

AMERICANS AND THE SIMPLE LIFE

Prof. Zueblin, Late of Chicago University, Says, As a Rule, Do Not Care for It.

DON'T WANT RESPONSIBILITY

Their Aim Usually is to Become a Member of Some Exclusive Set.

Chicago, Oct. 7.—Americans from the rich down to the poor do not care much about the simple life, and are growing in exclusiveness, according to Charles Zueblin, formerly of the University of Chicago and now a settlement worker of Boston. The sociologist addressed a gathering at Abraham Lincoln Center, a Chicago social settlement last night "On the Common Life."

"The average American, no matter who he is, or where he lives, does not care much about the common life," he said. "Usually his aim is to belong to some exclusive set, where he will have no responsibilities."

"It makes no difference what his pocketbook is. The millionaire is not the only American who seeks an exclusive set. It is universal."

"There are some who seek the intellectual life, but this is quite as exclusive as any and is as much a menace to democracy."

Mr. Zueblin declared that the bargain seeker is responsible for the under-pay and fatigue of the girl behind the counter.

"The individual in front of the counter," he said, "is responsible for the under-pay of the tired girl at the end of the day—she ought not to be there at the end of the day, because you ought not to be there. This desire to get a bargain—cheap goods from cheap people—causes the competition which makes combination of wealth and many of our great problems. If we could do away with it, then the solution of our problems would come so much easier."

FRESHMAN FATALLY INJURED IN A RUSH

Chicago, Oct. 7.—H. B. Esch, 22 years old, a freshman student in the Bennett college of eclectic medicine and surgery, was seriously injured in a clash between the freshmen and the sophomores Tuesday. In an effort to fight his way through a crowd of sophomores to reach his dormitory, he was thrown to the earth and almost trampled to death. Several students kicked him in the side at the time he was finally rescued. He was unconscious. His body was a mass of bruises. Police officers, who had broken up the fight, carried him to an ambulance and he was taken to a hospital. Nurses said last night that his condition was critical.

More than 200 students participated in the rush. No less than 50 were injured.

COLD WEATHER ADVICE.
To all is to beware of coughs and colds on the chest; as neglected they readily lead to pneumonia, consumption or other pulmonary troubles. Just as soon as the cough appears treat it with Ballard's Horehound Syrup, the standard cure of America. Use as directed—perfectly harmless. A cure and preventive for all diseases of the lungs. Price, 25c, 50c and \$1.00 per bottle. For sale at all drug stores, 112 and 114 South Main St.

Elstedsford Prize Winners.
Concert Tabernacle tonight, 8:15.

WOMAN'S GOLF ASSOCIATION.

St. Louis, Oct. 6.—Match play in the Western Women's Golf association tournament began today at the St. Louis Country club. Miss Elizabeth Young, who won the medal for low qualifying score yesterday, had the honor, her opponent being Miss I. Clark of Waukegan. At the close of the day the 43 original aspirants for the championship were reduced to eight.

Pure Drugs and Prescriptions our specialty. Halliday Drug Company.

The many uses of Gold Dust

If you were to use for each kind of washing, cleaning, scouring and scrubbing, one of the so-called special preparations which are made, you would have an imposing and expensive array of chemicals, washing compounds, cleaning pastes, etc.

There is one cleaner that can take the place of them all, and without the need of borax, ammonia, kerosene or naphtha, and that is Gold Dust.

TAKE OUT THE CREASES!
Your overcoat would look "shop new" if you sent it here to be pressed and cleaned. We put on new velvet collars, 75c and up. Call for our wagon.

NERVOUS DYSPEPSIA

A Chicago Woman Tells How the Tonic Treatment with Dr. Williams' Pink Pills Cured Her.

The processes of digestion are controlled by the blood and nerves. That is why the tonic treatment, by which the blood is built up, has cured so many cases of stubborn stomach trouble.

Many people are suffering daily from stomach trouble because they cling to old-fashioned methods, eat predigested foods and in other ways aggravate the disorder they seek to cure. But prejudice must give way before proof such as this statement by Miss S. A. McCarty, of 6028 South Green street, Chicago, Ill., who says:

"I suffered for four years with indigestion which I think was brought on by overwork and nervousness. My stomach was in such bad shape that as soon as I ate anything I would be distressed, have pains and my stomach would become sour. No kind of food seemed to agree with me."

