINSTER COLLEGE.

Work on the Chapel to Be Pushed to a Speedy Completion.

There was a meeting last night of the trustees of Westminster college in Dr. Paden's study, when it was announced that a visible beginning would be made in the erection of the proposed college buildings. According to the request made the institution some years ago, the first structure must be a chapel to cost not less than \$10,000, and the site of this has been located on east Eleventh South street. The building committee, Rev. Dr. McNeice, H. G. McMillan and Judge Van Pelt, were instructed to secure plans and go ahead with the work. The chapel, when completed, will be occupied by the The Presbyterian church of this city now worshipping on Washington avenue, until the new college buildings are up, the old chapel will revert to purely collegiate use.

Blue Island, Ill., Jan. 14, 1901.

Messrs. Ely Bros.:—I have used your Cream Balm in my family for many years and it has become my family doctor for colds in the head. I use it freely on my children. It is a Godsend to children.

Yours respectfully, J. KIMBALL.

Messrs. Ely Bros.:—I suffered greatly with catarrh and tried different remedies with friends of the family using one bottle of your Cream Balm I found relief and I cannot praise too highly such a remedy.

MISS CORA WILLARD, Albany, N. Y.

MARRIED IN THE TEMPLE.

Hyrum J. Brinkerhoff and Olive Clare Kimball Made Man and Wife.

In the Temple yesterday President Joseph F. Smith performed the ceremony which united Hyrum J. Brinkerhoff and Olive Clare Kimball, both of Thatcher, Ariz., as man and wife. The groom is the son of Hyrum and Margaret L. Olsen Brinkerhoff, and the bride is the daughter of Andrew and Olive Woolley Kimball, the former president of the St. Joseph stake. In the evening a few of the immediate relatives and friends of the young couple gathered at the home of Mr. and Mrs. James Wardrop, 444 east Second South street, Mrs. Wardrop being a sister of the bride's mother. There were present among others President Smith and wife, J. Golden Kimball and wife, and George E. Woolley. The affair was modest, yet imposing, and one long to be remembered by the young people whose mothers were so far away. Mr. and Mrs. Brinkerhoff will remain at the Wardrop residence until Sunday night. Those of their friends desiring to see them may call after 4 p. m. on Sunday.

MOTHERS.

Who would keep their children in good health, should watch for the first symptoms of worms, and remove them with White's Cream Vermifuge. It is the children's best tonic. It gets digestion at work so that their food does them good, and they grow up healthy and strong. 25c. at Z. C. M. I. Drug Dept.

AGRICULTURAL COLLEGE.

Attendance this Year is 20 Per Cent Greater than Last Year.

President Kerr of the Agricultural College is in the city. He says the attendance this scholastic year will be 20 per cent larger than last year, and reach to the 600 point. The college has just received two carloads of new machinery, and the new buildings are fast approaching completion. President Kerr remarked that the order from the ordinance department at Washington relative to turning in all old Springfield issued to the different states, would in no wise affect the Agricultural College, as the institution received all its munitions and arms from the war department direct, and no military equipment of any kind was secured from the state. So the Utah Agricultural College will not have to put up with wooden guns.
