DESERET EVENING NEWS.

TRUTH AND LIBERTY.

12 PAGES—LAST EDITION.

THE BIG FAIR NOW IN FULL SWING.

Auspicious Opening of the Twenty-Eighth Annual Exposition of Utah.

GREATEST DISPLAY YET MADE.

Strenuous Times on the Grounds This Morning in the Make-Ready for The Entire Week.

FINE WEATHER IS ENCOURAGING.

Governor Cutler and Staff in Attendance This Afternoon—Officers Are Crowded With Work.

The heroic mind and the average heroic weekly generally associates pumpkins with the state fair, and really on second sober thought the 28th exposition of the Deseret Agricultural and Manufacturing society which opened this morning is "some pumpkins."

Two years ago the state fair, personified, discarded its Buster Brown costume and low socks and blossomed out in all the pomp and glory of knickerbockers. This year it appears in long pants, with creases in them at that, and a stand-up collar, and ready is now reaching after a hirsute upper lip.

CATTLE SHOW.

There are already on the grounds about 125 head of the Jerseys, Short Horns, Herefords and Holsteins, the different breeds being numerically represented in the order named. Supervisor Supt. Christensen is in charge of the cattle and livestock division of the United States, consider the cattle exhibit better than last year, in fact the best the fair ever had. He also places the display of swine superior to last year's exhibit, the name of Tamworth, Durock Jersey and Berkshires being of special excellence. The Tamworth swine in particular are attracting attention, with their cinnamon red bodies. This morning the swine were put on the market. The sheep number about 100, and are well selected for excellence of breeding. In the sheep and swine shed bay is found a new feature for Utah state fairs, in the shape of two car loads of Jacks and Jennies from the Kaysville tithing yards. They are fine looking animals, clean cut, and well fed, and occasion considerable compliment.

The sheep show was occupied by the chickens last year, but will be occupied by the dog show, and the supervisor was engaged this morning spraying the pens with disinfectants. Dogs are being brought in this afternoon, but the supervisor says as it is a night show, the sheds will have to be equipped with incandescent lamps which will of course be done. North of this shed is being set up a collection of gasoline engines of various kinds, a variety of different purposes, including those used in walking beams, horizontal engines, upright engines, portable engines—all doing something, but principally pumping water. The Utah Implement company has, further along, a large traction steam engine in operation with a pneumatic straw stacker. The Miracle Pressed Stone company of this city has an out door exhibit in the shape of decorative stone, artificial stone, and concrete machines. The attractions of the Midway-Pike-Trail are being put in position, and will include a variety sufficiently varied to suit the most fastidious.

MANUFACTURER'S DISPLAY.

The new building is as active as the traditional beehive, with exhibitors and their assistants busy around getting their booths into shape. There is a gallery which is being utilized, and every foot of space being made the most of. The Hewlett-Saw-Way company has a very pretentious display which includes a Ferris wheel revolving with a load of manufactured goods, the pillars supports being show cases, for exhibition of the same. The Independent Telephone company has an excellent display in the shape of a model switchboard, and wide variety of house phones. J. H. Bach shows a large sample from his shop, and the Utica is offset by a display of canary birds shown by W. Lakin. The Z. C. G. boot and shoe exhibit is complete and of the most creditable character. The Goss company also make an excellent display of furs, and John Gallacher has a trunk 36x27 ft. and 2½ ft. high, made of brown mustard and boards, the whole making a representation of the trunk of the Cardin giant. The display from the Deaf and Dumb school is very gratifying, including charts of all kinds, raised map work, tools, and wood work, and various other articles on scientific and practical interest.

POULTRY EXHIBIT.

The poultry exhibit this year also has fallen into line and surpassed previous efforts in the direction of a good display on the part of department D. Not only is the exhibit better, but the public has a better chance to view the birds on account of the space being less restricted. The American breeds are there in force, together with the Asiates, Mediterraneans, Polish, Hamburgs, French, Game and Bantams. Pigeons, ducks, geese, turkeys, rabbits, Belgian hares, white mice, piebald rats, guinea pigs, incubators and eggs all combine to make a good show which is bound to bring hard feelings among the exhibitors when the judges render their decisions, because nearly all are good and the owners feel sure that they are entitled to the prize.

DOMESTIC SCIENCE.

A special kitchen section is being prepared for the domestic science department of the state university, where the girls will dispense the product of their handbook to curious visitors. The art department proper is an improvement over last year's when there was insufficient light and cramped quarters. This season the conditions are much improved. There are more artists with pictures on exhibition than before with Harwood, Culmer, Richards, Young Hafen and others exhibiting. There is a wider variety of talent displayed, and the general range of the work is along more pleasing lines. The painting section was not in entire order this morning, but by this evening all of the pictures will be received and in place. The china exhibit also is better, though not so well displayed, talent, though there is not as many pieces as last year. The department of women's work is most excellent, well worth careful examination. There is a wide variety of talent shown here in embroideries, in open work, drawn work, ladies wear and suitings of all kinds, and in all colors and qualities of goods. The display is great both in quantity and quality.