"I went to a specialist for several months but he did not help me so I tried Dr. Williams' Pink Pills upon the advice of my sister. They soon helped me and I took them steadily for quite a while. My indigestion gradually disappeared, until in time I was able to eat and digest any kind of food, gained in flesh and strength and have not been troubled with nervousness since."

Dr. Williams' Pink Pills are guaranteed to be safe and harmless to the most delicate constitution. They contain no morphine, opiate, narcotic, nor anything to cause a drug habit. They do not act on the bowels but they actually make new blood and strengthen the nerves. If you want good health you must have good blood. Bad blood is the root of all common diseases, like anaemia, rheumatism, sciatitis, neuralgia, St. Vitus' dance, nervousness, indigestion, debility, general weakness, paralysis, locomotor ataxia and the special ailments that only women-folk know.

A helpful booklet, "What to Eat and How to Eat," containing information regarding diet, free on request.

Every dyspeptic should have a copy of our free diet book. Dr. Williams' Pink Pills are sold by all druggists, or by mail, postpaid, at 50 cents per box; six boxes, \$2.50, by the Dr. Williams Medicine Co., Schenectady, N. Y.

FORT MYER NOT DESIRABLE PLACE

A. M. Herring, Inventor of Aeroplane, Says It's Too Confused For Trials and Tests.

CHANUTE TAKES SAME VIEW.

Necessitates Too Many and Too Sharp Turns for Trying Out Successfully.

New York, Oct. 6.—A. M. Herring, whose aeroplane is due in Washington next week, Tuesday, to undergo its preliminary trials and tests for acceptance by the government, says that he will be ready on time. There is a bare possibility, however, that he may be permitted to make some, if not all of his testing flights at some other place than the Fort Myer grounds. Personally, Mr. Herring is not pleased with the prospect of flying at Fort Myer.

His criticisms were made at a luncheon given before the Wright accident has been that the available flying circuit is too restricted, necessitating too many and too sharp turns for trying out most successfully and safely a high speed flying machine. No word has yet come from the war department that any change will be made, but before assembling his machine Mr. Herring is going to discuss the matter with Maj. Squires and others of the signal service. Mr. Herring will go to Washington tomorrow or at the end of this week, taking a portion of his machine with him, "just to let the officers know I mean business and am prepared with the right kind of a machine," he added.

Mr. Herring makes it known that his preference for long distance flights will be on the Hempstead Plains where a wide circuit could readily be obtained, free from trees and buildings and safe tests made at high speed.

Mr. Herring asserts that many of the minor troubles that bothered Orville Wright in his flights previous to the accident were due to the necessity of watching for the right time to make the sharp turns and being prepared to negotiate them safely on the instant. Octave Chanute, who witnessed most of the former flight said last week while in the city that Mr. Herring's criticisms were well taken, as Fort Myer did not present ideal or really safe conditions for high speed flights.

PRINCE OF WALES TREE.

One Planted by Him in Central Park Dead and Cut Down.

New York, Oct. 6.—Its life ended, the big English oak known as the Prince of Wales tree, which was planted in the mall in Central park in 1860 by King Edward VII, then Prince of Wales, was cut down yesterday.

"Jack" Griffin, a park foreman and a good Irishman, decided that the tree had been made by arboriculturists to save it, but to no avail. Its final destruction followed several public letters which suggested the danger of the tree falling and injuring the public. While traveling in this country the then Prince of Wales, using the "incognito" of Baron de Bylandt, acted upon suggestion of A. H. Green, then controller of the parks and planted in Central park an English oak and American elm. Many men in public life were present at the planting. Green held the sapling upright in the holes which had been dug, and the prince heaved the dirt in around the roots. The American elm is still in a flourishing condition.

\$100.00 REWARD.

Would gladly be paid for a cure by many people who are crippled by rheumatism, yet if they only knew it, they can be cured by a few bottles of Ballard's Snow Liniment, and the price is only 25c, 50c and \$1.00 per bottle. For sale by all drug stores, 112 and 114 South Main St.

WATER POWER IN FOREST RESERVES

U. S. Forester Pinchot Favors Granting Permits for its Development.

SHOULD BE IRREVOCABLE.