AGRICULTURAL DEPARTMENT.

Unique and Splendid Exhibit by The Garland Sugar Co.

The general public will encounter a number of innovations on entering the Fair grounds. In the first place as he goes in he will pass through an up-to-date turnstile with a ticket checker attachment that will make him think he is about to take a ride on the L. road in New York. At a first glance he will see the State Fishery exhibit of 20 species of fish, and the De Lavel Cream Separator company has a real live goat working the tread mill operating the separators.

The McDonald Candy company has a large and tastefully arranged booth with toothpicks, pieces of candy, and beyond is the Ontario Creamery of Richmond with fine looking cheeses and other dairy products. The Crager fence company shows a variety of ornamental metal fadings and fencing highly creditable to home manufacture. President McDonald has

MANUFACTURED PRODUCTS.

The Provo woolen mills have the best display they ever had, including blankets, men's suits, cassimères, etc. The Salt Lake Knitting company has a big knitting machine in operation, and a good display of partly, and wholly manufactured products. The Utah Fire Clay company has a complete exhibit of brick and general fire clay, including a grayish glazed brick that promises to find a good market for residence purposes. It is just as good as the famous Denver Chocolate brick. Bywater & Gross have an exhibit of cornice work that is imposing, showing that Salt Lake is no longer dependent on eastern manufacturers. The Salt Lake Knitting company has a big knitting machine in operation, and a good display of partly, and wholly manufactured products. The Utah Fire Clay company has a complete exhibit of brick and general fire clay, including a grayish glazed brick that promises to find a good market for residence purposes. The Utah Fire Clay company has a complete exhibit of brick and general fire clay, including a grayish glazed brick that promises to find a good market for residence purposes. It is just as good as the famous Denver Chocolate brick.

The Faust Creamery company has a novel exhibit in the shape of a dairy maid made of butter, which is well executed. The National Biscuit company has taken special pains to make an attractive exhibit in the form of a tea room featuring goods, and the display is worthy of complimentary criticism. The Salt Lake Soda Water company has an attractive booth, and the De Lavel Cream Separator company has a real live goat working the tread mill operating the separators.

The McDonald Candy company has a large and tastefully arranged booth with toothpicks, pieces of candy, and beyond is the Ontario Creamery of Richmond with fine looking cheeses and other dairy products. OPENING CEREMONIES.

The fair was officially declared open by Gov. John C. Cutler at 1:40 o'clock this afternoon. Preceding the declaration a speech of welcome was made by President McDonald of the board of supervisors, and Gov. Cutler responded with reference to the future of the state fairs, declaring that this one was the greatest ever held to date.

On the stand were the members of his staff in uniform, Presidents Joseph F. Smith, John R. Winder, Andrew H. Lord and Francis M. Lyman. Hon. Henry Smith, and most of the board of supervisors. Prayer was offered by Rev. Peter Simpkin, after which the band rendered the "Star Spangled Banner."

ADDRESS OF WELCOME.
President McDonald then delivered

TO BRING FOREIGN CAPITAL INTO JAPAN

SECURITIES THIEF MAKES CONFESSION

Getting Ready For The Fair And Conference.

Minister of Commerce Kiyoura Urges Necessity of it Before Associated Chamber of Commerce.

FACILITIES MAY BE EXTENDED

Business Men Expected to Exert Their Best Efforts to Increase Export Trade.

TOKIO, Oct. 2, 6:30 p.m.—Baron Kiyoura, minister of agriculture and commerce, appeared before the associated chamber of commerce today. He stated that the government was considering the improvement and extension of means of communication and carrying power both on land and water. Efforts were also being made to secure lower freight rates.

He dwelt on the importance of the introduction of foreign capital, and said it was possible that facilities for that purpose would be extended. He expressed the hope that business men would utilize to the utmost the moral and material benefits of the victories of Japanes for developing foreign trade and industries at home and abroad.

At the same meeting vice Minister of Commerce Saito said it would be premature to divulge the financial fiscal measures before the ratification of the peace treaty. He called attention to the fact that the amount of internal loan bonds taken up by foreigners already reaches 1,000,000,000 yen (about \$50,000,000), the interest on which is paid in hard money. He concluded by saying that the business men were expected to exert their best efforts to increase their export trade, maintain the credit of the nation abroad and encourage frugality, so as to cope with Japan's increased indebtedness abroad.

IN THE GALLERY.

The galleries contain a very essential part of the exhibits in the new building. In that section are being rapidly arranged and classified the art work of the city schools, which better off in every way than that of last year, and will be examined with the greatest interest by the visiting schools. Supt. Christensen is overseeing the display, and is much gratified by the high character of the exhibit. There are the charts and diagrams of the city cemetery and Liberty park. This is the first time in years that the conservatories of these city departments have been drawn upon to brighten up the fair. Flowers, rubber plants, palms, pot plants and ferns are here shown in a decidedly pleasing variety.