Except for Breach of Conditions, but For Fixed Terms—Is Danger.

Of a Monopoly.

Washington, Oct. 7.—Discussing the charge made by the forest service for permits for developing water power in national forests and the probable action of the transmississippi congress at San Francisco in the matter of the conservation of water power, Gifford Pinchot, the United States forester, in a recent letter said he favored legislation to authorize the issuance of permits irrevocable, except for breach of condition, for a fixed term sufficiently long to insure security for investment.

"Grants for valuable franchises and property rights," said Mr. Pinchot, "such as were made gratis to the railroads when the natural resources of the country were thought to be inexhaustible cannot now be seriously considered in connection with the development of water power on the lands and forests. The great importance of water power to the country is coming to be more thoroughly realized and fear of a water power monopoly, instead of being looked upon as an absurd vagary, has taken a firm place in the thought and consideration of the people."

WARRANT MAY END AN ILLINOIS FEUD
Edwardsville, Ill., Oct. 7.—A feud which has existed for six years between Grant Fork, a village in Madison county, Ill., and Old Ripley, a village six miles away in Bond county, culminated today in the issuance of warrants for the arrest of three old Ripley men on the charge of assault to kill. The three men are Moses, James and Roy Davis. The warrants were obtained by Otto Peters, Texas League baseball star, and new recruit of the St. Louis Americans. His brother, Joseph Peters, of Grant Fork, was shot in the head in a fight with Old Ripley residents, the result of the enmity between the two communities.

This hostility is traced to a picnic at Old Ripley six years ago.

LAME BACK.
This ailment is usually caused by rheumatism of the muscles of the small of the back, and is quickly cured by applying Chamberlain's Liniment two or three times a day and massaging the parts at each application. For sale by all druggists.

LONG ISLAND TO HAVE "ADAMLESS EDEN."

New York, Oct. 7.—Long Island is to have an Eden. Eden, Miss Davidoff, a native of Russia, but who is now a resident of New York city, is building an experimental farm at Bellocrest, which will be operated by women. Men will be barred from the greenhouses, where fruits and flowers are to be grown every month in the year by the aid of electricity.

While similar experiments have been made by this and other governments, Miss Davidoff believes her experiments will be more successful than those carried on by the bureau of plant industry of the department of agriculture.

Mrs. Davidoff is a writer for magazines. She says the experiments will be based on the theory that the growth of vegetable matter which ceases at sundown will continue through the night if proper artificial light is supplied to stimulate the developing powers of plants. Fruits and flowers that are grown in this section only in the spring and summer months, she believes can be cultivated during the entire year by supplying the necessary artificial light through the electrical process that will be adopted.

CORSET WEARING.
Doctors Testify Results in Reducing Ability of Wearer to Work.

New York, Oct. 7.—Corsets worn steadily by women are likely to result in reducing the ability of the wearer to perform work, according to Dr. George L. Gale, and Dr. John McGill, of Jersey City, who testified for the defense yesterday at Newark.

In the suit of Miss Katherine McKenna, against the North Jersey Street Railway company, a subsidiary corporation of the Public Service corporation.

Miss McKenna asked for \$25,000 damages for injuries sustained in a collision. The jury awarded \$2,700. Her claim was that she was unable to carry on her work as a saleswoman and could

not sleep because of her injuries. Counsel for the trolley company asked the physicians what the effect of corset-wearing would be upon a saleswoman. Both the doctors declared that in their opinion the corset would be likely to cause weakness.

WOMAN WILL TRY HAND AT WEATHER PREDICTION

New York, Oct. 7.—Meteorologists in the employ of Uncle Sam's weather bureau as well as the general public, will have an opportunity today to judge Mrs. Eva F. Smith Wilkins, the new weather-sharp. Mrs. Wilkins, who recently created quite a sensation by her accurate weather predictions, will give demonstrations today on the roof of the Hotel Gotham. She promises to forecast the weather for today and tomorrow, covering 24 hours. It is expected that at 10:30 this morning the rival of the weather bureau will take her position on the highest possible point of the hotel and after studying the clouds, their color, size, shape, movement and changes, will pronounce her forecast. According to Mrs. Wilkins God put the signs into the heavens for man and his signs prove better than man's. After this demonstration in this city the weather prophetess will leave here for Philadelphia and thence journey to Washington.
